Utkarsh Dwivedi Sir

Made with Xodo PDF Reader and Editor

Ancient Indian History

Periods of History

- Prehistoric period - the period of which there is no written evidence
- Protohistoric period - evidence of script is present but still unread
- Historical period - written evidence is present

Priests related to Vedas

- Priest - Vedas
- Hota (Hotri) - Rigveda
- Adhvarya - Yajurveda
- Udgata - Samaveda

Brahma - Atharvaveda

Jain scriptures – author

- Kalpasutra – Bhadrabahu
- Syadvadmanjari – Mallisen
- Nyayavatar – Siddhasen Diwakar
- Nyaya Deepika – Dharambhushan
- Panchavinshatika – Padmanandi
- Appendix Parvan – Hemchandra
- Liquid collection - Nemichandra
- Tattvartha Sutra – Umaswami
- Shloka Vartik – Vidyanand Swami
- Sermon's essence – Kundkund

Rulers and their queens

- Chandragupta - Kumaradevi
- Samudragupta - Dattadevi
- Chandragupta II - Kubernaga
- Kumaragupta I - Anantadevi
- Rudrasena II - Prabhavati Gupta

Post-Mauryan period inscriptions

- Ayodhya inscription - Dhandev
- Besnagar inscription - Heliodorus
- Shinkot inscription - Menander
- Nanaghat inscription - Nayanika (Naginika)
- Panjtar inscription – Kushan

Of the Gupta period Administrative officers

- Kumar Amatya - Highest administrative officer
- Maha Dand Nayak - Judge
- Maha-Sandhi Vigrahika - Officer of war and peace (treaty)
- Maha-Baladhikrit - Commander in Chief
- Maha-Aksha Patlika - Highest officer of accounts department
- Pratihara - Guard of inner area of royal palace
- Maha Pratihara - Guard of entire royal palace

Terminology related to land in the Gupta period

- Kshetra: Cultivable land
- Vastu: Habitable land
- Grassland: Land suitable for animal fodder
- Sil: Land which was not suitable for cultivation
- Aprahat: Land which was wild

Major rulers of Pallava dynasty

- Simhavishnu (575-600 BC)
- Mahendravarman I (600-630 BC)
- Narasimhavarman I (630-668 BC)
- Mahendravarman II (668-672 BC)
- Parameshwaravarman I (670-695 BC)
- Narasimhavarman II (Raja Singh) (695-722 BC)
- Parameshwaravarman II (705-710 BC)

Administrative system of Chola period

- Aule - was responsible for implementing the orders of the king
- Peruntaram - high ranking officials
- Siruntaram - lower ranking officials
- Viceroy - leader of the province, who was a close family member of the king
- Nattar - head of the nadus
- Nattavai Nadu Council - council related to nadus
- Nattavais - officials related to agriculture
- Variam - men who helped in running the village government

Port cities in the Indus Valley Civilization

- Balakot
- Sutkagendor
- Nageshwar
- Lothal

Important offices of Gupta period

- Mahadandanayaka - Chief of Justice
- Ashwapati - Officer in charge of horses
- Mahapratihara - Chief of guards
- Nagar Shresthi - Officer looking after city administration
- Gramadhyaksha/Gramika - Village head
- Narapati - Chief infantryman
- Dutakas - Related to gifts and grants
- Ranabhandagrika - Officer in charge of military supplies
- Sandhi-vigrahika - Minister of Peace and War

JAI HO STUDY

Made with Xodo PDF Reader and Editor

- Akshapataladhikrit - Superintendent of Records and Accounts
- Pilupati - Officer in charge of elephants in the army

Important Sangam Literature

- Silappadikaram
  - Written by Ilango Adigal. It is about the love affair of Kovalan, Kanagi and Madhavi. Later, a Kanagi cult developed in South India.
- Manimekhalai
  - Written by Sitalai Sattanar, the story of Silappadikaram continues in the next generation with Manimekhalai being the daughter of Madhavi and Kovalan.
- Tolkāppiyam
  - Written by Tolkāppiyar was a product of the Second Sangam and is basically a work on Tamil grammar and poetics.
- Tirukkural
  - Deals with philosophy and was written by Tiruvalluvar.
- Jīvaka Chintamani
  - Written by the Madurai-based Jain ascetic Tiruttakkathevar (10th century)
- Kundalakeshi
  - It appears to be a tragic love story about a Hindu or Jain girl from the merchant caste named Kundalakeshi who falls in love with Kalan, a Buddhist criminal sentenced to death.

Texts and their Authors

- Pundarik Vitthal
  - He was an Indian musician associated with 'Rag Mala'. He composed a book named 'Sadrag-Chandrodaya' related to music.
  - He composed a text named 'Ragmanjari' as instructed by Raja Mansingh.
- Srikanth
  - He is associated with "Rasa Kaumudi", was a student of Pundarik Vitthal. He was the court poet of Satrusalya.
  - Rasa Kaumudi is related to vocal and instrumental music and dance.
- Somnath
  - He was a Telugu Brahmin associated with Raga Vibodh and belonged to Rajahmundry. o He described his ragas in terms of the Janya-Janaka or Thata-Raaga system.
- Venkataraman
  - He is associated with Chaturdandiprakashika, was an Indian poet, composer of Carnatic music.
  - Chaturdandiprakashika introduced a theoretical melakarta system to classify and organize ragas in the Carnatic music tradition of India.

Tripitaka related to Buddhism

- Tripitaka/Three Baskets is a traditional term used for various Buddhist scriptures.
- The three Pitakas are the Sutta Pitaka, Vinaya Pitaka and Abhidhamma Pitaka.

- Suttapitaka:- contains the main teachings or Dhamma of the Buddha. It is divided into five Nikayas or collections:

Digha Nikaya:

- Majjhima Nikaya
- Samyutta Nikaya
- Anguttara Nikaya
- Khuddaka Nikaya:

- Abhidhamma Pitaka:-It is a philosophical analysis and systematization of the teachings and scholarly activity of monks.
- Other important Buddhist texts include Divyadana, Dipavamsa, Mahavamsa, Milinda Panha etc.
- Milindapanha is a Buddhist text written in the Pali language. This text describes the conversation between the Buddhist monk Nagasena and the Indo-Greek ruler Milind. Milindapanha literally means 'Questions of Milind'.
- Nagasena was a Sarvastivadi Buddhist monk from Kashmir.

Important rulers of Kushan Empire

- Kujula Kadphises (30 AD - 80 AD)
  - Called Kadphises I
  - First Kushan ruler who laid the foundation of Kushan Empire in India
  - Considered as the founder of Kushan Empire

JAI HO STUDY

Made with Xodo PDF Reader and Editor

- Vima Kadphises (95 AD - 127 AD)
  - Mentioned in Rabatak inscription
- Kanishka (127 A.D. – 150 A.D.)
  - He was the most famous Kushan ruler
  - In 78 A.D. he introduced a calendar called Saka Samvat, which is now used by the Government of India
  - During Kanishka's period, Purushpura and Mathura were the two capitals of the Kushan Empire

Indus Valley Civilization: Geographical Expanse

- Indus Valley Civilization included Punjab, Sindh, Balochistan, Rajasthan, Gujarat and Western Uttar Pradesh
- Sutkagendor (in Balochistan, Pakistan) in the west
- Alamgirpur (western Uttar Pradesh) in the east
- Mandu (Jammu) in the north to
- Daimabad (Ahmednagar, Maharashtra) in the south

Kings and related inscriptions

- Kumaragupta I - Mandsaur inscription
- Patik - Takshila inscription
- Chandragupta II - Udayagiri cave inscription
- Samudragupta – Eran Inscription

Raja and his other names

- Chandragupta – Sadrocottus
- Bindusara – unfriendly attack
- Ashoka – Pivadassi / Priyadarshi
- Chanakya – Vishnugupta / Kautilya

Important facts related to Puranas

- The best systematic description of Indian history stories is found in Puranas
- Author - Lomaharsha Rishi or his son Ugrasrava
- Number of Puranas - 18
- Genealogy of kings is found only in five - Matsya, Vayu, Vishnu, Brahman, Bhagwat Purana
- The oldest and most authentic of the Puranas - Matsya Purana
- Mention of Maurya dynasty - Vishnu Purana
- Mention of Gupta dynasty - Vayu Purana
- Mention of Satvahan dynasty - Matsya Purana
- Details related to agriculture along with monarchy - Agni Purana

Important facts related to Jainism

- Mahavir Swami was born in - Kundagram / Kundalpur
- Mahavir Jain died in - Pavapuri
- The word Tirthankara is related to - Jain
- Mahavir was the last in the order of Jain Tirthankaras
- On which river bank did Mahavir Swami get enlightenment - On the bank of Rijupalika river

24 Tirthankaras of Jainism

- There are a total of 24 Tirthankaras in Jainism, who propagated Jainism from time to time. These are -
  1. Rishabhdev
  2. Ajitnath
  3. Sambhavnath
  4. Congratulations
  5. Sumatinath
  6. Padmaprabhu
  7. Suparshvanath
  8. Chandraprabh
  9. Pushpadant (Suvidhinath)
  10. Shitalnath
  11. Shreyansnath
  12. Vasupujya
  13. Vimalnath
  14. Anantnath
  15. Dharmanath
  16. Shantinath
  17. Kunthunath
  18. Arnath
  19. Mallinath
  20. Munisubrata
  21. Naminath
  22. Neminath or Arishtanemi
  23. Parshvanath
  24. Mahavir Swami

Jain Tirthankaras and their places of attainment of Nirvana

- Rishabhnath – Ashtapada
- Vasupujya – Champapuri
- Neminath Urjayant
- Mahavir – Pawapuri
- Arishtanemi – Gujarat (Girnar Hills)

Jain Tirthankaras and their symbols

- Rishabhdev – Bull
- Ajitnath – Elephant
- Sambhavnath – Horse

JAI HO STUDY

Made with Xodo PDF Reader and Editor

- Padmaprabha – Lotus
- Suparshvanath – Swastika
- Mallinath – Kalash
- Naminath – Neelkamal
- Neminath – Conch
- Parshvanath – snake
- Mahavir Swami - Singh

Ancient Indian dynasties and their rulers

- Nanda dynasty
  - Founder – Mahapadma or Ugrasena
  - Last ruler – Dhanananda
- Maurya dynasty
  - Founder – Chandragupta Maurya
  - Last ruler – Brihadratha
- Gupta Dynasty
  - Founder – Chandragupta I
  - Last ruler – Skandagupta
- Shunga dynasty
  - Founder – Pushyamitra Shunga
  - Last ruler – Devbhoomi
- Satavahana dynasty
  - Founder – Simuk
  - Last ruler – Yagya Shatakarni
- Chalukya dynasty (of Vatapi)
  - Founder – Pulakeshin I
  - Last ruler – Kirtivarman Chalukya

Books written by the emperor and their language

- Ratnavali - Harshvardhan - Sanskrit
- Priyadarshika - Harshvardhan - Sanskrit
- Nagananda - Harshvardhan - Sanskrit
- Amuktamalyada - Sri Krishna Devaraya - Telugu
- Tuzk-e-Jahangir - Jahangir - Persian
- Baburnama or Tuzk-e-Baabri - Babur - Chagatai

Important foreign travelers/envoys

- Megasthenes (302-298 BC): Ambassador of Seleucus Nicator
- Fa-Hien (405-411 AD): He came to India during the reign of Chandragupta II Vikramaditya.
- Hiuen-Tsang (630-645 AD) : He came to India during the reign of Harshvardhan.
- Itsing (671-695 AD) : A Chinese traveller
- Al-Masudi (957 AD) : An Arab traveller, Book- 'Muruj-ul-Zehab'
- Al-Biruni (1024-1030 AD) : Mahmud Ghaznavi, Book- Kitab ul Hind

Major philosophies and their founders

- Yoga - Patanjali
- Sankhya - Kapil
- Nyaya - Gautama
- Vaisheshika - Kanada
- Uttara Mimamsa - Badrayana
- Purva Mimamsa - Gemini

Vedic Ancient names of rivers of the period

- Kubha - Kabul
- Vitasta - Jhelum
- Paruni - Ravi
- Gomti - Gomal
- Sadanira - Gandak
- Satudri - Sutlej
- Vipasha - Vyas
- Askini - Chenab

Symbols of Buddhism related to Buddha's life

- Birth - Lotus
- Renunciation of home - Horse
- Enlightenment - Peepal (Bodhi tree)
- Nirvana - Footprint
- Death - Stupa
- First sermon - Chakra

important literary works

- Ramayana – Valmiki
- Mahabharata – Vedvyas
- Raghuvansh – Kalidas
- Ritusanhar- Kalidas
- Meghdoot – Kalidas
- Ravanabadha – Batsabhatti
- Poetry philosophy - Dandin
- Dashakumarcharita - Dandin
- Kiratarjuniyam – Bharavi
- Nitishatak – Bhartrihari

In which sources, what titles have been given to Emperor Ashoka, such as

- Ashoka: This name is first found in Maski miniature inscription, Gurjara, Nettur and Ashoka is also engraved in Udegolan minor inscriptions.
- Priyadarshi: In Bhabru (Bairat) inscription, Kandahar inscription and Dipvansh
- Devanampiya: In 12th and 13th inscriptions
- Devanampiya Priyadarshi: In Girnar, Rummindei and Nigliva inscriptions
- Ashok Vardhana: In Vishnupuran.

JAI HO STUDY

Made with Xodo PDF Reader and Editor

- Buddha Shakya: In Maski inscription, it is worth noting that 'Shakya Muni' is the title of Mahatma Buddha.
- Magadhadhiraj: In Bhabru inscription.

Discoverer of important inscriptions/pillars

- Kalsi inscription - Forest (1860 AD)
- Girnar inscription - Colonel Todd (1822 AD)
- Shahbazgarhi inscription - General Court (1836 AD)
- Mansehra inscription - General Cunningham Dhauli inscription - Kitto (1837 AD)
- Jaugarh inscription - Walter Elliot (1850 AD)

Kautilya's views regarding state and king

- Kautilya considered the state to be equivalent to the human body and mentioned its seven parts; as:-
    1) Swami (king) - head of the state body.
    2) Amatya (minister) - eyes of the state body.
    3) Nation - legs of the state body.
    4) Fort - arms of the state body.
    5) Treasury - mouth of the state body.
    6) Punishment- the brain of the state.
    7) Friends- the ears of the body of the state.
- Among the seven organs of the state, Kautilya has considered the king as the supreme and main organ of the state. He has supported the monarchical system.

Important inscriptions

- Hathigumpha inscription - Kalinga king Kharvel
- Junagadh (Girnar) inscription - Rudradaman
- Nasik inscription - Gautami Balashri
- Prayag pillar inscription - Samudragupta
- Aihole inscription - Pulakeshin - II
- Mandsaur inscription - Malwa king Yashovarman
- Gwalior inscription - Pratihara king Bhoj
- Bhitari and Junagadh inscription - Skandagupta
- Devpada inscription - Bengal ruler Vijaysen

- Buddhist Councils
- First Buddhist Council- Rajagriha (483 BC)
    - Ruler- (Haryanka dynasty) under the protection of Ajatashatru
    - President- Mahakashyapa
    - In this, Anand composed Suttapitaka which contains the teachings of Buddha.
- Second Buddhist Council- Vaishali (383 BC)
    - Ruler (Shishunag dynasty) Kalashoka
    - Chairman- Sabakaami
    - In this the Buddhist system got divided into Sthaviravidis and Mahasanghikas.
- Third Buddhist Council Pataliputra (250 BC)
    - Ruler (Maurya Dynasty) Ashoka
    - Chairman- Moggaliputta Tissa
    - Abhidhamma Pitaka was compiled in this council.
    - Buddhist preachers were sent to different countries
- Fourth Buddhist Council in Kashmir (72 AD)
    - Ruler - (Kushan dynasty) Kanishka
    - Presidents - Vasumitra and Ashwaghosh
    - In this Buddhism finally got divided into Hinayana and Mahayana

Mauryan period administration

- Samaharta - Collector of income
- Sannighata - Head of the state treasury
- Prashasta - Head of prison
- Nayak - Head of city defence
- Sitaadhyaksha - Guardian of state land
- Panyaadhyaksha - Head of commerce department

Vedic period administration

- Kulpati - Head of family Gramani - Head of village
- Spas - Spy/messenger Vrajpati - Officer of pastures Bhagudah - Revenue collector
- Jeevagriha Police Officer Akshavapa - Accountant
- Athapati - Chief Justice Sangrahitri - Treasurer Takshana - Carpenter
- Palagala - Messenger
- Govinkartana - Protector of forests and games

The eight Mahajanapadas in Uttar Pradesh and their capitals

2) Malla (Districts of Deoria, Basti, Gorakhpur and Siddharthnagar) Capital - Kushinara and Pawa
3) Kashi (Varanasi)
4) Kosala (Districts of Faizabad, Gonda, Bahraich) - Capital - Ayodhya and Shravasti
5) Vatsa (Districts of Allahabad and Mirzapur) - Capital - Kaushambi
6) Chedi (Bundelkhand region) - Capital - Shaktimati
7) Panchala (Ruhilkhand, Western UP) - Capital - Ahichatra and Kampilya
8) Shurasena (Brajmandal) - Capital - Mathura

JAI HO STUDY

Made with Xodo PDF Reader and Editor

9) Kuru - Meerut and South-East Haryana, Capital - Indraprastha

Administrative units of Gupta period in ascending order

- Country or Nation Bhukti
- Subject
- Beeth
- Peth
- Village

Neolithic Sites

- At Burzahom (Kashmir), evidence of pit dwellings and burial of dogs along with the master in the grave has been found.
- At Gufkral (Kashmir), bone tools, grey pottery, and grinding stones were discovered.
- At Mehrgarh (Balochistan, Pakistan), the earliest evidence of wheat, cultivation of two varieties of barley, and the earliest evidence of settled life were found.
- At Mahadaha (Uttar Pradesh), evidence of circular huts, cultivation of rice and barley, and cattle pens has been found.
- Koldihwa (Uttar Pradesh), located on the bank of the Belan river, south of Allahabad, shows ancient evidence of rice cultivation.
- At Sanganakallu (Karnataka), ash mounds have been discovered, while at Piklihal (Karnataka), ash heaps and dwelling sites were found.
- At Chopanimando (Uttar Pradesh), evidence of microliths and handmade pottery has been found.
- At Sakhataru (Assam), primitive axes and painted pottery were discovered.
- At Chirand (Bihar), bone tools were found.
- At Daojali (Assam), evidence of agriculture and animal husbandry was obtained.
- At Lahuradeva (Uttar Pradesh), the earliest evidence of rice (paddy) and agriculture has been found.

📜 Mottos and Their Sources

- Satyameva Jayate is taken from Mundaka Upanishad.
- Gayatri Mantra is from the third Mandala of the Rigveda.
- Tamaso Ma Jyotirgamaya is taken from Rigveda/Brihadaranyaka Upanishad.
- Yato Dharmah Tato Jayah and Dharmo Rakshati Rakshitah are from the Mahabharata.
- Yama–Nachiketa dialogue is in Kathopanishad.
- Sarve Bhavantu Sukhinah is from Brihadaranyaka.
- Vasudhaiva Kutumbakam is taken from Maha Upanishad.
- Janani Janmabhoomischa Swargadapi Gariyasi is from Ramayana.
- Vidya Dadati Vinayam and Karmanye Vadhikaraste Ma Phaleshu Kadachana are from the Gita.
- Satyam Shivam Sundaram is from Kathopanishad.
- Atithi Devo Bhava is from Taittiriya Brahmana.
- Tat Tvam Asi is from Chandogya Upanishad.
- Aham Brahmasmi is from Brihadaranyaka Upanishad.

🗓 Major Eras (Samvats)

- Vikram Samvat was started in 57 BCE by King Vikramaditya of Ujjain.

JAI HO STUDY

Made with Xodo PDF Reader and Editor

- Shaka Samvat began in 78 CE by Kushana ruler Kanishka after victory over the Shakas.
- Kalachuri Samvat was started in 248 CE by Abhira ruler Ishwarsena.
- Gupta Samvat began in 319 CE by Chandragupta I.
- Harsha Samvat began in 606 CE by Harshavardhana of Kannauj.
- Hijri Samvat started in 622 CE in memory of Prophet Muhammad's journey from Mecca to Medina.
- Kollam Samvat began in 825 CE by Shankaracharya in Malabar.
- Singh/Siddha Samvat began in 1113 CE by Chalukya Jayasimha Siddharaja.
- Lakshman Samvat was started in 1190 CE by Lakshman Sen of the Sena dynasty in Bengal.
- Ilahi Samvat was started in 1583 CE by Mughal emperor Akbar.
- Rajashaka was started in 1673 CE by Chhatrapati Shivaji Maharaj.

Facts Related to Coins

- The first gold coins were issued by Indo-Greek rulers.
- The first pure gold coins were issued by Kushana ruler Vima Kadphises.
- The maximum number of gold coins were issued by Chandragupta I.
- The maximum number of copper coins were issued by Kushana rulers.
- Lead and tin coins were circulated by Satavahana rulers.
- The Mauryan rulers issued the maximum number of coins.
- The practice of inscribing writing on coins was first started by the Yavana rulers.

Important Sites of Indus Valley Civilization

- Harappa, located on the left bank of the Ravi river in Montgomery district, Punjab (Pakistan), excavated by Daya Ram Sahni in 1921. Findings: large granary, cemetery R-37, broken torso in dancing pose, rectangular seal (plant emerging from a woman's womb).
- Mohenjo-daro, right bank of the Indus river in Larkana district (Pakistan), excavated by Rakhaldas Banerjee in 1922. Findings: Great Bath, large granary, bronze dancing girl, seal of yogi in lotus (three faces).
- Lothal, on the Moghva river near Ahmedabad (Gujarat), excavated by S.R. Rao in 1955. Findings: twin burial sites, dockyard, bead-making factories, ivory scale.
- Dholavira, in the Rann of Kutch (Gujarat), excavated by R.S. Bisht (1990–91) and J.P. Joshi (1967–68). Findings: advanced water management system (rock-cut reservoirs), inscription of 10 signs.
- Kalibangan, in Hanumangarh (Rajasthan), excavated by B.B. Lal and B.K. Thapar in 1961. Findings: mud-brick houses, ploughed fields, earthquake remains, wells in almost every house.

Other Indus Valley Sites and Findings

- Daimabad → figurines of man riding chariot, bull, rhinoceros; seal with Harappan script; pottery.
- Banawali → toy plough models, lapis lazuli & carnelian beads, seals, weights.
- Balakot → shell bangle fragments.
- Manda → bronze screw-pin.
- Nausharo → evidence of vermillion use in women's hair parting.

Made with Xodo PDF Reader and Editor

- Hulas → seal with Harappan script.
- Sutkagendor → clay bangle remains.

Mandals of Rigveda

- First Mandala – Madhuchhanda, Medhatithi, Gautama, etc.
- Second Mandala – Samada.
- Third Mandala – Vishwamitra; contains Gayatri Mantra.
- Fourth Mandala – Vamadeva; hymns on agriculture.
- Fifth Mandala – Atri.
- Sixth Mandala – Bharadvaja.
- Seventh Mandala – Vashistha; Battle of Ten Kings.
- Eighth Mandala – Kanva and Angirasa.
- Ninth Mandala – by sages; Soma Mandala.
- Tenth Mandala – Vimada, Indra, Shachi, others; Purusha Sukta (four varnas).
- Kings (Dasarajna).
  The eighth Mandala was composed by Kanva and Angirasa.
  The ninth Mandala was composed by sages and is called the Soma Mandala.
  The tenth Mandala was composed by Vimada, Indra, Shachi, and others, and contains the Purusha Sukta (describing the four varnas: Brahmin, Kshatriya, Vaishya, Shudra).
- Development of Vedic Literature
  Vedic literature developed in the following stages:
  Samhitas: Rigveda, Yajurveda, Samaveda, and Atharvaveda.
  Brahmanas: Commentaries on the Samhitas.
  Aranyakas: Appendices to the Brahmanas, composed in forests.
  Upanishads: Special parts of the Aranyakas, considered sources of Indian philosophy.
- Vedas and Upavedas
  Rigveda's Upaveda is Ayurveda; it is a collection of hymns.
  Yajurveda's Upaveda is Dhanurveda; it contains hymns related to sacrificial rituals.
  Samaveda's Upaveda is Gandharvaveda; it is a collection of songs.
  Atharvaveda's Upaveda is Shilpaveda; it contains charms, rituals, and remedies for diseases.
- Vedas, Branches, Brahmanas, Aranyakas, Upanishads, Special Facts
  Rigveda: Branches not mentioned. Brahmanas: Aitareya and Kaushitaki (Shankhayana). Aranyakas: Aitareya and Kaushitaki. Upanishads: Aitareya and Kaushitaki. In Aitareya Brahmana, Rajasuya sacrifice and the description of Satya Yuga, Treta, Dwapara, and Kali Yuga are found. Yajurveda: Branches are Krishna Yajurveda (Kathaka, Kapishthala, Maitrayani, Taittiriya) and Shukla Yajurveda (Kanva [Vajasaneyi Samhita], Madhyandina). Brahmanas: Taittiriya and Shatapatha. Aranyakas: Taittiriya, Maitrayani, and Brihadaranyaka. Upanishads: Taittiriya, Katha, Maitrayani, Shvetashvatara, Isha, Brihadaranyaka. "Tamaso Ma Jyotirgamaya" is from Brihadaranyaka Upanishad. Shatapatha Brahmana mentions Yajnavalkya–Maitreyi dialogue, flood story, story of Videgha Madhava, and Pururava–Urvashi legend. In Brihadaranyaka Upanishad, Yajnavalkya–Gargi dialogue is mentioned. Kathopanishad describes Yama–Nachiketa dialogue. Samaveda: Branches are Kauthuma, Ranayaniya, and Jaiminiya. Brahmanas: Panchavimsha (Tandya), Chandogya, Shadvimsha, and Jaiminiya. Aranyakas: Chandogya and Jaiminiya. Upanishads: Chandogya and Kena. Taittiriya Upanishad gives women the right to wear the sacred

JAIHO STUDY

Made with Xodo PDF Reader and Editor

thread. Chandogya Upanishad is the oldest Upanishad. Krishna is mentioned for the first time in this Upanishad. It contains the Satyakama Jabala story and the dialogue of Uddalaka Aruni and Shvetaketu. The three ashramas—Brahmacharya, Grihastha, and Vanaprastha—are mentioned in Chandogya Upanishad.
Atharvaveda: Branches are Shaunak and Paippalada. Brahmana: Gopatha. No Aranyaka. Upanishads: Mundaka, Mandukya, and Prashna. "Satyameva Jayate" is mentioned in Mundaka Upanishad. The shortest Upanishad is Mandukya.

- Rigvedic Deities
  Indra/Purandara was the leader of battles and god of rain.
  Agni was the mediator between gods and humans.
  Varuna was the creator of heaven, earth, and sun, god of oceans, controller of the world, nourisher of gods, regulator of seasons, symbol of truth, responsible for seasonal changes and day–night.
  Dyaus was the god of sky.
  Soma was the god of plants.
  Ashvins were removers of calamities.
  Pushan was the god of cattle.
  Usha was the goddess of progress and upliftment.
- System of Governance in Aitareya Brahmana
  In the east, the system was Samrajya, and the ruler was called Samrat.
  In the west, the system was Swarajya, and the ruler was called Swarat.
  In the north, the system was Vairajya, and the ruler was called Virat.
  In the south, the system was Bhojya, and the ruler was called Bhoj.
  In the Madhyadesha, the system was Rajya, and the ruler was called Raja.
- Major Sacrifices (Yajnas)
  Ashvamedha Yajna was the most important, performed by the king to expand the boundaries of his empire.
  Rajasuya Yajna was related to the coronation of the king.
  Vajapeya Yajna was related to display of valor and entertainment.
  Agnishtoma Yajna was performed to please the gods by offering animal sacrifice into fire.
- Mahavira Swami
  Birth: 599 BCE at Kundagrama/Kundalpur (Vaishali).
  Childhood name: Vardhaman.
  Father: Siddhartha (chief of the Jnatrika Kshatriya clan).
  Mother: Trishala/Videhadatta (sister of Chetaka, the chief of the Lichchhavi republic of Vaishali).
  Wife: Yashoda (daughter of Kundinya clan).
  Daughter: Anojja/Priyadarshana.
  Kevalya Jnana (Enlightenment): attained under a Sal tree on the banks of Rijupalika river near Jrimbhikagrama.
  New titles after enlightenment: Kevalin, Arhat, Jina, and Nirgrantha.
  First disciple: His son-in-law Jamali.
  Doctrine: Propounded the theory of Anekantavada/Syadvada.
  Death: 527 BCE at Pawapuri near Rajgir.
- Chaturyam Education
  Satya: Always speak the truth
  Ahimsa: Refrain from violence
  Asteya: Stealing forbidden
  Aparigraha: Non-possession of wealth
  The four great vows were propounded by Parshvanatha. The fifth vow, Brahmacharya, was added by Mahavira Swami.
- Three Jewels (Jainism)
  Samyak Darshan: True perception
  Samyak Jnana: Faith in truth
  Samyak Acharana: Equanimity towards worldly pleasures and sorrows
- Jain Philosophy
  Anekantavada: The doctrine of multiplicity
  Saptabhangi or Syadvada: The doctrine of relativity

Made with Xodo PDF Reader and Editor

Atheism: Denial of God
Belief in soul or rebirth: Acceptance of the soul
Jainism: The Infinite Fourfold

- Infinite Knowledge
- Infinite Perception
- Infinite Power
- Infinite Bliss
- Jain Councils
  First: 322 BCE/300 BCE, Pataliputra (Bihar), presided by Sthulabhadra. Compilation of 12 Angas. Jain sect split into Shvetambara and Digambara.
  Second: 513/526 CE, Vallabhi (Gujarat), presided by Devardhi Kshamashramana. Total 11 Angas codified.
- Mahavira Buddha (Light of Asia)
  Birth: 563 BCE at Lumbini (Nepal).
  Childhood name: Siddhartha (Gotra name – Gautama).
  Father: Shuddhodana (King of Kapilavastu, Shakya ruler).
  Mother: Mahamaya (Koliya republic).
  Raised by: His aunt Prajapati Gautami.
  Wife: Yashodhara (Bimba, Gopa, Bhadrakacha).
  Son: Rahul.
  Horse: Kanthaka (charioteer – Chhap).
  Great Renunciation: Left home at age 29.
  First Teacher: Alara Kalama (studied Samkhya philosophy at Vaishali).
  Learned Yoga: From Rudrakarama Putta at Rajgir.
  Enlightenment: At age 35, on the bank of river Niranjana at Gaya, under a Peepal tree.
  First Sermon (Dharmachakrapravartana): At Rishipattana (Sarnath), preached to five Brahmins.
  Most sermons: At Shravasti, capital of Kosala.
  Final sermon: To Subhadda at Kushinagar.
  Mahaparinirvana: At Kushinagar in 483 BCE, at the age of 80.
- Eightfold Path
  Right View: Understanding the true nature of things
  Right Intention: Thoughts free from greed, hatred, violence
  Right Speech: Avoidance of harsh words
  Right Action: Following righteous deeds
  Right Livelihood: Virtuous livelihood
  Right Effort: Physical/mental health
  Right Mindfulness: Pious thoughts
  Right Concentration: Meditation and focus
  The Eightfold Path is related to the Fourth Noble Truth "Dukha Nirodhagamini Pratipada," also known as the Middle Path. It has eight steps, hence called Ashtangika Marg.
- Tripitaka (in Pali language)
  Vinayapitaka: Rules related to the Sangha (composed by Upali)
  Suttapitaka: Collection of Buddha's sermons (compiled by Ananda)
  Abhidhamma Pitaka: Philosophical doctrines (compiled by Moggaliputta Tissa)
- Buddhist Councils
  First Council: 483 BCE at Rajgir. President: Mahakassapa. Patron: Ajatashatru. Teachings of Buddha compiled into Sutta Pitaka and Vinaya Pitaka.
  Second Council: 383 BCE at Vaishali. President: Sabakami. Patron: Kalashoka. Due to differences, the Sangha divided into Sthaviras and Mahasanghikas.
  Third Council: 250 BCE at Pataliputra. President: Moggaliputta Tissa. Patron: Ashoka. Abhidhamma Pitaka was compiled.
  Fourth Council: 1st century CE at Kundalavana (Kashmir). President: Vasumitra, Vice President: Ashvaghosha. Patron: Kanishka. Division into Hinayana (Sthaviravada) and Mahayana (Mahasanghika).

Made with Xodo PDF Reader and Editor

- **Buddhist Philosophy**
  Atheism: No belief in divine power
  Momentariness: Nothing in the world is permanent
  Anatma: Emphasis on self-consciousness
  Shunyavada: All worldly objects are devoid of ultimate reality
  Buddhism believes in rebirth
- **Sixteen Mahajanapadas**
  Anga – Champa
  Ashmaka – Paithan or Potana
  Avanti – Ujjayini (north), Mahishmati (south)
  Gandhara – Taxila or Pushkalavati
  Kamboja – Hataka or Rajapura
  Magadha – Girivraja or Rajagriha
  Matsya – Viratanagara
  Vajji – Vaishali
  Chedi – Shuktimati or Sotthivatinagara
  Kashi – Varanasi
  Kosala – Shravasti
  Kuru – Indraprastha
  Malla – Kushinara and Pava
  Panchala – Ahichhatra (north Panchala), Kampilya (south Panchala)
  Shurasena – Mathura
  Vatsa – Kaushambi
- **Maurya and Post-Maurya Period**
  Founder of Maurya dynasty: Chandragupta Maurya. Last ruler: Brihadratha.
  Chandragupta Maurya became a disciple of Jain monk Bhadrabahu and died at Shravanabelagola in 298 BCE through Sallekhana.
  In 305 BCE, war was fought between Seleucus, ruler of the eastern part of Alexander's empire, and Chandragupta Maurya.
  Seleucus sent Megasthenes to Chandragupta's court.
  Megasthenes wrote the book *Indica* (original not available).
  According to Megasthenes, Indian society had seven classes: Philosophers, Farmers, Pastoralists, Artisans, Warriors, Supervisors, and Councillors.
  Chandragupta Maurya's Prime Minister and Chief Priest was Kautilya (Vishnugupta or Chanakya), who authored *Arthashastra*.
  In *Arthashastra*, the "Saptanga Theory" of the state is described:
  King: Head
  Friend: Ear
  Amatya (Minister): Eyes
  Danda (Army): Forehead
  Janapada (Territory): Thighs

  Durg (Fort): Arms
- **Bindusara demanded three items from Antiochus of Syria: sweet wine, dried figs, and a philosopher.**
- **Ashoka (273–232 BCE)**
  Mother: Subhadrangi
  Father: Bindusara
  Title: Devanampiyadasi
  Coronation: 269 BCE (four years after ascending the throne)
  Language of inscriptions: Prakrit
  Scripts: Brahmi, Kharosthi, Aramaic, Greek
  Name "Ashoka" mentioned in Maski, Gujarra, Nettur, and Udayagolam inscriptions
- **Fourteen Major Rock Edicts**
  Prohibition of animal slaughter.
  Medical facilities for humans and animals in Chola, Pandya, Satiyaputra, Keralaputra, Tamraparni, Yavana kingdoms, Antiyoka, and their neighbors.
  Appointment of three officials: Yukta, Rajjuka, Pradeshika.
  Beating of war drums replaced by "drum of Dhamma."
  In 13th year of coronation, appointment of Dhamma Mahamatras.
  Reporters instructed to inform about people's condition.
  All sects to live everywhere.
  Beginning of Dhamma tours.
  Declaring Dhamma as the best welfare.
  Emphasis on superiority of Dhamma policy.

Made with Xodo PDF Reader and Editor

Mention of Dhamma charity.
Emphasis on religious tolerance.
Description of Kalinga conquest (261 BCE).
Mentions five Greek kings, Chola, Pandya, Satiyaputra, Keralaputra, and Tamraparni.

- Sites of Major Rock Edicts
  Girnar (Junagadh, Gujarat)
  Shahbazgarhi (Peshawar, Pakistan)
  Dhauli (Puri, Odisha)
  Jaugada (Ganjam, Odisha)
  Kalsi (Dehradun, Uttarakhand)
  Sopara (Thane, Maharashtra)
  Mansehra (Hazara, Pakistan)
  Erragudi (Kurnool, Andhra Pradesh)
  Sannati (Gulbarga, Karnataka)
- Five Greek Kings Mentioned in the 13th Rock Edict
  King of Egypt: Ptolemy Philadelphus II (Turamaya)
  King of Epirus: Alexander (Alikasudara)
  King of Syria: Antiochus II (Antiyoka)
  King of Macedonia: Antigonus Gonatas (Antikina)
  King of Syria: Antigonus II (Antiyoka)
- Mauryan Administrative Units
  Empire
  Province (controlled by Uparaja)
  Mandala (by Pradeshika)
  Ahara or Vishaya (by Vishayapati)
  Dronamukha (group of 800 villages)
  Kharvatika (group of 200 villages)
  Sangrahana (group of 10 villages)
  Gram (smallest unit)
- Important Officials
  Akaradhyaksha: Head of mining department
  Lakshanadhyaksha: Head of mint
  Sitadhyaksha: Head of agriculture department
  Vivitaadhyaksha: Head of pastures and cattle protection
  Pautavadhyaksha: Head of weights and measures
  Sunadhyaksha: Head of slaughterhouses
  Panyadhyaksha: Head of commerce department
- Each department head in central administration was known as *Tirtha*, total 18 in number.
- Sangams
  Three Sangams were organized under the patronage of Pandya rulers.
  First Sangam at Madurai, presided by Sage Agastya, with 549 members. Compiled works: Akattiyam, Mudunarru, Paripadal, Mudukuruku.
  Second Sangam at Kapadapuram, presided by Sage Agastya, with 59 members.
  Literature compiled: Tolkappiyam by Tolkappiyar (disciple of Agastya).
  Third Sangam at Madurai, presided by Nakkirar, with 49 members. Works compiled: Neduthokai, Kurunthokai, Enkuruttir, Paripadal.
- Sangam Literature and Authors
  Tirukkural (Kural) – by Tiruvalluvar
  Ahanar – by Rudrasharma
  Tolkappiyam – by Tolkappiyar
  Jivaka Chintamani – by Tiruttakkadeva
  Silappadikaram – by Ilango Adigal
  Manimekalai – by Sitalai Sattanar
  Maruguppaday – by Nakkirar
- Post-Mauryan Foreign Invaders
  Indo-Greek most famous ruler: Menander (Milinda), capital Sakala (modern Sialkot). Original homeland: Bactria, Afghanistan.
  Shakas/Scythians most famous ruler: Nahapana (Western India), mentioned in Satavahana inscriptions. Homeland: Scythia, Iran.
  Parthians most famous ruler: Gondophernes, coin evidence from Begram, Afghanistan. Homeland: Parthia, Iran.
  Kushans/Yuezhi most famous rulers: Rudradaman and Kanishka. Rudradaman's capital: Ujjayini (modern Ujjain). Kanishka's capital: Purushpur (modern Peshawar). Homeland: Chinese Turkistan.

- **Post-Mauryan Titles of Kings**
  Pushyamitra Shunga: Senani (commander), Auddij (sudden riser). Called *Ashvamedha Yajin* (performer of two Ashvamedha sacrifices) in Harivamsa Purana and Ayodhya inscription.
  Kharavela: Titles of Rajarshi, Lemaraja, Vriddharaja, Bhiksuraja, Dharmaraja, Mahavijayaraja.
  Shatakarni I: Titles of Lord of Dakshinapatha, Controller of unstoppable wheel, Lord of the West, Lord of Pratishthana.
  Gautamiputra Shatakarni: Called "the sole Brahmana," "refuge of the Vedas."
- **Gupta Dynasty (275–550 CE)**
  Founder: Shri Gupta
  Rulers: Ghatotkacha, Chandragupta I (wife: Kumaradevi), Ramagupta, Chandragupta II (Devashri and Narendra Nath), Kumaragupta I (Ananta Devi), Skandagupta, Purugupta, Kumaragupta II, Budhagupta, Vishnugupta.
- **Chandragupta I (319–335 CE)**
  First Gupta ruler to issue gold coins.
  Started Gupta Era (319 CE).
- **Samudragupta (335–375 CE)**
  His conquests are mentioned in Harisena's Prayag Prashasti.
  Issued Ashvamedha gold coins.
  Title: Napoleon of India (by Vincent Smith).
- **Chandragupta II (375–415 CE)**
  Adopted the title Vikramaditya.
  Mehrauli Iron Pillar is associated with him.
  First Gupta ruler to issue silver coins.
  Chinese traveler Fa-Hien visited during his reign.
  Navratnas of Chandragupta II's court:
  Kshapanaka (astrologer)
  Shanku (architect)
  Vetala Bhatta (magician)
  Ghattakarpara (diplomat)
  Varahamihira (astronomer)
  Dhanvantari (physician)
  Kalidasa (poet and dramatist)
  Amarsimha (lexicographer)
  Vararuchi (grammarian)
- **Gupta Literature**
  Kalidasa: Kumarasambhavam, Raghuvansham, Malavikagnimitram, Abhijnanashakuntalam, Vikramorvashiyam
  Vishakhadatta: Mudrarakshasa, Devichandraguptam
  Varahamihira: Brihatsamhita, Panchasiddhantika
  Brahmagupta: Brahmasiddhanta
  Aryabhata: Aryabhatiyam, Suryasiddhanta
  Siddhasena: Nyayavatar
  Vishnu Sharma: Panchatantra
  Kamandaka: Nitisara
  Shudraka: Mrichchhakatika
  Asanga: Yogachara
  Dandin: Kavyadarshan, Dashakumaracharita
  Bhasa: Swapnavasavadatta, Charudatta
  Bharavi: Kiratarjuniya
  Bhatti: Ravana Vadha
  Amarsimha: Amarakosha
  Buddhaghosa: Visuddhimagga
  Vatsyayana: Kamasutra
  Charaka: Charaka Samhita
- **Gupta Architecture**
  Important temples:
  Vishnu temple of Eran (Sagar, Madhya Pradesh)
  Shiva temple of Bhummara (Satna, Madhya Pradesh)
  Lakshman temple of Sirpur (Raipur, Chhattisgarh)
  Vishnu temple of Tigawa (Jabalpur, Madhya Pradesh)
  Parvati temple of Nachna-Kuthar (Panna, Madhya Pradesh)
  Krishna temple of Bhitargaon (Kanpur, Uttar Pradesh)
  Vishnu temple of Pipariya (Satna, Madhya Pradesh)
  Dashavatara temple of Deogarh (Lalitpur, Uttar Pradesh)

- **Chinese Travelers to India**
  Fa-Hien (399–414 CE): Came during Chandragupta II Vikramaditya. First Chinese Buddhist monk to visit India.
  Hiuen Tsang (636–645 CE): Came during Harshavardhana. Stayed at Bhaskaravarman and Harsha's court. His account: *Si-Yu-Ki*.
  I-Tsing (671–695 CE): Came to India via sea.
  Matvajin: Mentioned cultural contacts of Chalukyas with China.
  Ma Huan (1451 CE): Came during medieval India.
- **Vardhana Dynasty**
  Founder: Pushyabhuti.
  Notable rulers: Naravardhana, Rajyavardhana I, Adityavardhana, Prabhakaravardhana, Rajyavardhana II, Harshavardhana.
  Harshavardhana (606–647 CE):
  Father: Prabhakaravardhana
  Mother: Yashomati
  Alias: Shiladitya
  Title: Sakalottarapathanatha
  Works: Priyadarshika, Ratnavali, Nagananda
  Capital: Kannauj or Mahodayashri (earlier Thanesar)
  According to Aihole inscription, Pulakeshin II defeated Harsha.
- **Pallava Dynasty**
  Founder: Simhavishnu (some historians consider Bappadeva).
  Capital: Kanchi.
  Last ruler: Aparajita Varman.
  Notable Pallava rulers:
  Simhavishnu – patron of Bharavi (author of Kiratarjuniya).
  Mahendravarman I – started monolithic temple construction, wrote Sanskrit drama *Matavilasa Prahasana*.
  Narasimhavarman I – in 642 CE, conquered Chalukya capital Badami. Titles: Vatapikonda, Mahamalla. Started rock-cut ratha temples at Mahabalipuram (Mamallapuram).
  Narasimhavarman II – introduced "Lion style" architecture. Built Kailashnath temple at Kanchi and Shore temple at Mahabalipuram. Dandin (author of Dashakumaracharita) was in his court.
- **Chola Dynasty**
  Founder: Vijayalaya.
  Last ruler: Rajendra III.
  Capital: Thanjavur (later Gangaikondacholapuram).
  Notable Chola rulers:
  Parantaka I – completely destroyed Pallavas, assumed title *Madurai Konda*. Defeated in the Battle of Takkolam (949 CE) by Rashtrakuta Krishna III.

Skandagupta–Huns War (466 CE): Skandagupta victorious.
Battle of Narmada (630 CE): Between Harsha and Pulakeshin II, Pulakeshin victorious.
Wars of Suramar, Parisal, and Manimangalai (641–642 CE): Narasimhavarman I vs Pulakeshin II, Narasimhavarman victorious.
Sindh War (712 CE): Between Dahir Sen and Muhammad bin Qasim, Qasim victorious.
Battle of Venuka: Cholas vs Cheras, Pandyas, and 11 rulers, Cholas victorious.
Battle of Takkolam (949 CE): Between Parantaka Chola and Rashtrakuta–Western Ganga alliance, Cholas victorious.
Battle of Bellur (955 CE): Parantaka Chola vs Pandyas and Sri Lanka, Cholas victorious.
Battle of Tilakid: Between Ganga and Vengi Chalukya Vishnuvardhana, Vishnuvardhana victorious.
Battle of Koppam (1052 CE): Chola (Rajadhiraja) vs Chalukya (Someshvara), Cholas victorious.

- Philosophical Schools and Founders
  Samkhya – Kapila Muni
  Yoga – Patanjali
  Nyaya – Rishi Gautama
  Vaisheshika – Kanada or Uluka
  Purva Mimamsa – Jaimini
  Uttara Mimamsa – Badarayana
  Charvaka – Charvaka Rishi
  Advaita Vedanta – Adi Shankaracharya
  Dvaita – Madhvacharya
  Dvaitadvaita – Nimbarkacharya
  Vishishtadvaita – Ramanujacharya
  Shuddhadvaita – Vallabhacharya
- Major Sun Temples
  Martand Temple (Kashmir) built by Lalitaditya Muktapida
  Thanjavur Sun Temple (Tamil Nadu), the only Sun temple in South India
  Modhera Sun Temple (Gujarat) built by Bhimdev I, with India's largest Sun tank
  Konark Sun Temple (Odisha) built by Ganga ruler Narasimhadeva I (1238–1264 CE), known as Black Pagoda
- Buddhist Texts and Authors
  Milindapanho – Nagasena
  Buddhacharita, Saundarananda, Shariputra Prakarana – Ashvaghosha
  Madhyamikakarika – Nagarjuna
  Visuddhimagga – Buddhaghosa
  Abhidharmakosha – Vasubandhu
- Jain Texts and Authors
  Kalpasutra – Bhadrabahu
  Syadvadamanjari – Mallisena
  Nyayavatar – Siddhasena Divakara
  Nyaya Dipika – Dharmabhushan
  Panchavimshatika – Padmanandi
- Sangam Age Major Cities
  Uraiyur – Capital of Cholas, major center for cotton textiles
  Puhar – Port city, Chola's maritime capital
  Madurai – Capital of Pandyas
  Vanchi or Karur – Capital of Cheras
  Korkai – Coastal capital of Pandyas
  Muziris – Famous Chera port

Medival Indian history

Some important works of Akbar

- 1562 - End of slavery
- 1562 - Akbar's liberation from 'Haramdal'
- 1563 - Pilgrimage tax abolished
- 1564 - Jaziya tax abolished
- 1571 - Establishment of Fatehpur Sikri and transfer of capital from Agra to Fatehpur
- 1575 - Establishment of Ibadat Khana
- 1579 - Declaration of Mahzar
- 1580 - 'Dahsala system (by Todarmal) implemented. • 1582 - Declaration of Din-e-Ilahi

Successive Mughal Rulers

- Bahadur Shah - 1207-1712 (Shah-e-Bekhabar)
- Jahandar Shah - 1712-1713 (Lustful Fool)
- Farrukhsiyar - 1713-1719 (Disgusting Coward)
- Muhammad Shah - 1719-1748 (Rangila)
- Ahmed Shah - 1748-1754
- Alamgir-II - 1754-1759 AD
- Shah Alam-II 1759-1806 AD
- Akbar-II - 1806-1837 AD
- Bahadur Shah Zafar - 1837-1857 AD

Rulers of Sayyid dynasty

- Khizr Khan (1414-1421 AD) 'Rayat-e-Aala'
- Mubarak Shah (1421-1434 AD)
- Muhammad Shah (1434-1445 AD)
- Alauddin Alam Shah (1445-1451 AD)

Very important books of medieval history and their authors

- Taj-ul-Masir - Hasan Nizami
- Tabaqat-e-Nasiri - Minhajuddin Siraj
- Fawad-ul-Fawad - Amir Hasan Dehlvi
- Tarikh-e-Firozshahi - Ziauddin Barani
- Futuhat-e-Firozshahi - Firoz Shah Tughlaq
- Futuh-us-Salatin - Abdul Malik Isami

Amir Khusro Works of

- Kiran-us-Saden - It describes the meeting of Bughra Khan and his son Kaiqubad Miftah-ul-Fatah - Description of military campaigns of Jalaluddin Khilji etc.
- Khazain-ul-Futuh - Description of the rule of Alauddin Khilji
- Nuh-Sipehr - Flattering description of Mubarak Khilji
- Ashika - Description of the love story of Deval Rani, daughter of Rajkaran of Gujarat and Khijar Khan, son of Alauddin
- Tughlaqnama - Description of the victory of Ghiyasuddin Tughlaq and description of his conflict with Khusro Shah

Invasions / Rulers of Alauddin Khilji

- First attack on Devagiri (1296) - Ramchandra
- Gujarat (1299) - Raikarna
- Ranthambore (1301) - Hammir Dev
- Chittor (1303) - Ratan Sen
- Malwa (1305) - Mahalak Dev
- Deva Giri (1308) - Ramchandra
- Warangal (1310) - Rudra Dev
- Dwarasamudra (1311) - Hoysala dynasty

Wars during Aurangzeb's reign

- Defeat of Shuja near Benares (February 1658)
- Battle of Dharmat (April 1658)
- Battle of Samugarh (May 1658)
- Battle of Khajwa (January 1659)
- Battle of Deorai (April 1659)

Major Sufi orders in India and their founders in India

- Sufi orders - Founder
- Chishti - Khwaja Muinuddin Chishti
- Suhrawardi - Bahauddin Zakaria
- Qadiri - Sayyed Makhdoom Muhammad Jilani
- Shattari - Shah Abdullah Shattari
- Firdausi - Sheikh Badruddin Samarqandi
- Naqshbandi - Baqi Billah

Events of Babur's period

- First Battle of Panipat (21 April, 1526)
- Battle of Khanwa (16 March 1527)
- Battle of Chanderi (29 January 1528 AD)
- Battle of Ghaghra (06 May 1529 AD)
- Death of Babur (26 December 1530 AD)

Dynasties of Delhi Sultanate

- Slave Dynasty-Slave/Mamluk Dynasty (1206-1290 AD)
- Khilji Dynasty (1290-1320 AD)
- Tughlaq Dynasty (1320-1414 AD)
- Sayyid Dynasty (1414-1451 AD)
- Lodi Dynasty (1451-1526 AD)

JAI HO STUDY

Major projects started by Muhammad bin Tughlaq

- Change of capital (1326-27 AD)
- Circulation of token currency (1330 AD)
- Khurasan Campaign (1332 AD)
- Karachil Campaign (1337 AD)
- Increase in tax in Doab (1325 AD)

Foreign citizens who came during Shah Jahan's period

- Peter Mundi (Italian traveller) 1630-1634 AD
- Francis Vernier (French physician) 1656-1717 AD
- Nicolao Manucci (Italian traveller), 1653-1708 AD
- He was a gunner in Dara Shikoh's army, later became a physician
- Jean Baptiste Tavernier (French traveller) 1638-1663 AD, he travelled to India 6 times, he was a jeweller by profession.

Departments and Sultans related to them

- Diwan-e-Arz - Balban (Military Department)
- Diwan-e-Mustakhraz - Alauddin Khilji (Finance Department)
- Diwan-e-Riyasat - Alauddin Khilji (Market Control Department)
- Diwan-e-Amirkohi - Muhammad bin Tughlaq (Department of Agriculture)
- Diwan-e-Bandagan - Firoz Shah Tughlaq (Department of Slaves)
- Diwan-e-Khairat - Firoz Shah Tughlaq (Department of Charity)
- Diwan-e-Isthaaq - Firoz Shah Tughlaq (Department of Pensions)

Ministers and related departments

- Khazin - Treasurer
- Arif-e-Mumalik - Head of Military Department
- Barid-e-Mumalik - Head of Intelligence Department
- Diwan-e-Bandagan - Slave Department
- Vakil-e-Dar - Looking after personal services of Sultan
- Qazi-ul-Qazat - Highest official of justice
- Mushrif-e-Mumalik - Account of income and expenditure received from departments

Revenue (Tax) System

- Ushr - Land tax levied on Muslims
- Kharaj - Land tax levied on non-Muslims
- Zakat - Religious tax on Muslims (40th part of property)
- Jaziya - Religious tax on non-Muslims

Order of administrative units of Vijayanagara Empire (descending)

- Province (Mandal)
- Kottam or Balnadu (district)
- Nadu
- Melgram (group of 50 villages)
- Urgram

Bahmani kingdoms and their dynasties

- Bijapur - Adilshahi
- Ahmednagar - Nizam Shahi
- Berar - Imadshahi
- Golconda - Qutub Shahi
- Bidar - Baridshahi

Eight Giants of Krishnadev Rai

- Allasani Pedanna
- Nandi Timman
- Bhattamurthy
- Madayyagari Mallan Mudupalkaku
- Acchalraju Ramachandra
- Pingalisuranna
- Dhurjati / Dhurjati
- Tenali Ram Krishna

Most ruling dynasties during the Sultanate period

- Tughlaq dynasty – 94 years
- Slave Dynasty – 84 years
- Lodi dynasty – 76 years
- Sayyid dynasty - 36 years
- Khilji dynasty - 30 years

Major wars of the medieval period

- Battle of Ghagra - 1529 AD
- Battle of Chausa - 1539 AD
- Battle of Kannauj - 1540 AD
- Second Battle of Panipat - 1556 AD
- Battle of Talikota - 1565 AD
- Battle of Haldighati - 1576 AD

Important Foreign Travellers/Ambassadors

- Megasthenes (302-298 BC) : Ambassador of Seleucus Nicator

JAI HO STUDY

Delhi Sultanate (1200 -1526)

- Slave Dynasty (1206-1290)
  - Qutubuddin Aibak
  - Aram Shah
  - Iltutmish
  - Razia Sultan
  - Bahramshah
  - Balban
  - Kummers

- Khilji dynasty (1290- 1320)
  - Jalaluddin Khilji
  - Alauddin Khilji
  - Shihabuddin Omar
  - Qutubuddin Mubarak
  - Naseeruddin Khusro

- Tughlaq dynasty (1320-1412)
  - Ghiyasuddin Tughlaq
  - Muhammad Tughlaq
  - Firoz Tughlaq
  - Ghiyasuddin Tughlaq
  - Muhammad Shah III
  - Two independent rulers-
    - Naseeruddin Mahmood (Delhi)
    - Nusrat Shah (Firozabad)

- Sayyid dynasty (1414-1451)
  - Khizr Khan
  - Mubarak Shah
  - Muhammad Shah
  - Alauddin Shah

- Lodi dynasty (1451-1526)
  - Bahlol Lodi
  - Sikandar Lodi
  - Ibrahim Lodi

North India (800–1200 CE) – Tripartite Struggle

- Participants: Gurjara-Pratihara, Rashtrakuta, and Pala
- Cause: To establish supremacy over Kannauj
- Duration: About 100 years
- Final Victory: Gurjara-Pratiharas

Gurjara-Pratihara Dynasty

- Founder: Nagabhata I (730 CE)

JAI HO STUDY

Made with Xodo PDF Reader and Editor

- Capital: Bhinmal
- Beginning of Tripartite Struggle: During Vatsaraja's time
- Ruler during Mahmud Ghaznavi's invasion: Rajyapala

Rashtrakuta Dynasty

- Founder: Dantidurga (752 CE)
- Capital: Manyakheta
- Construction of Kailasa Temple at Ellora: Krishna I
- Last Ruler: Karka II

Pala Dynasty

- Founder: Gopala (750 CE)
- Establishment of Vikramashila University: Dharmapala
- Last Ruler: Govindapala

Muslim Invaders in India

Muhammad bin Qasim

- First Muslim ruler to invade India in 712 CE

Mahmud of Ghazni

- Son of Ghazni ruler Subuktigin
- Invaded India: 17 times (between 1000 CE and 1027 CE)
- Reign: 998–1030 CE
- Attack on Somnath Temple: 1026 CE
- Court Scholars (Books):
  - Al-Biruni (*Kitab-ul-Hind*)
  - Utbi (*Kitab-ul-Yamini*)
  - Firdausi (*Shahnama*)
  - Baihaqi (*Tarikh-e-Subuktigin*)

Muhammad Ghori

- Ruler of Ghor province
- First Invasion: 1175 CE (on Multan)
- Gujarat Invasion: Defeated by Bhim II (Mularaja II) in 1178 CE
- Major Battles:
  - First Battle of Tarain (1191 CE): with Prithviraj Chauhan (Chauhan victorious)
  - Second Battle of Tarain (1192 CE): with Prithviraj Chauhan (Ghori victorious)
  - Battle of Chandawar (1194 CE): with Jayachandra (Ghori victorious)

Delhi Sultanate

Slave Dynasty

Qutbuddin Aibak

- Established the Slave Dynasty in 1206 CE
- Known as "Lakhbaksh" and "Quran Khan"
- Death: 1210 CE
- Constructions:
  - Quwwat-ul-Islam Mosque (Delhi)

Division of Bahmani State into Five Independent States

State	Year of Establishment	Founder	Dynasty
Bijapur	1489	Yusuf Adilshah	Adil Shahi
Golconda	1518	Qutb Shah	Qutb Shahi
Ahmadnagar	1490	Malik Ahmad	Nizam Shahi
Bidar	1527	Amir Ali Barid	Barid Shahi
Berar	1490	Fateh Ullah	Imad Shahi

Adil Shahi Rulers

- Ibrahim Adil Shah II was called “Abla Baba” for helping the poor and “Jagat Guru” for patronizing scholars

JAI HO STUDY

Made with Xodo PDF Reader and Editor

- He composed a Hindi song collection *Kitab-e-Nauras*
- Historian Ferishta wrote *Tarikh-e-Ferishta* under his patronage
- Muhammad Adil Shah built *Gol Gumbaz* at Bijapur

Bhakti Movement

- In South India, Alvar and Nayanar saints spread Bhakti; Alvars were devotees of Vishnu, Nayanars of Shiva
- In Maharashtra, Vaishnav Bhakti tradition existed
- Vaishnav Bhakti divided into Varkari and Dharakari sects
- Varkari sect worshipped Vitthal or Vithoba (form of Krishna)
- Dharakari sect worshipped Rama

Saint	Philosophy
Shankaracharya	Advaita
Ramanujacharya	Vishishtadvaita
Madhvacharya	Dvaita
Nimbakacharya	Dvaitadvaita
Vallabhacharya	Shuddhadvaita

Sufi Movement

- Sufi Orders:
  - Ba-shara (followed Islamic law): Chishti, Suhrawardi, Firdawsi, Qadiri, Naqshbandi
  - Be-shara (not bound by Islamic laws): Qalandar, Firdawsi

Major Sufi Orders in India

Sufi Order	Founder in India
Chishti	Sheikh Moinuddin Chishti
Suhrawardi	Sheikh Bahauddin Zakariya (main: Shihabuddin Suhrawardi)
Qadiri	Abdul Qadir Jilani
Naqshbandi	Khwaja Baki Billah (main: Khwaja Bahauddin Naqshband)
Firdawsi	Sheikh Jalaluddin Surkh
Satari	Ab

Maratha Empire

Shivaji

- Birth: April 1627; Shivner Fort
- Parents: Jijabai, Shahji Bhonsle
- Mentor: Dadaji Kondadev
- Spiritual Guru: Samarth Ramdas
- In 1659 CE killed Afzal Khan (Abdullah Bhanari)
- In 1663 CE defeated Shaista Khan
- In 1664 CE first sack of Surat
- In 1665 CE Treaty of Purandar
- In 1666 CE successfully escaped Aurangzeb's captivity in Agra
- In 1670 CE second sack of Surat
- Sons: Shambhaji (Coronation: June 1674 and September 1674) and Rajaram
- Death: 12 April 1680

Shivaji's Ashtapradhan (Council of Eight Ministers)

1. Peshwa – Prime Minister
2. Amatya (Majumua-dar) – Finance Minister
3. Mantri (Waqia-navis) – Daily Proceedings
4. Sachiv – Head of Correspondence

JAI HO STUDY

Made with Xodo PDF Reader and Editor

5. Sumant (Dabir) – Foreign Minister
6. Senapati (Sar-i-Naubat) – Military Minister
7. Panditrao – Chief of Religious Affairs
8. Nyayadhish – Chief Justice

Successors of Shivaji

- Shambhaji (1680–1689 CE)
- Rajaram (1689–1700 CE)
- Tarabai (1700–1707 CE)
- Shahuji (1707–1749 CE)
- Rajaram II (1749–1777 CE)

Influence areas of Maratha Sardars

- Gwalior: Scindia
- Poona: Peshwa
- Indore: Holkar
- Nagpur: Bhonsle
- Baroda: Gaekwad

Anglo-Maratha Wars

- First (1775–1782 CE)
- Second (1803–1805 CE)
- Third (1817–1818 CE)

Important Treaties

- Treaty of Purandar (1665 CE): Mughal General Jai Singh and Shivaji
- Treaty of Sangola (1750 CE): Balaji Bajirao and Rajaram II
- Treaty of Surat (1775 CE): Raghunath Rao and East India Company
- Second Treaty of Purandar (1776 CE): Peshwa Madhavrao Narayan and the English
- Treaty of Baragaon (1779 CE): Peshwa Madhavrao Narayan and the English
- Treaty of Salbai (1782 CE): Peshwa Madhavrao Narayan and the English
- Treaty of Bassein (1802 CE): Bajirao II and the English
- Treaty of Deogaon (17 December 1803 CE): Raghuji Bhonsle II and the English
- Treaty of Surji Arjungaon (30 December 1803 CE): Scindia and the English
- Treaty of Rajapur Ghat (1805 CE): Holkar and the English
- Treaty of Poona (June 1817 CE): Bajirao II and the English
- Treaty of Gwalior (November 1817 CE): Daulatrao and the English
- Treaty of Mandsaur (January 1818 CE): Malharrao Holkar and the English

Modern Indian History

Major sequence of events in modern India -

- Pakistan Day – 23 March 1940
- Cripps Mission – March 1942
- Quit India Movement – 8 August 1942
- Azad Hind Fauj – September 1942
- C. Rajagopalachari Formula – March 1944
- Wavell Plan – 14 June 1945
- Shimla Conference – 25 June to 14 July 1945
- Azad Hind Fauj Trial – November 1945
- Naval Mutiny – 18 to 23 February 1946
- Arrival of Cabinet Mission – 24 March 1946
- Direct Action Day – 16 August 1946
- Formation of Interim Government – 2 September1946
- Attlee's Announcement – 20 February 1947
- Mountbatten Plan – 3 June 1947

- Treaties
  - Treaty of Asur Ali 1639 - This treaty established the boundary between the Mughal Empire and the Ahom Kingdom and ended Mughal attempts to conquer the Ahoms.
  - Treaty of Purandar 1665 - This treaty was signed between Rajput ruler and Mughal Empire commander Jai Singh I and Maratha Chhatrapati Shivaji Maharaj. Shivaji was forced to sign the agreement after Jai Singh laid siege to the Purandar fort.
  - Treaty of Alinagar 1757 - This treaty was signed between Siraj-ud-Dawa and Robert Clive. This allowed the British to fortify Calcutta and allowed British goods to pass through Bengal without tax.
  - Treaty of Allahabad 1765 - This treaty was signed between Robert Clive and Mughal emperor Shah Alam II. This gave the British the right to collect taxes on behalf of the Mughal emperor from Bengal, Bihar and Orissa.
  - Treaty of Madras 1769- This treaty was signed between the British and Hyder Ali of Mysore to end the First Mysore War. Under the treaty, both parties agreed to return the conquered territories and support each other in case of a third party invasion.
  - Treaty of Purandar 1776- This treaty was signed between the British and the Marathas to end the first phase of the First Anglo-Maratha War.
  - Treaty of Wadgaon 1779- This treaty was signed between the British and the Marathas to end the second phase of the First Anglo-Maratha War.
  - Treaty of Salbai 1782- This treaty was signed between the British and the Marathas to end the First Anglo-Maratha War.
  - Treaty of Seringapatam 1792- This treaty was signed between the British (Lord Cornwallis), Marathas, Hyderabad and Tipu Sultan. It ended the Third Anglo-Mysore War, and the Marathas, the Nizam of Hyderabad and the British regained about half of Tipu Sultan's territories.
  - Treaty of Lahore 1846- This treaty was signed between Governor General Henry Hardinge and members of the Lahore Durbar represented by the young Maharaja Dilip Singh Bahadur. This treaty ended the First Anglo-Sikh War.
  - Treaty of Amritsar 1846- By this treaty the British East India Company sold Kashmir to Maharaja Gulab Singh. Maharaja Gulab Singh's descendants ruled until 1947, when Maharaja Hari Singh ceded Kashmir to India.

Social Reform Acts -

Infanticide Prohibition (Act)

- Sir John Shore (1795) and Wellesley (1802)
- Topic - Prohibition of infanticide.

Age of Consent Act (Act)

- Lansdowne (Governor General)
- Year - 1891 AD
- Subject - Marriage age for girls fixed at 12 years.

Sharda Act (Act)

JAI HO STUDY

Made with Xodo PDF Reader and Editor

- Irwin (Governor General)
- Year - 1930 AD
- Subject - Marriage age for girls fixed at 14 years and for boys at 18 years.

Hindu Widow Remarriage (Act)

- Lord Canning (Governor General)
- Year - 1856 AD

  - Vernacular Press Act (1878)
  - Arms Act (1878)
  - Second Afghan War (1878-80)
  - Queen Victoria assumed the title of 'Kaiser-e-Hind'

Major Farmers Movements

- Bardoli Satyagraha (1928)
  - Leadership: Sardar Vallabhbhai Patel
  - Location: Bardoli area of Gujarat
  - Reason: 22% lagaan (land tax) was increased on farmers by the British, which was unbearable for the farmers.
  - Result: Under the leadership of Sardar Patel, farmers organised and refused to pay the tax. The movement was successful, and the government had to withdraw the tax increase. After this movement Sardar Patel was given the title of "Sardar"
- Champaran Satyagraha (1917)
  - Leadership: Mahatma Gandhi
  - Location: Champaran district of Bihar
  - Reason: Under the 'Tinkathiya' system by the British, farmers were being forced to cultivate indigo on a part of their land, due to which the farmers were getting financially weak.
  - Result: Gandhiji prominently raised the demands of the farmers through Satyagraha,
  - And ultimately the British government had to abolish the 'Tinkathiya' system.
  - This was Mahatma Gandhi's first successful Satyagraha in India.
- Kheda Satyagraha (1918)
  - Leadership: Mahatma Gandhi and Sardar Vallabhbhai Patel
  - Location: Kheda district of Gujarat
  - Reason: Even after a severe famine, the British government demanded rent from the farmers. The farmers were unable to pay this heavy tax.
  - Result: The satyagraha resulted in the government suspending tax collection and the farmers got relief.
- Tebhaga Movement (1946-47)
  - Location: Bengal
  - Reason: The peasants (tenants) were demanding only one-third of the crop to be given to the landlords instead of half.
  - Result: This movement was widely successful and led to reforms in the land-owning law in Bengal. This improved the condition of tenant farmers
- Moplah Revolt (1921)

JAI HO STUDY

Made with Xodo PDF Reader and Editor

- Location: Malabar, Kerala
- Reason: This movement was carried out by Muslim Moplah peasants against the landlords and the British government who were subjecting them to heavy exploitation in the land and tax system.
- Result: This movement turned into a religious and social conflict in which many lives were lost. The movement was not successful, but it made its place in the history of peasant movement.

Major Tribal Rebellions

- Kol Rebellion (1831-1832)
  - Location: Chhota Nagpur, Jharkhand
  - Reason: The people of the Kol tribe were suffering from the British taking away their land and the atrocities of the outsider landlords. The land acquisition by the outsiders and the British tax system led the Kol people to revolt.
  - Leadership: This movement was led by Budhu Bhagat and his companions.
  - Result: The revolt was suppressed, but it succeeded in convincing the British administration that outside interference in tribal areas could lead to discontent.

- Santhal Rebellion (1855-1856)
  - Location: Santhal Pargana region of Bihar and West Bengal
  - Reason: The Santhal tribe revolted against the excessive tax policies of the British, exploitation by the landlords and the tyrannical actions of the moneylenders.
  - Leadership: Sido and Kanhu Murmu led this movement.
  - Result: The Santhals put up violent resistance against the British, but were ultimately suppressed. After this rebellion, some administrative reforms were made in the form of formation of Santhal Pargana.

- Bhil Revolt (1818-1831)
  - Location: Rajasthan, Gujarat and Madhya Pradesh
  - Reason: The traditional life of the Bhil tribe was in danger due to the forest and tax policies of the British government. The Bhil community revolted against their economic exploitation by the landlords and moneylenders.
  - Leadership: Bhil leader Govind Guru led this movement.
  - Result: The Bhils struggled for many years, but ultimately the British suppressed this rebellion. However, this movement inspired the protection of tribal rights

- Ho Revolt (1820-1827)
  - Location: Chhota Nagpur (now Jharkhand)
  - Reason: The Ho tribe revolted against British colonialism and exploitation by the landlords in their region. The region was first under the Mughals and later under the Marathas, but the situation worsened after the arrival of the British.
  - Result : The British Government suppressed this revolt harshly, but the belligerence of the Ho tribe inspired further tribal movements.

Acts and facts related to Viceroy

- In the Regulating Act of 1773, the Governor of Bengal was given the title of Governor General of Bengal (Warren Hastings)
- In the Charter Act of 1833, the Governor General of Bengal was made the Governor General of India (Lord William Bentinck, first Governor General of India)

(U.P.) – Ramchandra – Against illegal rent collection and land eviction rules.

- Eka Movement (1921–22) – Barabanki, Sitapur, Hardoi, Bahraich – Madari Pasi – Against rent hike.
- Bardoli Satyagraha (1928) – Bardoli Taluka, Surat – Vallabhbhai Patel – Against rent hike.
- Tebhaga Movement (1946) – Bengal – Komparam, Bhuvan Singh – Sharecroppers decided to give only 33% instead of 50%.

Note: After independence of India, the "Bhoodan Movement" was led by "Vinoba Bhave."

Formation of Muslim League

- In December 1906, at the invitation of Nawab Salimullah Khan of Dhaka, the 'All India Muslim Educational Conference' was held in Dhaka.
- In the conference, Salimullah proposed the formation of the All India Muslim League.
- The Muslim League was formed in 1906, and its headquarters was set up in Lucknow.
- Aga Khan was chosen as its first President.

Surat Session of 1907

- Congress was divided.
- Presided over by Ras Bihari Ghosh.
- Result: Congress split into Moderates and Extremists.
- Reason: Differences regarding methods of conducting the Swadeshi Movement.

Bal Gangadhar Tilak

- Titles: "Lokmanya," "Uncrowned King of India."
- Newspapers published: *Maratha*, *Kesari* (1881).
- Started festivals: Ganapati Festival (1893), Shivaji Festival (1895).
- Valentine Chirol, author of *Indian Unrest*, called him "Father of Indian Unrest."
- In 1908, on the basis of writings in *Kesari*, he was charged with sedition and sentenced to 6 years, sent to Mandalay Jail (Burma).
- In Mandalay Jail he wrote the book *Gita Rahasya*.
- Tilak accused Congress of politics of prayer, petition, and protest.

First Phase of Revolutionary Movement in India

- "Mitra Mela" established by V.D. Savarkar in 1899 later turned into a secret society "Abhinav Bharat" in 1904.
- P. Mitra established Anushilan Samiti in Bengal.
- On 30 April 1908, Khudiram Bose and Prafulla Chaki threw a bomb at judge Kingsford's carriage in Muzaffarpur but Kingsford survived.
- Prafulla Chaki committed suicide, Khudiram Bose arrested and hanged in 1908 at the age of just 15.
- On 23 December 1912, a bomb was thrown at Viceroy Lord Hardinge II's procession in Delhi. Ras Bihari Bose and Sachin Sanyal played key roles.

Jallianwala Bagh Massacre (13 April 1919)

- Rowlatt Act passed on 18 March 1919.
- On 9 April 1919, Punjab's two popular leaders Dr. Satyapal and Dr. Saifuddin Kitchlew were arrested by order of Punjab's

Lieutenant Governor Michael O. Dyer. This angered the people.

- On 10 April 1919, Amritsar city's administration was handed over to Brigadier General R. Dyer.
- On 13 April 1919, Baisakhi day, a huge meeting was held at Jallianwala Bagh where General Dyer ordered indiscriminate firing.
- In protest, Shankaran Nair resigned from the Viceroy's Executive Council.
- Rabindranath Tagore renounced his knighthood in protest.
- Congress formed an inquiry committee under Madan Mohan Malaviya.

Non-Cooperation Movement (1920–22)

- In September 1920, under the presidency of Lala Lajpat Rai, a special session of Congress was held in Calcutta.
- In this session, approval was given to launch the Non-Cooperation Movement for attaining Swaraj.
- Mahatma Gandhi launched the movement on 1 August 1920. Unfortunately, on the same day Tilak passed away.
- In December 1920, at the Nagpur annual session of Congress, the proposal of Non-Cooperation was finally passed. It was presented by C.R. Das.
- In 1921, "Tilak Swaraj Fund" was set up to run the movement.
- Gandhi renounced the title of "Kaiser-i-Hind" and Jamnalal Bajaj renounced "Rai Bahadur."
- Rabindranath Tagore called the burning of foreign clothes during this movement "cruel waste."

Chauri Chaura Incident

- Occurred on 4 February 1922 at Chauri-Chaura in Gorakhpur district of United Provinces.
- Cause: On police firing at a farmers' procession, an enraged mob set fire to the police station, killing 22 policemen.
- Result: On 12 February 1922, Gandhi suspended the Non-Cooperation Movement.

Formation of Swaraj Party (March 1923)

- To contest the 1923 legislative council elections, C.R. Das and Motilal Nehru formed the Swaraj Party in Allahabad in March 1923.
- C.R. Das was president, Motilal Nehru general secretary.
- In 1925, the party succeeded in making Vitthalbhai Patel the President of Central Legislative Assembly.

Second Phase of Revolutionary Movement

- Hindustan Republican Association (HRA) – formed in October 1924 at Kanpur by Sachindra Sanyal, Ramprasad Bismil, Yogesh Chatterjee with other revolutionaries.

Kakori Incident (9 August 1925)

- Revolutionaries of HRA looted the 8 Down train at Kakori near Lucknow. 29 revolutionaries were arrested and tried.
- Ramprasad Bismil, Rajendra Lahiri, Roshan Lal, Ashfaqulla were hanged at Gorakhpur, Gonda, Naini, and Faizabad respectively. Chandrashekhar Azad escaped.

HSRA (Hindustan Socialist Republican Association)

- In 1928, under Chandrashekhar Azad's leadership, HRA was renamed HSRA at Feroz Shah Kotla grounds, Delhi.

JAI HO STUDY

Made with Xodo PDF Reader and Editor

- Founding members: Bhagat Singh, Sukhdev, Bhagwati Charan Vohra, Shiv Verma, Jaidev Kapoor, Vijay Kumar Sinha.
- On 17 Dec 1928, Bhagat Singh, Azad, Rajguru killed Saunders in Lahore to avenge Lala Lajpat Rai's death.
- On 8 April 1929, Bhagat Singh and Batukeshwar Dutt threw bombs in the Central Legislative Assembly.
- Bhagat Singh, Rajguru, Sukhdev were tried under Lahore Conspiracy Case and executed on 23 March 1931.
- Chandrashekhar Azad shot himself during police encounter at Alfred Park, Allahabad, 27 Feb 1931.

Indian Geography

Correct order from north to south –

- Karakoram mountain range
- Ladakh mountain range
- Zaskar mountain range
- Pir Panjal mountain range

Correct order from west to east –

- Garo Hills
- Khasi Hills
- Jayanti Hills
- Mikir Hills

List of local names of shifting cultivation in India

- Jhum – North-East India
- Wevar and Dahiyar – Bundelkhand region (Madhya Pradesh)
- Deepa – Bastar
- Jara and Erka – Southern states
- Batra – South-East Rajasthan
- Podu – Andhra Pradesh
- Kumari – Western Ghats hilly areas of Kerala
- Kaman, Winga and Dhawi – Odisha

Types of coal in India

- Anthracite coal
  - It is the best coal
  - Carbon content is 90 to 95 percent
  - It does not emit smoke while burning
  - It gives the highest heat
  - It is obtained from the state of Jammu and Kashmir.
- Bituminous coal
  - It is a second grade coal
  - Carbon content is 55% to 80%
  - Coal from the Gondwana period is of this type
  - This region represents 80 coal fields out of the total 113 coal fields in the country
- Lignite coal
  - It is a brown coal of poor quality
  - Carbon content is 40 to 55%
  - Due to the large amount of sulfur (2 to 7%) in it, it is not used for some industries.
- Peat
  - Carbon content less than 40%
  - Produces more ash and smoke when burnt
  - It is the lowest grade of coal, which has more moisture

Hills of North-Eastern States

- Arunachal Pradesh - Miri, Abor, Mishmi, Dafla, Patkai Bum
- Assam - Mikir Hills, North Rengma, Barail Hills
- Nagaland - Naga Hills
- Meghalaya - Garo, Khasi, Jaintia Hills
- Manipur Bal Hills
- Mizoram - Mizo, Lushai Hills

Correct order of mountains from north to south

- Karakoram Mountain Range
- Ladakh Mountain Range
- Jaskar Mountain Range
- Pir Panjal Mountain Range

Correct order of hills from west to east

- Garo Hills
- Khasi Hills

Top three producing states of major crops (year 2023-24)

- Rice - Telangana, Uttar Pradesh, West Bengal
- Wheat - Uttar Pradesh, Madhya Pradesh, Punjab
- Maize - Karnataka, Bihar, Madhya Pradesh
- Coarse cereals - Rajasthan, Karnataka, Madhya Pradesh
- Arhar (Toor) - Karnataka, Maharashtra, Uttar Pradesh
- Pulses - Madhya Pradesh, Maharashtra, Rajasthan
- Food grains - Uttar Pradesh, Madhya Pradesh, Punjab
- Groundnut - Gujarat, Rajasthan, Madhya Pradesh
- Rapeseed and mustard - Rajasthan, Uttar Pradesh, Madhya Pradesh
- Soybean - Madhya Pradesh, Maharashtra, Rajasthan
- Sunflower - Karnataka, Haryana, Odisha
- Oilseeds - Rajasthan, Madhya Pradesh, Gujarat
- Sugarcane - Uttar Pradesh, Maharashtra, Karnataka
- Cotton - Gujarat, Maharashtra, Telangana
- Jute and Mesta - West Bengal, Bihar, Assam

Major Nuclear Power Stations in India

- Tarapur Atomic Power Station - Maharashtra
- Rawatbhata Atomic Power Station - Rajasthan
- Kalpakkam Atomic Power Station - Tamil Nadu
- Narora Atomic Power Station - Uttar Pradesh
- Kaiga Atomic Power Station - Karnataka
- Kakrapar Atomic Power Station - Gujarat

Hydro Power Stations in India

- Kalpong Hydroelectric Project - Andaman and Nicobar Islands
- Tehri - Uttarakhand, Bhagirathi River
- Srisailam State - Andhra Pradesh, Krishna River
- Bhakra Nangal Dam - Himachal Pradesh, Sutlej River
- Nagarjuna Sagar Dam - Andhra Pradesh and Telangana, Krishna River
- Idukki State - Kerala, Periyar River
- Sardar Sarovar Dam - Gujarat, Narmada River
- Shivanasamudra State - Karnataka, Cauvery River

Some special facts related to Indian Standard Time (IST)

- Indian Standard Time is calculated from 82°30' East meridian passing through Mirzapur in Uttar Pradesh.
- It is 5 hours 30 minutes ahead of Greenwich Mean Time (GMT), there is only one standard time in the whole of India.
- Longitudes have a very important function i.e. they determine the local time with respect to Greenwich Mean Time (GMT).
- There is a difference of 1 hour for every 15 degrees of longitude.
- Earlier in India, Mumbai and Kolkata had their own local times, but after the independence of the country, these were abolished and only one standard time was determined.
- Under mutual understanding in the countries of the world, the standard meridian is chosen at the multiple of 7°30' longitude.

Peninsular Plateau of India

- It is an irregular triangular shaped landmass, which extends from -
- Aravalli mountain range and Delhi in the north-west,
- Rajmahal hills in the east,
- Gir hills in the west,
- Cardamom hills in the south,
- Shillong and Karba-Anglong plateau in the north-east.
- Its average height is 600-900 meters.

Rabi and Kharif Crop

- Kharif Crops: Are dependent on monsoon, and their crop season runs from July to October. Kharif Crops - Rice, Maize, Millet, Ragi, Pulses, Soybean, Groundnut etc.

Made with Xodo PDF Reader and Editor

- Rabi Crops: Sown in winter (October-November) after the monsoon rains are over and harvested in summer (March-April), their crop season lasts from October to April.
- Rabi Crops- Wheat, Barley, Mustard (Rapeseed), Oats, Gram, Linseed etc.

Andaman Nicobar Islands (in north to south order)

- North Andaman
- Middle Andaman
- South Andaman
- Little Andaman
- Car Nicobar
- Little Nicobar
- Great Nicobar

Facts related to important rivers of South India

- Order of length of rivers of South India
  - Godavari > Krishna > Narmada > Mahanadi > Kaveri
- Major rivers of South India and their tributaries:-
  - Godavari:- Purna, Pranahita, Venganga, Penganga and Wardha, Manjira, Indravati
  - Krishna:- Tungabhadra, Koyna, Ghatprabha, Musi, Bhima, Malaprabha, Panchganga, Dudhganga etc.
  - Kaveri -: Amaravati, Bhavani, Hemavati, Kabini etc.
  - Mahanadi: Shivnath, Hasdeo, Ib, Tel

Order of major hills of Eastern Ghats (North to South)

- Andhra Pradesh
  - Nallamalai Hills
  - Velikonda Hills
  - Palakonda Hills
  - Nagari Hills
- Tamil Nadu
  - Jawadi Hills
  - Shevaroy Hills
  - Panchmalai Hills
  - Sirumalai Hills

Top five highest peaks of India

- K2 Godwin Austen - 8611 m
- Kanchenjunga - 8586 m
- Nanda Devi - 7816 m
- Kamet Mountain - 7756 m
- Saltaro Kangri - 7742 m

Tributaries of Indus River

- Tributaries of left bank
  - Jhelum
  - Chenab
  - Beas
  - Ravi
  - Sutlej
  - Jaskar
- Tributaries of right bank
  - Shyok
  - Gilgit
  - Gomal
  - Kabul

Major waterfalls of India

- Hathi Falls: - Meghalaya
- Chulia Falls: - Kota Rajasthan (Chambal River)
- Dhuandhar Falls: - Jabalpur (Narmada River)
- Kapildhara Falls: - Amarkantak (Narmada River)
- Dudhsagar Falls: - Goa (Mandvi River)
- Gokak Falls:- Karnataka
- Duduma Falls:- On Machhakund River on the border of Odisha and Andhra Pradesh

Major lakes of India

- Wular Lake - Jammu and Kashmir (example of oxbow lake)
- Loktak Lake - Manipur (floating Keibul Lamjao National Park)
- Chilika Lake - Odisha (largest saltwater lagoon lake)
- Kolleru Lake - situated in the middle of Krishna-Godavari delta in Andhra Pradesh
- Pulicat Lake - situated on the border of Andhra Pradesh and Tamil Nadu
- Vembanad Lake - Kerala
- Lonar Lake - in Buldhana, Maharashtra (lake formed by volcano)
- Renuka Lake - Himachal Pradesh
- Roopkund Lake - natural freshwater lake in Uttarakhand

Major Aluminium Companies of India

- Company - Major Centre - Supporting Country
- BALCO - Korba (Chhattisgarh) - Soviet Union
- Hindalco - Renukoot (Uttar Pradesh) - USA
- NALCO - Damanjodi (Odisha) - France
- Indalco - Hirakud (Orissa) - Canada

Regional Division of Himalayas

- Punjab Himalayas - Between Indus and Sutlej Rivers
- Kumaon Himalayas - Between Sutlej and Kali Rivers
- Nepal Himalaya - between Kali and Teesta rivers
- Assam Himalaya - between Teesta and Dihang rivers

Major passes of India

- Changla Pass - Ladakh
- Khardung Pass - Ladakh
- Lipulekh Pass - Uttarakhand
- Mana Pass - Uttarakhand
- Niti Pass - Uttarakhand
- Nathula Pass - Sikkim
- Jalepla Pass - Sikkim
- Tuju Pass - Manipur
- Bomdila Pass - Arunachal Pradesh
- Yangyap Pass - Arunachal Pradesh
- Diphu Pass - Arunachal Pradesh
- Chankan Pass - Arunachal Pradesh

Passes of Western Ghats in north to south order

- Thal Ghat - between Nasik and Mumbai
- Bhor Ghat - between Mumbai and Pune
- Palghat - between Coimbatore and Cochin
- Shenkota - Thiruvananthapuram and Between Madurai

Hills of South India in north to south order

- Nallamalai
- Nilgiri
- Annamalai
- Cardamom Hills

River valley projects and their location

- Badaun irrigation project - Ramganga river
- Gokul barrage project - Yamuna river
- Rihand project - Rihand river
- Nagarjuna Sagar project - Krishna river
- Pochampad project - Godavari river
- Mata Tila project - Betwa river

Order of major hills of Eastern Ghats (North to South)-

Andhra Pradesh-

- Nallamalai Hills
- Velikonda Hills
- Palakonda Hills
- Nagari Hills

Tamil Nadu-

- Jawadi Hills
- Shevaroy Hills
- Panchmalai Hills
- Sirumalai Hills

Important valleys of India-

- Araku Valley - Andhra Pradesh
- Kambam Valley - Tamil Nadu
- Murkha Valley - Ladakh
- Shuru Valley and Nubra Valley - Jammu and Kashmir
- Juk Valley - Nagaland
- Sangla Valley - Himachal Pradesh
- Kinnaur Valley - Himachal Pradesh
- Parvati Valley - Himachal Pradesh
- Lahaul Valley - Himachal Pradesh
- Yuthang Valley - Sikkim
- Kullu Valley - Middle of Dhauladhar Peer Panchayat border
- Kangra Valley - Himachal Pradesh
- Nelang Valley - Uttarakhand
- Silent Valley - Kerala
- Chamba Valley - Himachal Pradesh
- Johar Valley – Uttarakhand

Ports of India-

- There are about 250 small ports in India which It is under the state government. Maharashtra has the most number of small ports (53).
- India has 13 major ports which are under the central government. Tamil Nadu has the most number of large ports (3).
    1. Kandla- Gujarat, tidal, free trade, most trade, Deen Dayal Upadhyaya
    2. Mumbai- largest, Maharashtra
    3. Nhavashiva- Maharashtra, most modern Jawaharlal Nehru
    4. Murmugao- Goa, situated on tourist estuary
    5. Mangalore- Karnataka, export of iron ore from Kudremukh

JAI HO STUDY

Made with Xodo PDF Reader and Editor

6. Kochi- situated on lagoon, Queen of Arabian Sea
7. Tuticorin- Tamil Nadu, least deep
8. Chennai- Tamil Nadu, oldest
9. Ennore- Tamil Nadu corporation based
10. Visakhapatnam- Andhra Pradesh, deepest, safest, ship repair
11. Paradip- Odisha, export of rice
12. Calcutta- West Bengal, Hooghly River
13. Galathea Bay Port-Great Nicobar

Mountain Peaks of Andaman & Nicobar

Peaks- Location

- Saddle Peak- North Andaman
- Mount Diavoli- Middle Andaman
- Mount Coyobo - South Andaman
- Mount Harriet - South Andaman
- Mount Thullier - Great Nicobar

Major important soils of India

- Red and Yellow Soil
  - They are mainly developed on crystalline igneous rocks in low rainfall areas, in the eastern and southern part of the Deccan Plateau they cover about 10.6% of the total geographical area of India
  - These soils are rich in potash but deficient in phosphorus, humus, nitrogen and magnesia.
- Black Soil
  - Black soil has self ploughing properties, it is also called regur, kapasi, tropical chernozem
  - Black soil is intensively cultivated for cotton cultivation.
  - It is mainly found in the states of Maharashtra, Gujarat, Rajasthan, Madhya Pradesh, Chhattisgarh, Orissa, Tamil Nadu
  - Generally they are deficient in phosphate, nitrogen and humus but are rich in lime, iron, magnesia aluminium.
- Laterite Soil
  - This soil is produced by the deposition of lime and silica in areas receiving more than 200 cm of rainfall. This soil is rich in iron oxide and aluminium oxide, but lacks nitrogen, phosphorus, acid, potash, lime and organic elements.
  - This soil is mainly found in the Eastern Ghats, Rajmahal Hills, Satpura and Meghalaya Hills.

Major coal fields of India

- West Bengal - Raniganj (India's oldest coal field)
- Jharkhand - Jharia (largest), Bokaro, Dhanbad Giridih, Karanpura, Ramgarh, Daltonganj
- Odisha - Talcher, Himgiri, Rampur
- Andhra Pradesh - Kantapalli
- Telangana - Singareni
- Chhattisgarh - Korba, Bishrampur, Sonhat, Jhilmil

India's Neighboring Countries and the Indian States/Union Territories Sharing Borders

- Bangladesh: Border length 4096.07 km. States – West Bengal, Assam, Meghalaya, Tripura, Mizoram.
- Nepal: Border length 1751.00 km. States – Uttarakhand, Uttar Pradesh, Bihar, West Bengal, Sikkim.
- Myanmar: Border length 1643.00 km. States – Arunachal Pradesh, Nagaland, Manipur, Mizoram.
- Bhutan: Border length 699.00 km. States – Sikkim, West Bengal, Assam, Arunachal Pradesh.
- Afghanistan: Border length 106.00 km. Union Territory – Ladakh.
- China: Border length 3488.00 km. States/UT – Ladakh, Himachal Pradesh, Sikkim, Uttarakhand, Arunachal Pradesh.
- Pakistan: Border length 3323.00 km. States/UT – Ladakh, Jammu and Kashmir, Punjab, Rajasthan, Gujarat.

Important Channels of India

- 9° Channel: Between Lakshadweep and Minicoy.
- 10° Channel: Between Andaman and Nicobar.

JAI HO STUDY

Made with Xodo PDF Reader and Editor

- Great Channel: Between Sumatra (Indonesia) and Nicobar.
- Gulf of Mannar: Between southeastern Tamil Nadu and Sri Lanka.
- Palk Strait: Between India and Sri Lanka.
- Coco Strait: Between Coco Islands (Myanmar) and North Andaman.
- Duncan Passage: Between South Andaman and Little Andaman.
- Mahim Creek: A narrow inlet in Mumbai.
- 8° Channel: Between Maldives and Minicoy.

Himalayas

- Sequence: Trans Himalaya > ITSZ > Great Himalaya > MCT > Lesser Himalaya > MBT > Shivalik > HFF > Indo-Gangetic Plain.
- Trans Himalaya Ranges (North to South): Karakoram > Ladakh > Zaskar > Kailash.

Great Himalayan Peaks

- Mount Everest – 8,848.86 m
- Kanchenjunga – 8,598 m
- Makalu – 8,481 m
- Dhaulagiri – 8,172 m
- Nanga Parbat – 8,126 m
- Annapurna – 8,078 m
- Nanda Devi – 7,817 m

Lesser Himalayan Ranges

- Pir Panjal: Longest range of Middle Himalaya (Jammu & Kashmir).
- Dhauladhar: Himachal Pradesh.
- Mussoorie: Uttarakhand.
- Mahabharat: Nepal.

Mountains of Central and Southern India

- Aravalli highest peak: Guru Shikhar (1722 m).
- Satpura highest peak: Dhoopgarh, on Mahadeo hills (1350 m).
- Maikal range highest peak: Amarkantak (1065 m), source of Narmada and Son rivers.
- Parasnath hill: Highest peak of Chota Nagpur Plateau, famous Jain pilgrimage.
- Doda Betta: Highest peak of Nilgiris (2637 m).
- Anai Mudi: Highest peak of South India, Anamalai (2695 m).
- Cardamom Hills: Southernmost mountain region of Peninsular India.
- North to South order: Nilgiri > Anamalai > Cardamom (Elephant/Ilaychi Hills).

Important Hills (North to South Order)

- Mahendra Giri: Odisha.
- Nallamalai: Andhra Pradesh.
- Velikonda: Andhra Pradesh.
- Palakonda: Andhra Pradesh.
- Nagari: Andhra Pradesh.
- Jawadi: Tamil Nadu.
- Shevaroy: Tamil Nadu.
- Panchamalai: Tamil Nadu.
- Sirumalai: Tamil Nadu.

North–South Division of Himalayas

1. Trans Himalaya
2. Greater Himalaya

JAI HO STUDY

4. Outer or Shivalik Himalaya

Western Coastal Plains

- Konkan Coast: Between Daman (Maharashtra) and Goa.
- Kannada/Canara Coast: Between Goa and Mangaluru (Karnataka).
- Malabar Coast: From Mangaluru to Kanyakumari.

Eastern Coastal Plains

- Utkal Coast: Odisha.
- Northern Circars Coast: Odisha and Andhra Pradesh.
- Coromandel Coast: Andhra Pradesh and Tamil Nadu.
- Mahanadi Delta: Odisha.
- Godavari Delta: Andhra Pradesh.
- Krishna Delta: Andhra Pradesh.
- Kaveri Delta: Tamil Nadu.

Major Valleys of India

- Markha Valley: Ladakh.
- Kashmir Valley: Between the Great Himalaya and Pir Panjal.
- Nubra Valley: Ladakh.
- Suru Valley: Ladakh.
- Kinnaur: Himachal Pradesh.
- Parvati Valley: Kullu, Himachal Pradesh.
- Sangla Valley: Himachal Pradesh.
- Malana Valley: Himachal Pradesh.
- Kullu Valley: Himachal Pradesh.
- Pangi Valley: Himachal Pradesh.
- Spiti Valley: Himachal Pradesh.
- Lahaul Valley: Himachal Pradesh.
- Kangra Valley: Himachal Pradesh.
- Chamba Valley: Himachal Pradesh.
- Doon Valley: Uttarakhand.
- Johar Valley: Uttarakhand.
- Valley of Flowers: Chamoli, Uttarakhand.
- Dharma Valley: Uttarakhand.
- Sor Valley: Pithoragarh, Uttarakhand.
- Nelang Valley: Uttarkashi, Uttarakhand.
- Neora Valley: Kalimpong, Darjeeling (West Bengal).
- Chumbi Valley: Sikkim.
- Yuthang Valley: Sikkim.
- Juku Valley: Nagaland.
- Araku Valley: Andhra Pradesh.
- Kambam Valley: Tamil Nadu.
- Silent Valley: Kerala.

Major Waterfalls of India

- Dudhsagar Waterfall: On Mandovi River, located on the Goa and Karnataka border.
- Dhuandhar: On Narmada River, located in Jabalpur (Madhya Pradesh).
- Amritdhara, Devdhara: On Hasdeo River, located in Chhattisgarh.
- Kendai: Located in Chhattisgarh.
- Dugdhadhara, Kapildhara: On Narmada River, located in Madhya Pradesh.

JAI HO STUDY

- Chitrakot (Niagara of India): On Indravati River, located in Bastar (Chhattisgarh).
- Jonha/Gautamdhara: On Raru River, located in Ranchi (Jharkhand).
- Gokak: On Ghataprabha River, located in Belagavi (Karnataka).
- Lodh/Budha Ghagh: On Budha River, located in Latehar (Jharkhand).
- Dasham/Dassong: On Kanchi River, located in Ranchi (Jharkhand).
- Chulia: On Chambal River, located in Rajasthan.
- Bhalkund/Rahatgarh: On Bina River, located in Sagar (Madhya Pradesh).
- Duduma: On Machhakund River, located in Koraput (Odisha).
- Kunchikal: On Varahi River, located in Karnataka.
- Sadni: On Shankh River, located in Jharkhand.
- Chachai: On Beehar River, located in Madhya Pradesh.
- Pykara: On Pykara River, located in Tamil Nadu.

Major Lakes of India

- Uttarakhand: Nainital, Bhimtal, Naukuchiatal, Khurpatal, Roopkund, Sattal, Naini, Malatal.
- Gujarat: Nal Sarovar, Narayan Sarovar, Hamirsar.
- Haryana: Surajkund.
- Punjab: Kanjli, Harike.
- Rajasthan: Pichola, Sambhar, Panchpadra, Rajsamand, Jaisamand, Didwana, Pushkar, Fateh Sagar, Uday Sagar, Nakki, Debar, Lunkaransar.
- Meghalaya: Umiam.
- Jammu & Kashmir: Wular Lake, Dal Lake, Jansar Lake, Anantnag, Nagin, Berinag, Sheshnag, Somoriri, Manasbal.
- Manipur: Loktak.
- Mizoram: Pala.
- Sikkim: Gurudongmar (highest altitude lake), Cholhamu Lake, Tsongmo Lake.
- Kerala: Sasthamkotta, Ashtamudi, Vembanad.
- Karnataka: Belandur, Pampa Sarovar.
- Tamil Nadu: Berijam, Ooty, Kodaikanal, Chembarambakkam, Veeranam Lake.
- Assam: Dipor Beel, Son Beel, Chapnala, Chandubi.
- Maharashtra: Lonar, Powai, Gorewada, Salim Ali Sarovar.
- Telangana: Hussain Sagar, Osman Sagar, Himayat Sagar.
- Andhra Pradesh: Kolleru.

Classification of Himalayas according to Sydney Burrard

- Punjab Himalaya: Between Indus and Sutlej River, 560 km long.
- Kumaon Himalaya: Between Sutlej and Kali River, 320 km long.
- Nepal Himalaya: Between Kali and Teesta River, 800 km long.

JAI HO STUDY

Made with Xodo PDF Reader and Editor

- Assam Himalaya: Between Teesta and Dihang River, 750 km long.

Nuclear Power Plants of India

- Tarapur: Maharashtra, India's first nuclear power station, established in 1969.
- Rawatbhata: Rajasthan, with Canadian assistance.
- Kalpakkam: In Tamil Nadu region.
- Kakrapar: Gujarat.
- Mithi Virdi: Being established in Gujarat with the cooperation of the United States of America.
- Jaitapur: Maharashtra.
- Kaiga: Karnataka.
- Kudankulam: Tamil Nadu.
- Kovvada: Proposed in Andhra Pradesh.
- Haripur: West Bengal.
- Narora: In Bulandshahr, Uttar Pradesh.
- Fatehabad: Haryana.
- Chutka: Madhya Pradesh.

States and their Major Hill Stations

- Uttarakhand: Ranikhet, Lansdowne, Mussoorie, Mukteshwar, Nainital, Almora, Bhawali.
- Himachal Pradesh: Dalhousie, Kasauli, Manali, Mandi.
- Jammu & Kashmir: Gulmarg, Pahalgam, Srinagar.
- Tamil Nadu: Coonoor, Ooty, Kodaikanal, Yercaud.
- Karnataka: Nandi Hills, Kemmanagundi.
- Meghalaya: Shillong.
- West Bengal: Kalimpong, Darjeeling.
- Maharashtra: Khandala, Lonavala, Panchgani.
- Kerala: Munnar.
- Madhya Pradesh: Pachmarhi.

Major River Valley Projects of India

- Sabarigiri: Kakkí/Pamba River – Kerala.
- Nagarjuna Sagar: Krishna River – Andhra Pradesh & Telangana (masonry dam).
- Pochampad: Godavari River – Telangana.
- Idukki: Periyar River – Kerala.
- Pavana: Pavana River – Maharashtra.
- Nathpa Jhakri: Sutlej River – Himachal Pradesh.
- Suil: Suil River – Himachal Pradesh.
- Bansagar: Son River – Bihar, Uttar Pradesh, Madhya Pradesh.
- Ramganga: Ramganga River – Uttarakhand.
- Nimmo Bazgo: Indus River – Ladakh.
- Uri: Jhelum River – Jammu & Kashmir.
- Chutak: Suru River – Kargil.
- Baglihar: Chenab River – Jammu & Kashmir.
- Tulbul: Jhelum River – Jammu & Kashmir.
- Almatti: Krishna River – Andhra Pradesh, Karnataka, Maharashtra.
- Chambal: Chambal River – Madhya Pradesh, Rajasthan.
- Damodar Valley: Damodar & Barakar Rivers – Jharkhand & West Bengal.
- Bhakra Nangal: Sutlej River – Delhi, Himachal, Punjab, Haryana, Rajasthan.
- Hirakud: Mahanadi River – Odisha.

- Logan - West Africa
- Milpa - Mexico and Central America
- Coco - Venezuela
- Roca - Brazil
- Chetemini - Uganda, Zambia and Zimbabwe
- Ladang - Java and Indonesia

Five largest iron ore mines in Australia

1) Mount Newman joint venture
2) Jimblebar Hub
3) Area C Mine
4) South Flank project
5) Greater Tom Price Mine

Five big mountains of Africa in descending order

2) Mount Kilimanjaro, Tanzania - 5895 m
3) Mount Kenya, Kenya - 5199 m
4) Mount Stanley, Uganda and Democratic Republic of Congo - 5109 m
5) Mount Speke, Uganda - 4890 m
6) Mount Baker, Uganda - 4844 m

5 major rivers of North America continent and their location

- Mississippi-Missouri River
  - Mississippi and Missouri are two different rivers, but together they form the fourth largest river system in the world. The delta of this river is formed like a 'bird's claw'. It flows in North America
- Rio Grande River
  - This river forms the border between the United States and Mexico. It is a river of the North American continent
- St. Lawrence River
  - St. Lawrence River flows in the North American continent. The special thing about this river is that it forms the world's busiest internal water transport route. The world famous 'Niagara Falls' is located on the St. Lawrence River.
- Colorado River
  - Colorado River flows in the western part of the North American continent. The world famous 'Grand Canyon' and 'Huber Dam' are located on the Colorado River.

Important rivers of the African continent

- Niger River
  - Niger River flows in Africa. This river falls in the Gulf of Guinea, and is famous as the 'Oil River'.
- Zambezi River
  - Zambezi River is an African river, Victoria Falls and Kariba Dam are situated on this river.
- Congo or Zaire River
  - This river flows in Africa. The special thing about this river is that it crosses the equator twice. The world famous Stanley and Livingstone waterfalls are situated on this river.
- Limpopo River
  - Limpopo River originates from the Highveld of South Africa. This river crosses the Tropic of Capricorn twice.

Major oceanic trenches of the world

- Mariana Trench:
  - There is an almost continuous series of these on the eastern and western coasts of the Pacific Ocean, of which the Mariana Trench is the deepest.
  - This is the deepest trench in the world. It is located to the east of the Philippines. Its depth is 11034 meters.
- Tonga Trench:
  - This is located in the South Pacific Ocean, east of the Tonga Islands.
- Sunda Trench:
  - Which was earlier called the Java Trench, is the deepest point of the Indian Ocean, located south of the Java Islands of Indonesia. The maximum depth of this trench is 7,725 metres (25,344 feet).
- Puerto Rico Trench:

JAI HO STUDY

Made with Xodo PDF Reader and Editor

- It is located on the border of the Caribbean and Atlantic Ocean.

Major rivers of Europe and their characteristics

- Volga River
  - Originating from the Valdai Hills of Russia and falling into the Caspian Sea, it is the longest river in Europe.
  - The Volga River, which connects the Baltic Sea to the Caspian Sea, has historically been essential for Russian culture, trade and navigation.
- Danube River
  - The Danube River, which originates from the Black Forest of Germany and falls into the Black Sea, is the second longest river in Europe. • It is an important waterway for trade and transit, passing through ten countries over its approximately 2,850-km length.
  - The Danube Delta, a UNESCO World Heritage Site
- Rhine River
  - The Rhine River flows from its origin in the Swiss Alps into the North Sea, separating Germany from the Netherlands.
  - It is one of Europe's busiest and most important waterways, stretching for 1,233 km.
- Loire River
  - The French Cévennes mountain range is the source of the Loire River, which falls into the Atlantic Ocean.
  - It is the longest river in France,
- Po River
  - The Italian Cottian Alps are the source of the Po River, which falls into the Adriatic Sea.
  - It is the longest river in Italy and is over 652 km long.

Major Waterfalls of the World

- Niagara Falls
  - Shares the international border of Canada and the United States and is located in New York State and the province of Ontario. It is the collective name for three waterfalls.
- Victoria Falls
  - One of the seven natural wonders of the world by CNN. It is on the Zambezi River in Southern Africa and shares the border of Zimbabwe and Zambia.
- Angel Falls
  - It is the world's highest waterfall on the Churún River, a tributary of the Caroni River in Venezuela
- Iguazu Falls
  - Forms the border between Argentina and Brazil. It is the world's largest waterfall system.
- Guaira Falls
  - A series of huge waterfalls on the Parana River on the border of Paraguay and Brazil

Major theories related to the origin of the Earth -

- Gaseous/Airborne Hypothesis:- Kant
- Nebula Hypothesis:- Laplace
- Planetary Hypothesis:- Chamberlin and Moulton
- Tidal Hypothesis:- James Jeans and Jefferies
- Binary Star Hypothesis:- Russell
- Big Bang Theory:- George Lamenter

Other important facts related to lakes -

- World's oldest and deepest lake - Lake Baikal
- World's highest navigable lake - Lake Titicaca
- World's largest freshwater lake - Lake Superior
- World's largest lake is - Lake Baikal
- Lake Baikal is called the pearl or eye of Siberia
- World's lowest lake is - Dead Sea
- World's highest salinity The lake is - Lake Van
- The world's largest saltwater lake is - Caspian Sea
- The lake on the banks of which China's nuclear testing institute is located is - Lopnor Lake
- Port Radium in Canada is located near which lake - Great Bear Lake
- The lake through which the Arctic Circle passes - Great Bear Lake (Canada)
- The lake through which the Equator passes - Lake Victoria

Rivers originating from the Tibetan plateau

- Brahmaputra (Sangpo)
- Salween
- Mekong
- Indus
- Sutlej
- Yangtze

Grasslands - These are divided into two parts-

- Tropical grasslands
  - Savanna (Africa)
  - Compositae (Brazil)
  - Llanos (Venezuela and Colombia)
- Temperate grasslands
  - Prairie (USA Canada)
  - Pampas (Argentina)
  - Veld (South Africa)
  - Downs (Australia)
  - Steppe (Asia, Ukraine, Russia, Manchuria region of China)

Countries with the largest coastline in the world in descending order

- Canada Norway
- Indonesia
- Russia
- Philippines

• Note- India ranks 16th in the world with a coastline length of 7516 kilometers

Major local winds of the world

- Chinook - United States and Canada
- Fohn - Alps Mountains, Switzerland
- Sirocco - Italy
- Simoom - Arabian Desert
- Brickfielder - Australia (Victoria)
- Norwester - New Zealand
- Shamal - Iraq and Persian Gulf
- Sapta Ana - California
- Koyambang - Java Indonesia

Major tribes of the world

- Pygmies - Congo Basin
- Boro - Brazil
- Inkatha - South Africa
- Haida - America
- Tararta, Yukadhir - Siberia
- Bedouin - Arabia
- Yaku - Tundra region
- Zulu - Natal Province, South Africa
- Masai - East Africa (Kenya)

JAI HO STUDY

Made with Xodo PDF Reader and Editor

Major straits of the world and related seas and landmasses which they separate

- Bering Sea - Arctic and Bering Sea (Alaska and Russia)
- Gibraltar - Mediterranean Sea and Atlantic Ocean (Spain and Morocco)
- Dobar - North Sea and Atlantic Ocean (Britain and France)
- Malacca - Java Sea and Bay of Bengal (Malaya and Sumatra)
- Florida - Gulf of Mexico and Atlantic (Florida and West Indies)
- Pak - Bay of Bengal and Arabian Sea (India and Sri Lanka)

Pakistani cities in north to south order

- Islamabad
- Lahore
- Multan
- Karachi

Major mountain ranges of the world and their location

- Rockies Mountains Range - North America
- Opalescence Mountains - North America
- Alps Mountains - Europe
- Altai Mountains - Central Asia
- Atlas Mountains - Northwest Africa
- Caucasus Mountains - Europe
- Drakensberg Mountains - South Africa

Layers of the atmosphere and their characteristics

- Troposphere - Climate and weather related phenomena
- Stratosphere - Ozone layer is found, ideal condition for flying aircraft
- Mesosphere - Absence of greenhouse gases, meteors / shooting stars occur in this layer
- Ionosphere - Radio waves transmitted from the earth are reflected
- Exosphere - Outermost layer of the atmosphere, very few gases are present due to lack of gravitational force

Located on the Equator (13 countries, 3 continents, 3 water bodies)

- South America:- Ecuador, Colombia, Brazil
- Africa:- Sao Tome Principe, Gabon, Congo, Democratic Republic of Congo, Uganda, Kenya, Somalia
- Asia:- Maldives, Indonesia, Kiriwati

Located on the Tropic of Cancer (16 countries, 3 continents, 6 water bodies)

- North America:- Bahamas (Archipelago), Mexico
- Africa:- Egypt, Libya, Chad, Niger, Algeria, Mali, Western Sahara, Mauritania
- Asia:- Taiwan, China, Myanmar, Bangladesh, India, Oman, United Arab Emirates, Saudi Arabia

Agricultural Production Board

- Coffee Board -- Bangalore, Karnataka
- Rubber Board -- Kottayam, Kerala
- Tea Board -- Kolkata
- Tobacco Board -- Guntur, Andhra Pradesh
- Grape Processing Board -- Pune
- National Jute Board -- Kolkata

Major Lakes of the World

- Onega - Russia
- Maracaivo - Venezuela
- Five Flower Lake - China
- Woyaling Lake - Dominica
- Athavasca – Canada

Major volcanic mountains of the world

- Mount Etna - Italy
- Cotopaxi - Ecuador
- Fujiyama - Japan
- Mauna Loa - Hawaii Island
- Mount Kina Balu - Malaysia
- Aconcagua - Argentina

Major vegetation of the world

- Xerophyte - Vegetation of tropical desert areas
- Hydrophyte - Vegetation of flooded areas
- Mesophyte - Vegetation of temperate zone
- Cryophyte - Vegetation of tundra and cold areas
- Halophyte - Vegetation found in salty areas
- Lithophyte - Vegetation growing in hard rocks
- Tropophyte - Grass and vegetation of tropical climate
- Hygrophyte - Vegetation of swampy and equatorial warm humid areas

Made with Xodo PDF Reader and Editor

Local winds and related countries

- Fohn - Alps Mountains
- Mistral - Rhine Valley
- Khamsin - Egypt
- Bora - Italy (Adriatic Sea)
- Haboob - Sudan
- Santana - California
- Blizzard - USA, Canada
- Norwester - India

Major deserts of the world (in descending order)

- Sahara Desert (Africa Continent)
- Australia Desert (Australia Continent)
- Arabian Desert (Arabian Peninsula)
- Mongolia Desert (Between Asia and Russia)
- Kalahari Desert (Africa Continent)

Important Channels

- 6 degree. Channel: Separates Nicobar and Sumatra (Indonesia).
- 8 degree. Channel: Separates Lakshadweep and Maldives.
- 9 degree. Channel: Separates Minicoy and other Lakshadweep islands.
- 10 deg. Channel: Separates Andaman and Nicobar.
- 11 deg. Channel: In Lakshadweep, separates Amini and Cannanore
- Duncan Channel: Separates South Andaman and Little Andaman.
- Coco Channel: Separates Andaman and Coco Islands (Myanmar)

Major deserts of the world

- Dasta-e-Lut:- Eastern Iran
- Dasta-e-Kabir:- Southern Iran
- Namib:- Namibia (Africa)
- Great Sandy, Simpson, Gibson:- Australia
- Atacama:- Northern Chile
- Mojave/Mohave:- California (America)
- Takla Makan:- Sikiang (China)
- Sonoran:- Arizona and California

Major deserts situated on the banks of rivers City

- City - River
- New York - Hudson
- Lahore - Ravi
- Cairo (Cairo) - Nile
- Khartoum - at the confluence of White Nile and Blue Nile
- Perth - Swan
- Hamburg - Elbe
- Kiev - Dnieper
- Rotterdam - Rhine
- Quebec City - St. Lawrence
- Warsaw - Vistula

Important International Boundary Lines and their Features

- 17th Parallel
  - South Vietnam and North Vietnam - North and South Vietnam were divided on the basis of the Geneva Accords of 1954. It became irrelevant after the unification of Vietnam
- 20th Parallel
  - It marks the boundary between Sudan and Libya
- 22nd Parallel
  - 22nd north latitude marks a major part of the Sudan - Egypt boundary
- 25th Parallel
  - Mauritania and Mali - It marks the northernmost part of the Mali - Mauritania boundary
- 31st Parallel
  - Iran and Iraq - It also marks the boundary between Iraq and Iran and between the US states of Louisiana and Mississippi.
- 38th Parallel
  - South Korea and North Korea - It demarcates the central part of the demilitarized zone between North and South Korea.
- 49th Parallel
  - United States and Canada - It forms the international border between North America (excluding Alaska) and Canada.
- Durand Line
  - Pakistan and Afghanistan - Demarcated by Sir Mortimer Durand in 1893 but not recognised by present-day Afghanistan
- Hindenburg Line
  - Poland and Germany - A defensive line in French territory during World War I,

JAI HO STUDY

Made with Xodo PDF Reader and Editor

made irrelevant by the Treaty of Versailles in 1919.

- McMahon Line
  - China and India - It is the de facto border between India and China, although China disputes its legal status.
- Maginot Line
  - Germany and France - A defensive line on the French border towards Germany before World War II, made obsolete by the German invasion.
- Mannerheim Line
  - Russia and Finland - A defensive line against the Soviet Union during World War II.
- Oder-Neisse Line
  - Poland and Germany- This demarcates the Polish-German border according to the Potsdam Conference, which was ratified by unified Germany in 1990
- Radcliffe Line
  - India and Pakistan- This demarcation was made to lead to the partition of India and the formation of East and West Pakistan, which comprises present-day India, Bangladesh and Pakistan.
- Siegfried Line
  - France and Germany- An extension of the Hindenburg Defensive Line on the Western Front of World War I.
- Blue Line
  - Lebanon and Israel- A border demarcation established by the United Nations between Lebanon and Israel.
- Green Line/UN Buffer Zone
  - Republic of Cyprus and Turkey- A demilitarized zone patrolled by the United Nations Peacekeeping Force in Cyprus (UNFICYP), established after a ceasefire in 1974.

Black Sea

- Shares border with 6 countries
  - Ukraine
  - Russia
  - Georgia
  - Turkey
  - Bulgaria
  - Romania

Nordic countries

- Iceland
- Norway
- Denmark
- Sweden
- Finland

Metamorphism of Igneous Rocks

- Igneous - Metamorphic
- Granite - Gneiss
- Syenite - Syenite Gneiss
- Grebo - Serpentine
- Basalt - Schist
- Bituminous Coal - Graphite

Metamorphism of Sedimentary Rocks

- Sedimentary - Metamorphic
- Sediment - Sedimentary Schist
- Sandstone - Quartzite
- Shale - Slate
- Limestone - Marble
- Lignite Coal - Anthrocite Coal

Major Plateaus of the World

- Matograsso Plateau - Brazil
- Korat Plateau - Thailand
- Chiapas Plateau - Southern Mexico
- Jadon Plateau - Eastern Nigeria
- Bor Borga Plateau - Brazil
- Takla Makan Plateau - China
- Shan Plateau - Myanmar
- Potwar Plateau - Pakistan Patagonia Plateau - Argentina
- Avisniy Plateau - Ethiopia
- Loess Plateau - China
- Ubangi Plateau - Central America
- Columbia Plateau - United States of America
- Ozark Plateau - America
- Anatolia Plateau - Turkey
- Tassili Plateau - Algeria
- Bai Plateau - Angola
- Adamawa Plateau - Nigeria
- Laurasia Plateau - Canada

Major theories / scholars related to mountain formation

JAI HO STUDY

Made with Xodo PDF Reader and Editor

- Landslide theory of mountain formation - Kober
- Thermal contraction theory - Jeffries
- Continental slip theory - Daly
- Continental drift theory - Wegener
- Convection wave theory - Holmes
- Radioactivity theory - Joly
- Plate tectonics theory - Morgan, Harry Hess, Mackenzie Parker,

The Sahara Desert is spread across these 11 countries

- Morocco
- Algeria
- Chad
- Libya
- Mali
- Mauritania
- Egypt
- Western Sahara
- Niger
- Sudan
- Tunisia

Continents of the world and their highest mountains

- The highest peak of the North American continent is Mount McKinley
- The highest peak of the South American continent is Mount Aconcagua
- The highest peak of the African continent is Mount Kilimanjaro
- The highest peak of the Antarctica continent is Mount Vinson Massif
- The highest peak of the Asian continent is Mount Everest
- The highest peak of the European continent is Mount Elbrus
- The highest peak of the Australian continent is Mount Kosciusko

Important Plates/Included Parts

- Antarctic Plate
  - Antarctic continent + oceanic plate surrounding Antarctica
- North American Plate
  - North-Western Atlantic Ocean + North American Continent
- South American Plate
  - South American Continent + South-Western Atlantic Ocean
- Pacific Ocean Plate
  - Pacific Ocean Floor
- Indo-Australian Plate
  - India + Australia + Indian Ocean
- African Plate
  - African Continent + Eastern Atlantic Ocean + Western Indian Ocean
- Eurasian Plate
  - Europe + Asia + Eastern Atlantic Ocean

Deserts of the World and Their Extent Countries/Regions:-

- Atacama Desert - Chile, Peru, Bolivia, Argentina
- Kalahari Desert - Botswana, Namibia, South Africa
- Arabian Desert - Jordan, Iraq, Kuwait, Oman, Qatar, Saudi Arabia, United Arab Emirates, Yemen
- Gobi Desert - Mongolia, China
- Great Victoria Desert - Australia
- Patagonian Desert - Argentina, Chile
- Thar Desert - India, Pakistan
- Syrian Desert - Saudi Arabia, Jordan, Syria, Iraq
- Chihuahua Desert - Mexico, United States

Major lakes and their extended area

- Caspian Sea - Kazakhstan, Russia, Turkmenistan, Azerbaijan and Iran
- Lake Superior - Canada and United States
- Lake Victoria - Uganda, Tanzania and Kenya
- Lake Tanganyika - Congo, Tanzania, Zambia and Burundi

Major islands located in the oceans

- Greenland - Arctic Ocean
- New Guinea - Western Pacific Ocean
- Borneo - Indian Ocean
- Madagascar - Indian Ocean
- Baffin Island - North Arctic Ocean
- Java Island - Indian Ocean
- Sumatra Island - Indian Ocean
- Honshu Island - North Pacific Ocean
- Britain - North Atlantic Ocean
- Cuba - Caribbean Sea
- Iceland - North Atlantic Ocean
- Ireland - North Atlantic Ocean
- Sri Lanka - Indian Ocean
- Tasmania - Southwest Pacific Ocean

JAI HO STUDY

Made with Xodo PDF Reader and Editor

- Victoria Island - Arctic Ocean
- North Island - Southwest Pacific Ocean
- South Island - Southwest Pacific Ocean
- Sulovesi Island - Indian Ocean
- Ellesmere Island - North Arctic Ocean

Major cold currents of the world

- Benguela Current
  - The only cold current in the South Atlantic Ocean is Benguela. Benguela Current flows from south to north along the western coast of South Africa.
- Canary Current
  - This current is a cold current flowing from north to south in the western part of north-western Africa.
- Peruvian or Humboldt Current
  - This is a cold current flowing in the western part of the South American continent in the South-Eastern Pacific Ocean.

Major warm currents of the world

- Gulf Stream
  - When the Florida Current joins the Ellis Current and moves ahead from Cape Hatteras, it is called Gulf Stream. This is a warm current. It flows along the eastern coast of the United States of America. The Gulf Stream was discovered by Ponce de Leon in the year 1513.
- Brazil Current
  - The Brazil Current flows from north to south in the eastern part of the Brazilian coast. It is a warm current.
- Agulhas
  - The Agulhas Current flows from north to south in the Indian Ocean. It is a warm current.

- Some major canals of the world
- Erie Canal
  - It was the first canal of the United States. It connects the Great Lakes to New York City via the Hudson River in Albany.
- Suez Canal
  - It was constructed in 1869 and is the shortest sea route between Europe and Asia. It is an artificial sea-level waterway located in Egypt. It connects the Mediterranean Sea to the Red Sea and separates Asia and Africa.
- Hand Dung Grand Canal
  - It is the longest man-made canal in China. It connects Beijing to Hangzhou city in Zhejiang province. Its length is 1,800 kilometers.
- Panama Canal
  - It is an artificial waterway located in Panama. It connects the Atlantic Ocean to the Pacific Ocean. Its construction was completed in 1914. Its length is 82 kilometers.

Discontinuities related to the internal structure of the Earth

- Conrad Discontinuity: It is located between the upper crust and the lower crust.
- Mohorovic Discontinuity: It is located between the lower crust and the upper mantle.
- Repeti Discontinuity: It is located between the upper and lower mantle.
- Gutenberg Discontinuity: It is located between the lower mantle and the outer core.
- Lehman Discontinuity: It is located between the outer core and the inner core.

Facts related to the Caspian Sea

- The Caspian Sea is the largest lake in the world, it contains 40-44% of the total water of all the lakes in the world.
- Coastal countries
  - Turkmenistan
  - Kazakhstan
  - Russia
  - Azerbaijan
  - Iran
- Volga River is a river of Europe. It falls into the Caspian Sea. Volga River is the longest river of Europe and European Russia and an important waterway of Russia

Other names of cyclone

- Indian Ocean - Cyclone
- Caribbean Sea - Hurricane
- China Sea - Typhoon
- Japan - Typhoo

JAI HO STUDY

Made with Xodo PDF Reader and Editor

- Northern Australia - Willi Willi
- Philippines - Baguio
- America - Tornado

Names of island countries of the African continent

- Madagascar
- Seychelles
- Comoros
- Mauritius
- Sao Tome
- Cape Verde

El Nino: A climatic phenomenon

- It occurs when the sea surface in the central and eastern tropical Pacific Ocean becomes warmer than average.
- It is part of the El Niño-Southern Oscillation (ENSO) cycle, which affects climate patterns around the world.
- Increased rainfall: May lead to flooding in the Horn of Africa and the southern United States
- Drought: May lead to drought in northern South America and a weakened Indian monsoon
- More hurricanes: May lead to more hurricanes in the eastern and central Pacific
- Decline in marine life: May lead to a decrease in the number of marine organisms such as fish, plankton

La Niña: A Climate Pattern

- Effects on weather:
  - Temperature
    - During La Niña, the north and Canada are cooler than normal, while the south is warmer than normal.
  - Precipitation
    - La Niña may cause heavy rainfall and flooding in the Pacific Northwest and Canada, while drought may occur in the southern US.
    - Indian monsoon strengthens
- Hurricanes
  - La Nina can cause hurricane seasons to be more severe, with above-average activity in the Atlantic Ocean and below-average activity in the eastern Pacific Ocean.
- Agriculture
  - La Nina can reduce agricultural yields in North and South America, especially for wheat and soybeans.
- Increased marine life
  - La Nina causes cold-water species such as salmon and squid to migrate to the California coast.

Order of continents of the world on the basis of area

1) Asia
2) Africa
3) North America
4) South America
5) Antarctica
6) Europe
7) Australia

Order of continents of the world on the basis of population

1) Asia
2) Africa
3) Europe
4) North America
5) South America
6) Australia
7) Antarctica

Geographers' hypothesis and theories

- Alfred Wegener:- Continental drift theory
- Parker and Morgan:- Theory of plate tectonics
- Pratt and Airy:- Concept of isostasy
- Arthur Holmes:- Theory of convection current

List of time zones by country

- France - 12
- Russia - 11
- United States - 9
- Antarctica - 10
- Australia - 8
- Denmark - 5

Major Era Description

- Paleozoic
  - Marine life and some reptiles originated on land.

JAI HO STUDY

Made with Xodo PDF Reader and Editor

- Precambrian
  - First life was formed after the oceans were formed. Aravalli Mountains and Dharwar series of rocks were formed.
- Cenozoic
  - Current Era, Age of MammalsDuring the Cenozoic Era, the Rockies of North America and the Andes Mountains of South America were formed.
- Mesozoic
  - Middle Age and is the time of the dinosaurs. This era includes the Triassic, Jurassic and Cretaceous periods.

- Four main phases of the Earth's rotation
- Winter Solstice - 21-22 December
  - Summer south of the equator, winter north of the equator. Sun shines directly on the Southern Hemisphere and indirectly on the Northern Hemisphere, Sun is vertical at the southern latitude of Tropic of Capricorn,
  - Southern Hemisphere has the longest day and shortest night
  - Sun rays fall directly on the Tropic of Capricorn
- Spring Equinox - 20-21 March
  - Autumn south of the Equator, Spring north of the Equator. Sun shines equally in the Southern and Northern Hemisphere
- Summer Solstice - 20-21 June
  - Winter south of the Equator, Summer north of the Equator. Sun shines directly on the Northern Hemisphere and indirectly on the Southern Hemisphere
  - North Pole has continuous day for 6 months, Sun is vertical at the northern latitude of Tropic of Cancer
  - Northern Hemisphere has the longest day and shortest night
- Autumn Equinox - 22-23 September
  - Spring south of the Equator, Autumn north of the Equator. Sun shines equally in Southern and Northern Hemisphere
  - Day and night are equal in the world

Countries bordering the Red Sea

- Egypt
- Saudi Arabia
- Yemen
- Sudan
- Eritrea
- Djibouti

Countries in the Arabian Peninsula

- Kuwait
- Oman
- Qatar
- Saudi Arabia
- Jordan
- United Arab Emirates
- Yemen
- Iraq and some southern parts of Jordan

Countries Located on the Equator

- São Tomé and Príncipe
- Gabon
- Republic of Congo
- Democratic Republic of Congo
- Uganda
- Kenya
- Somalia
- Maldives
- Indonesia
- Kiribati
- Ecuador
- Colombia
- Brazil

Countries Located on the Tropic of Cancer

North America Continent

1. Hawaii Islands (United States of America)
2. Bahamas
3. Mexico

- Madagascar

Oceania

- Tonga
- French Polynesia
- Australia

Countries Located on the Prime Meridian

- United Kingdom
- Spain
- France
- Ghana
- Algeria
- Mali
- Togo
- Burkina Faso
- Antarctica

Major Mountain Ranges of the World

- Great Dividing Range: Location – Eastern Australia; Highest point – Kosciuszko
- Trans Antarctica: Location – Antarctica; Highest point – Mount Vinson Massif
- Tien Shan Range: Location – South Central Asia; Highest point – Peak Pobeda
- Altai Mountains: Location – Central Asia; Gora Belukha
- Ural Mountains: Location – Central Russia
- Atlas Mountain Range: Location – Northwest Africa; Highest point – Toubkal
- Verkhojansk Mountains: Location – Eastern Russia
- Sierra Madre Oriental: Location – Mexico; Highest point – Orizaba

JAI HO STUDY

Made with Xodo PDF Reader and Editor

- Zagros Mountains: Location – Iran; Highest point – Zard Kuh
- Elburz: Location – Iran; Highest point – Demavand
- Scandinavian: Location – Western Norway
- Drakensberg: Location – Southeast Africa; Highest mountain of South Africa
- Caucasus: Location – Russia; Highest point – Elbrus
- Alaska: Location – USA; Highest point – Mount McKinley
- Cascade: Location – USA and Canada; Highest point – Mount Rainier
- Apennines: Location – Italy; Highest point – Corno Grande
- Appalachians: Location – Eastern USA and Canada; Highest point – Mount Mitchell
- Alps: Location – Central Europe; Highest point – Mont Blanc
- Grampian: Location – Scotland
- Pennine: Location – England
- Cambrian: Location – England
- Pyrenees: Location – Border of France and Spain; Fold mountains of Alpine system

---

Mountains

- Jura Mountains: Location – France
- Mount Titlis: Switzerland
- Kilimanjaro: Highest mountain of the African continent, located in Tanzania
- Mount Everest: World's and Asia's highest mountain, located in Nepal
- Mount Elbrus: Highest mountain of Russia and Europe
- Aconcagua: Highest mountain of South America
- Mount Kosciuszko: Highest mountain of Australia
- Mount McKinley / Denali: Highest mountain of North America
- Vinson Massif: Highest mountain of Antarctica

Plateaus

Major Plateaus of the World:

- Jado Plateau: Location – Niger
- Antarctic Plateau: Location – In Antarctica; World's second largest plateau
- Laurentian Plateau: Canada
- Taklamakan Plateau: China
- Malwa Plateau: India
- Iranian Plateau: Iran
- Ahaggar Plateau: Algeria/Libya
- Tassili Plateau: Algeria
- Kimberley Plateau: Australia
- Ubangi Plateau: Central Africa
- Bie Plateau: Angola
- Adamawa Plateau: Nigeria
- Loess Plateau: China
- Pamir or Tibetan Plateau: Tibet (China)
- Deccan Plateau: India
- Chota Nagpur Plateau: India
- Meghalaya Plateau: India
- Columbia Plateau: United States of America
- Ozark Plateau: United States of America
- Anatolia Plateau: Turkey

JAI HO STUDY

Made with Xodo PDF Reader and Editor

- Urmia: Iran

Major Lakes of Africa

- Lake Victoria: Kenya, Uganda, Tanzania
- Lake Tana: Ethiopia
- Lake Turkana/Rudolf: Kenya, Ethiopia
- Lake Nasser: Egypt and Sudan
- Lake Tanganyika: Tanzania, Zaire, Burundi, Zambia
- Lake Chad: Cameroon, Nigeria, Chad, Niger
- Lake Volta: Ghana
- Lake Kariba: Zambia and Zimbabwe
- Lake Albert: Uganda and Congo
- Lake Malawi (Nyasa): Malawi, Mozambique, and Tanzania

Major Lakes of North America

- Great Lakes (USA + Canada): Superior, Huron, Ontario, Michigan (only in USA), Erie
- Great Bear Lake: Canada
- Great Slave Lake: Canada
- Athabasca Lake: Canada
- Reindeer Lake: Canada
- Winnipeg Lake: Canada
- Great Salt Lake: USA
- Lake of the Woods: Canada and USA

Major Lakes of South America

- Lake Titicaca: Between Bolivia and Peru
- Lake Maracaibo: Northern Venezuela
- Lake Poopó: Bolivia
- Red Lagoon: Located in Bolivia

Major Lakes of Europe

- Lake Constance: Junction of Germany, Austria, and Switzerland
- Ladoga: Russia
- Onega Lake: Russia
- Vänern and Vättern: Sweden

Major Lakes of Australia

- Lake Eyre: Lowest point of Australia
- Other Lakes: Lake Disappointment, Lake Austin, and Lake Barlee

---

Major Canals of the World

- Suez Canal: Connects the Mediterranean Sea to the Red Sea; world's largest artificial canal; Northern end: Port Said; Southern end: Port Suez; Lakes in the canal from north to south – Timsah, Great Bitter, Little Bitter
- Panama Canal: Country – Panama; connects Pacific Ocean and Atlantic Ocean
- Welland Canal: Country – Canada; connects Lake Erie and Lake Ontario
- Erie Canal: Country – United States of America; connects Lake Erie and Hudson River
- Soo Canal: Country – United States of America; connects Lake Superior and Lake Huron
- New Waterway Canal: Country – Germany; connects North Sea and Rotterdam

JAI HO STUDY

Made with Xodo PDF Reader and Editor

- Kiel Canal: Country – Germany; connects Baltic Sea and North Sea
- North Sea Canal: Country – Germany; connects Amsterdam and North Sea
- Göta Canal: Country – Sweden; connects Gothenburg and Stockholm
- Manchester Canal: Country – Great Britain; connects Liverpool and Manchester
- Volga-Don Canal: Country – Russia; connects Stalingrad and Rostov
- Albert Canal: Country – Belgium; connects Antwerp and Liège
- K.P. Canal: Country – India; connects Tamil Nadu and Andhra Pradesh
- Ludwig Canal: Used as inland waterway in Southern Germany
- Sault Sainte Marie Canal: Located in Canada
- White Sea Canal: Country – Russia; connects White Sea and Lake Onega

---

Major Dams of the World

- Rogun Dam: Tajikistan
- Nurek: Tajikistan
- Owen Dam: Located on White Nile River
- Sennar Dam: Located on Blue Nile River in Sudan
- Aswan Dam: Located on Nile River in Egypt
- Inga Dam: Located on Congo River
- Cahora Bassa Dam: Located on Zambezi River in Mozambique
- Kariba Dam: Located on Zambezi River
- Kainji Dam: Located on Niger River
- Akosombo Dam: On Volta River in Ghana

Cold Local Winds

- Mistral: Spain and France
- Northern: United States of America
- Norte: Mexico and United States of America
- Williwaw: Alaska
- Pampero: Argentina and Uruguay
- Papagayo: Mexico
- Purga: Tundra region (Russia)
- Bise: Eastern France, Switzerland
- Burán: Russia
- Bora: Adriatic coast
- Cape Doctor (Table Block): Republic of South Africa
- Haboob: Sudan
- Sistan: Eastern Iran
- Tramontane: Central Europe
- Levanter: Spain
- Norte: USA and Mexico
- Gregale: Mediterranean region of Southern Europe
- Zorn: Jura Mountains (Switzerland)
- Southerly Busters: New South Wales (Australia)

Hot Local Winds

- Chinook: Rocky Mountains (USA)
- Sirocco: Italy
- Fohn: Alps Mountains (Switzerland)
- Brickfielder: Australia
- Simoom: Arabian Desert
- Black Roller: Plains of North America
- Ghibli: Libya

- Salto Angel: World's highest waterfall; on Rio Caroni/Churun River in Venezuela
- Tugela: South Africa
- Kukenaam: Venezuela
- Mardalsfossen: Norway
- Tagfossen: Norway
- Yosemite: California (USA)
- Della: Canada
- Gavarnie: France
- Victoria: On border of Zambia and Zimbabwe
- Sutherland: New Zealand
- Ribbon: California (USA)
- Niagara: On the border of USA and Canada

Major Plateaus of the World

- Pamir or Tibetan Plateau: Tibet (China)
- Deccan Plateau: India
- Chota Nagpur Plateau: India
- Meghalaya Plateau: India
- Columbia Plateau: United States of America
- Ozark Plateau: United States of America
- Anatolia Plateau: Turkey
- Shan Plateau: Myanmar
- Libyan Plateau: Libya and Egypt
- Mongolian Plateau: Mongolia and China
- Asia Minor Plateau: Iran
- Abyssinian Plateau: Ethiopia
- Colorado Plateau: United States of America
- Piedmont Plateau: United States of America
- Patagonia Plateau: Argentina
- Guiana Plateau: Venezuela, Guyana, Suriname, French Guiana
- Mato Grosso Plateau: Brazil
- Brazilian Plateau: Central-Eastern South America
- Bolivian Plateau: In the Andes Mountains of Bolivia
- Potwar Plateau: Pakistan
- Khorat Plateau: Thailand
- Meseta Plateau: Iberian Peninsula (Spain)
- Chiapas Plateau: Southern Mexico
- Alaska/Yukon Plateau: Southern Mexico
- Great Basin Plateau: United States of America
- Jado Plateau: Niger
- Antarctic Plateau: In Antarctica; World's second largest plateau
- Laurentian Plateau: Canada
- Taklamakan Plateau: China
- Malwa Plateau: India
- Iranian Plateau: Iran
- Ahaggar Plateau: Algeria/Libya
- Tassili Plateau: Algeria
- Kimberley Plateau: Australia
- Ubangi Plateau: Central Africa
- Bie Plateau: Angola
- Adamawa Plateau: Nigeria
- Loess Plateau: China

Major Valleys of the World

- Valley of the Kings: Location – Egypt; situated on the western bank of the Nile River

JAI HO STUDY

- King Valley: Australia
- Humber Valley: Canada
- Wollgon Valley: Australia
- Pleasant Valley: United States of America
- Grand Valley: United States of America; located between the Rocky Mountains and Sierra Nevada
- Po Valley: Italy
- Ebro Valley: Spain
- Silicon Valley: Located in Northern California, USA, in the southern part of San Francisco Bay; computer chip production region
- Taylor Valley: Located in Antarctica; discovered by Robert Falcon Scott
- Panjshir Valley: North of Kabul (Afghanistan)
- Chumbi Valley: At the border of India, Bhutan, and Tibet

Other Major Volcanoes and Their Location

- Mount Kinabalu: Malaysia
- Alburz: Iran
- Colima: Mexico
- Mount Rainier: USA
- Mount Taal: Philippines
- Popocatépetl: Mexico
- Mount Shasta: USA
- Sabancaya: Peru
- Mount Merapi: Indonesia
- Paricutin: Mexico
- Erebus: Antarctica
- Villarrica: Chile
- Mount Sinabung: Indonesia
- Arenal, Irazú: Costa Rica
- Lamington: Papua New Guinea
- Pinatubo: Philippines
- Rainier: USA
- Kelimutu: Indonesia
- Tocana: Guatemala and Mexico
- Katmai: Alaska
- Shasta and Hood: USA
- Hekla and Laki: Iceland
- Lassen Peak: USA

General Science

Here is a list of electromagnetic waves with their respective wavelength ranges: (Increasing order)

1. Gamma rays: Wavelength less than 10 picometers.
2. X-rays: Wavelength between 0.01 nanometer (nm) to 10 nanometer (nm).
3. Ultraviolet (UV) rays: Wavelength between 10 nanometer (nm) to 400 nanometer (nm).
4. Visible light: Wavelength between 400 nanometer (nm) to 700 nanometer (nm).
5. Infrared (IR) rays: Wavelength between 700 nanometer (nm) to 1 millimeter (mm).
6. Microwaves: Wavelength between 1 millimeter (mm) to 1 meter (m).
7. Radio waves: wavelengths longer than 1 meter (m).

These ranges are approximate and may vary depending on the source and context.

Fuel gases and their main components -

- CNG - methane, ethane
- LPG - butane, propane
- Coal gas - hydrogen, methane, carbon monoxide
- Water gas - carbon monoxide, hydrogen
- Biogas - methane
- Natural gas - methane (in small quantity ethane, propane)

Types of glass and their uses -

- Flint glass - in camera, telescope, lens
- Pyrex glass - laboratory equipment
- Soda glass - in tube light, bottle
- Crown glass - in making electric bulbs
- Crookes glass - in lenses of sunglasses
- Potash glass - in making glass utensils
- Soft glass - in making test tubes

Important laws of science -

- Pascal's law - In equilibrium, the pressure of the liquid is equal on all sides. • Hooke's Law - Within the elastic limit, stress is always proportional to strain.
- Boyle's Law - At a given temperature, the volume of a given quantity of a gas is inversely proportional to its pressure.
- Archimedes Principle - The upthrust exerted on a solid immersed in a fluid is equal to the weight of the fluid displaced by the solid.

Events caused by surface tension-

- Floating of a thin needle on the surface of mercury
- Washing of clothes with soap or detergent
- Formation of large bubbles of soap solution
- By sprinkling kerosene on the surface of water
- Death of mosquito larvae
- Tasty taste of hot soup
- Hair of shaving brush stick together
- Pouring of oil to calm the waves of sea
- Spreading of oil on the surface of water
- Spherical shape of raindrops
- Production of coolness by sprinkling water

Major electromagnetic waves and their applications-

- Electromagnetic waves - Uses
- Radio waves - Used in the transmission of waves of cellular phones, radio, TV
- Microwaves - Used in sending information from radar and satellites and in microwave ovens
- Infrared rays - Remote control and washing of patients For
- Gamma rays - To destroy nuclear reactions and cancer cells

Important Terminology

- Endemic
  - When a disease is permanently present in a particular area population, then this condition is called endemic
- Epidemic
  - An infectious disease spreading rapidly in a large number of people in a given population in a short period of time is called epidemic
- Pandemic
  - The spread of epidemic condition in a large area of the world is called pandemic (COVID-19)

Major isotopes and their use

- Uranium - 235 : To find out the age of rocks
- Sodium - 24 : To detect blood clots

JAI HO STUDY

Made with Xodo PDF Reader and Editor

- Cobalt - 60 : To control blood cancer
- Arsenic - 74 : To detect tumors
- Phosphorus - 32 : In the treatment of leukemia
- Iodine - 131: In the treatment of thyroid gland

Important natural acids

- Vinegar - Acetic acid
- Orange, lemon - Citric acid
- Tamarind, grapes - Tartaric acid
- Tomato - Oxalic acid
- Ant, scorpion sting - Methanoic acid

Glass and their uses

- Flint glass - In the lens of camera telescope
- Pyrex glass - Laboratory equipment
- Soda glass - Tubelight
- Crookes glass - Lenses of sunglasses

Major branches of biology

- Horticulture - Garden science
- Floriculture - Cultivation of flowers
- Pomology - Study of fruits
- Enthology - Study of flowers
- Sericulture - Silkworm rearing
- Apiculture - Beekeeping
- Entomology - Study of insects
- Ornithology - Study of birds

Vitamins and diseases caused by their deficiency

- Vitamin A (Retinol) - Night blindness
- Vitamin C (Ascorbic acid) - Scurvy
- Vitamin D (Calciferol) - Rickets (in children) Osteomalacia (in adults)
- Vitamin E (Tocopherol) - Decrease in fertility
- Vitamin K (Phylloquinone) - Failure to form blood clots

Main crops and suitable climate

- Rice - Hot and humid climates
- Wheat - Subtropical and temperate climates
- Jowar - Dry climates
- Cotton - Semi-arid climates

Types of medicines in daily use

- Antacids - reduce excess acid in the stomach (e.g. magnesium hydroxide, ENO etc.)
- Tranquilizers - used in treating stress and mental illness
- Analgesics - to relieve pain (aspirin etc.)
- Narcotic analgesics - pain relievers that may cause addiction (e.g. morphine and its derivatives)
- Antiseptics - kill bacteria (e.g. soframycin, dettol, tincture iodine etc.)
- Antibiotics - chemical substances produced by micro-organisms that kill and inhibit their growth (e.g. penicillin, sulpha drugs, streptomycin)

Chemical compounds and their common names

- Copper sulphate - blue vitriol
- Magnesium sulphate - Epsom salt
- Sodium carbonate - Washing soda
- Calcium sulphate hemihydrate - Plaster of Paris
- Calcium sulphate dihydrate - Gypsum

Gases and their properties

- Carbon monoxide (CO) - Formation of carboxyhaemoglobin in blood impairs oxygen carrying capacity, followed by death
- Nitrous oxide (N2O) - Laughing gas
- Carbon dioxide (CO2) - Responsible for greenhouse effect (0.03% in atmosphere)
- Methane (CH4) - Main component of biogas and CNG
- Radon - Noble gas not found in atmosphere
- Chlorine - Gas used to purify pond water
- Butane - Main component of LPG

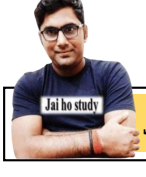

Carbon and its compounds/ properties

- Main allotropes of carbon -
  - Diamond
  - Graphite
  - Buckminsterfullerene (C60)
- Thin layer of pure carbon - graphene
- Dry ice - solid CO2
- Hardest natural allotrope of carbon - Diamond
- Thermodynamically most stable form of carbon - graphite

Metals and Nonmetals

- Metal found in blood - Iron

JAI HO STUDY

Made with Xodo PDF Reader and Editor

Quick Revision for UPPSC Prelims 2025

- Lightest metal - Lithium
- Filament used in electric bulb is made of - Tungsten
- Best conductor of heat - Silver
- Can be easily cut with a knife - Sodium
- Heaviest metal - Osmium
- Hardest metal - Platinum
- Liquid non-metal at room temperature - Bromine

Important facts related to animals

- Mammals Class 3 Subclass-
  - Prototheria: Lay eggs. Example: Echidna, Platypus
  - Metatheria: Give birth to immature babies, which stay in a pouch called massupial until they develop. Example- Kangaroo
  - Eutheria: Give birth to fully developed babies, e.g. humans
  - Goat has the highest blood temperature among mammals. (Average temperature 39°C)
  - Duck billed platypus is the only poisonous mammal

• Animal class and number of chambers in their heart-

- Reptiles - 3 chambered heart (exception crocodiles have 4 chambered heart)
- Fish class - 2 chambered heart
- Bird class - 4 chambered heart
- Mammals - 4 chambered heart
- Amphibians - 3 chambered heart

Important facts related to cell in biology

- Factory of protein - Ribosome
- Kitchen of the cell - Chloroplasts
- Power house of the cell - Mitochondria
- Suicidal bag of the cell - Lysosome
- Discovery of nucleus - Robert Brown
- Discovery of DNA - Frederick Miescher
- Double hedlix model of DNA - Watson and Crick

Important Laws of Science

• Pascal's Principle:

  - Pascal's law is the principle of fluid pressure transmission.
  - According to it, "Pressure applied anywhere in a confined fluid is transmitted equally in all directions throughout the fluid"
  - Some machines based on Pascal's law: Hydraulic lift, hydraulic press, hydraulic brake.

- Hooke's Law
  - Within the elastic limit, stress is always proportional to strain.
  - Young's modulus tells the stiffness of the skin or its possibility of deformation

- Archimedes' Principle
  - The upthrust applied on a solid immersed in a fluid is equal to the weight of the fluid displaced by the solid.
  - Archimedes' principle is used in making hydrometers, ships, and submarines.

- Boyle's Law
  - The volume of a given quantity of a gas at a given temperature is inversely proportional to its pressure.

Fat-soluble vitamins

- Vitamin A (retinol, beta-carotene)
- Vitamin D (calciferol)
- Vitamin E (tocopherol)
- Vitamin K (phylloquinone, menaquinone)

Major branches of science

- Osteology → Study of bones
- Aeronautics → Branch of science related to aeroplanes
- Astronomy → Study of celestial bodies
- Ecology → Study of the relationship between organisms and the environment
- Ethnology → Comparative study of different cultures
- Ethnography → Study of a specific culture
- Ethology → Study of animal behaviour
- Ichthyology → Study of the structure and function of fish
- Entomology → Scientist of insects Study
- Anthology → Study of flowers
- Arboriculture → Science related to tree production

JAI HO STUDY

Made with Xodo PDF Reader and Editor

- Archaeology → Branch of science related to archaeology
- Orthopaedics → Study of bone healing
- Ornithology → Study of birds
- Epigraphy → Study of epigraphic knowledge

Brief History of Human Blood Group

- Blood groups were discovered by Karl Landsteiner in 1901.
- He identified antigens and antibodies present in human blood, based on which he classified 4 blood groups – A, B, AB, O.
- Landsteiner received the Nobel Prize in Physiology, Medicine in 1930
- Type A :
    - It contains A antigen and produces antibodies against B. • Type B :
    - It contains B antigen and forms antibodies against A.
- Type AB : Universal Receptor
    - It contains both A and B antigens, which makes it a universal recipient (can receive blood from any type.)
- Type O : Universal Donor
    - It does not contain A and B antigens, which makes it a universal donor (can donate blood from any type) but can only receive O blood.

Important Facts about Convex Lens

- This lens converges the direct beam of light.
- This lens is thick in the middle and thin at the edges.
- Convex lens is used to correct hypermetropia or farsightedness.
- Applications: Rear view mirrors in vehicles, lenses in human eyes, projectors, cameras, focused sunlight, ordinary telescopes, projector microscopes, magnifying glasses, etc.
- Convex lenses can form real or virtual images depending on the position of the object.
- Convex lenses are converging

Important facts about concave lenses

- A concave lens is a type of lens that has at least one edge curved inward.
- A concave lens forms a smaller image for the viewer. •)(Concave lens is thinner at the centre than at the edges.
- Concave lens is used in spectacles to correct myopia or nearsightedness.
- Applications: Dentist mirror, vision correction, camera, flashlight, laser equipment, telescope, peephole, etc.
- Concave lens forms small, erect and virtual image.
- Concave lens is diverging lens

Chemical Compounds / Aliases / Formulas

- Nitrous oxide: Laughing gas: N2O
- Chloropicrin: Tear gas: C10H5ClN2
- Calcium hydride: Hydrolith: CaH2
- Dichlorodifluoromethane: Freon: CF2Cl2
- Calcium sulphate dihydrate: Gypsum: CaSO4. 2H20
- Calcium hydroxide: Slaked lime: Ca(OH)2
- Phenol: Carbolic acid: C6H60
- Carboxyl chloride: Phosgene: COCl2
- Methane: Marsh gas: CH4
- Sodium chloride: Table salt: NaCl

Various diseases and their causes

- Bacteria: Sore throat, tuberculosis, cholera, typhoid, urinary tract infections, E. coli and whooping cough, leprosy, pneumonia, diphtheria
- Viruses: Measles, chicken pox, polio, common cold, AIDS, mumps, rabies, COVID-19, influenza
- Fungi: Ringworm, athlete's foot, fungal nail infections, vaginal candidiasis and thrush, aspergillosis
- Parasitic protozoa: Malaria, giardiasis, toxoplasmosis, hookworm and pinworm, sleeping sickness amoebiasis leishmaniasis
- Influenza – caused by mycovirus (RNA virus).
- Common cold – caused by many types of viruses, usually rhino-virus (RNA virus).
- Chickenpox – caused by variola virus (DNA virus).
- Chickenpox - caused by Varicella-Zoster.
- Acquired Immunodeficiency Syndrome, (AIDS) - which is caused by Human Immunodeficiency Virus (HIV).
- German Measles - caused by Rubella Virus.
- Measles - caused by Paramyxovirus (RNA Virus).

JAI HO STUDY

Made with Xodo PDF Reader and Editor

Major medical equipments

- Stethoscope -Used to measure the heart beat rate.
- Pacemaker - Used to bring the heart rate to normal when it becomes too high or too low. • Sphygmomanometer - Used to measure blood pressure
- Computed Tomography or CT Scan - Used to see bones, muscles, joints (knee, shoulder, etc.), internal organs like heart, stomach and intestines, fat tissue and blood vessels
- Electrocardiography (ECG) - Used to detect cardiac abnormalities.
- Electroencephalogram (EEG) - Used to detect brain abnormalities.
- Auto analyser - Used to check glucose, urea, cholesterol etc.
- Magnetic Resonance Imaging (MRI) - Used to accurately detect abnormalities or deformities in the entire body or organs. Some important facts related to cell in biology

• Factory of protein -

- Ribosomes are responsible for protein synthesis within the cell.
- Kitchen of the cell -
  - Chloroplast is the organelle that helps plants to make food in the process of photosynthesis.
- Power house of the cell
  - Mitochondria is responsible for energy production (ATP) and is called the "powerhouse of the cell".
- Suicide bag of the cell
  - Lysosomes contain enzymes that destroy useless or harmful components of the cell, hence it is called the "suicide bag".
- Discovery of nucleus
  - Robert Brown discovered the nucleus within the cell in 1831. • Discovery of DNA
  - Frederick Miescher discovered DNA (deoxyribonucleic acid) in 1869
- Double helix model of DNA
  - James Watson and Francis Crick presented the model of double helix structure of DNA in 1953

Characteristics of Prokaryotic Cells

- Prokaryotic cells do not have a true nucleus. Their DNA is found in the nucleoid region, which is not surrounded by a membrane.
- These cells are small, (1-10 micrometers) DNA is circular and not organized like chromosomes.
- They do not have membrane-bound organelles, such as mitochondria, Golgi bodies, and endoplasmic reticulum.
- Ribosomes are small (705), which help in protein synthesis.
- Their cell membrane is semi-permeable, which regulates the movement of substances in and out of the cell.
- Most prokaryotic cells have a cell wall, in bacteria it is made of peptidoglycan.
- They have organelles of movement, Flagella (Cilia)
- They divide by binary fission,
- Example: Major bacteria and Archaea

Characteristics of Eukaryotic Cells

- It contains true nucleus surrounded by nuclear membrane. DNA is organized in it in the form of chromosomes
- These cells are large in size, (10 - 100 micrometers)
- Membrane-bound organelles - like mitochondria, golgi bodies, endoplasmic reticulum,
- Lysosomes etc. are found
- Contain large (80S) ribosomes which help in protein synthesis
- Division occurs by mitosis and meiosis
- Eukaryotic cells of plants and fungi have cell wall; in plants it is made up of cellulose while in fungi it is made up of chitin. Animal cells do not have a cell wall
- Rough and smooth endoplasmic reticulum (ER) are found, which helps in protein and lipid synthesis
- Examples include cells of plants, animals, fungi and protists

Important facts related to cells

Cell theory:

- Schleiden and Schwann propounded the cell theory in 1838-39, which stated that all

JAI HO STUDY

Made with Xodo PDF Reader and Editor

organisms are made up of cells, and it is the basic unit of life.

Cell membrane:

- It is the outer layer of the cell which is semi-permeable. It controls the substances entering and leaving the cell.

Cytoplasm:

- It is the jelly-like substance of the cell, in which various cellular organs (organelles) are found.

Golgi Bodies:

- traffic police of the cell
- It synthesizes, stores and transports substances in the cell.

Endoplasmic reticulum (ER):

- It synthesizes proteins and lipids in the cell.
- It is divided into two types: rough endoplasmic reticulum and smooth endoplasmic reticulum.

Features of Human Brain:

- The human brain is divided into three parts or compartments with different functions: the fore-brain, mid-brain and hind-brain
- The human brain along with the spinal cord forms the central nervous system.
- Fore-brain - is the main thinking part and controls voluntary actions.
- It processes sensory information which is collected from various body parts like ears, eyes, nose tongue, skin etc.
- Midbrain – is a small central part of the brain stem, which acts as a bridge to transmit signals.
- Brain stem connects the fore-brain to the spinal cord and includes the cerebellum, pons and medulla oblongata.
- Hindbrain – controls heart rate, breathing, blood pressure, sleep, walking etc.
- Cerebellum helps in maintaining balance, body equilibrium and posture while walking, riding etc.

Standard units of measurement

- Length : metre (m)
- Mass : kilogram (kg)
- Time : second (s)
- Electric current : ampere (A)
- Temperature : Kelvin (K)
- Amount of substance : mole (mol)
- Light intensity : candela (cd)
- Power of lens : diopter
- Heat : joule
- Pressure : pascal
- Inductance (H) : henry
- Resistivity or specific resistance : ohm-metre
- Radioactivity : becquerel

Applications of refraction, reflection

Examples of refraction :

- Twinkling of stars in a clear sky
- Pond of water
- Swimming pool appearing less deep than it actually is
- Rainbow formation
- Movie projector
- Prism

Examples of reflection :

- Our image in a mirror
- Kaleidoscope
- Flashlight

Key characteristics of sound waves

- Wavelength: The distance travelled by a sound wave before it repeats itself.
- Amplitude: Represents the maximum displacement of particles in the medium; higher amplitude means louder sound.
- Frequency: The number of waves produced per second; higher frequency means higher-pitched sound.
- Time period: The time required to complete one wave cycle.
- Velocity: The speed at which a sound wave travels. Electromagnetic waves:
- In decreasing order of wavelength
  - Radio wave
  - Microwave
  - Infrared wave
  - Visible wave
  - Ultraviolet wave
  - X-rays

Made with Xodo PDF Reader and Editor

- Gamma-rays
- In decreasing order of energy/frequency
  - Gamma-rays
  - X-rays
  - Ultraviolet wave
  - Visible wave
  - Infrared wave
  - Microwave
  - Radio wave

Electromagnetic waves- Discoverer

- Gamma rays - Becquerel
- X-rays - Rongen
- Ultraviolet rays - Ritter
- Visible radiation - Newton
- Infrared radiation - Herschel
- Short radio waves - Heinrich Hahn
- Long radio waves - Marconi

Diseases caused by metals

- Blue baby syndrome - Nitrates
- Minamata - Mercury
- Itai-itai - Cadmium (Cd)
- Blackfoot - Arsenic
- Knee - knock syndrome - Fluoride

Diseases caused by bacteria

- Tetanus - Clostridium tetani
- Cholera - Vibrio cholerae
- Typhoid - Salmonella typhi
- Tuberculosis (TB) - Mycobacterium Tuberculosis
- Diphtheria - Corynebacterium diphtheria
- Plague - Pasteurella pestis or Yersinia pestis
- Whooping cough - Bordetella pertussis
- Pneumonia Streptococcus pneumonia
- Leprosy - Mycobacterium leprae
- Gonorrhoea - Neisseria gonorrhoeae
- Syphilis - Treponema pallidum

Plant diseases caused by deficiency of major elements

- Zinc (Zn) - Khaira disease in rice
- Zinc (Zn) - White bud disease in maize
- Zinc (Zn) - Little leaf disease of citrus
- Boron (B) - Browning disease in cauliflower
- Boron (B) - Hort rot of beet
- Copper (Cu) - Dieback disease in citrus
- Molybdenum (Mo) – Whiptail disease in cabbage

Important Alloys

- Brass – Zinc (Zn) + Copper (Cu)
- Bronze – Copper (Cu) + Tin (Sn)
- Solder – Tin + Lead
- Steel – Iron (Fe) + Carbon (C)
- German Silver – Zn+Cu+Ni(Nickel)
- Stainless Steel – Iron (Fe)+Chromium (Cr)+Ni
- Amalgam – Mercury (Hg) + Other metals (except iron)

Sound Waves Based on Frequency

- Supersonic : An object moving faster than the speed of sound which is 1 Mach.
- Hypersonic: An object travels at a speed of 5.0-100
- Ultrasonic: A wave has a frequency greater than 20,000 Hz, which is beyond human hearing.
- Infrasonic: A wave has a frequency less than 20 Hz, which is below human hearing.
- Subsonic: The wave travels slower than the speed of sound.

Major diseases of plants

Major bacterial diseases of plants

- Potato Wilt - Pseudomonas solanacearum
- Crown gall disease - Agrobacterium tumefaciens
- Black rot of Cabbage - Xanthomonas campestris
- Lemon Canker - Xanthomonas citri

Major fungal diseases of plants

- Black rust of wheat - Puccinia graminis tritici
- Loose Smut of Wheat - Astilago nuda tritici
- Early blight of Potato - Alternaria solani
- Late blight of Potato - Phytophthora infestans
- Wart disease of potato - Synchytrium endobioticum
- Tikka disease of groundnut - Cercospora personata

JAI HO STUDY

Made with Xodo PDF Reader and Editor

- Red rot disease of sugarcane - Collatothacum falcatum

Difference between physical change and chemical change

- Physical change
  - In physical change no new substance is formed, it is a temporary change, easily reversible.
  - Usually a very small amount of heat (or light) energy is absorbed or released.
  - In physical change the substance does not change.
  - Examples - freezing of water, boiling of water, melting of wax etc.
- Chemical change
  - In chemical change new substance is formed, it is a permanent change, often irreversible.
  - In this a large amount of heat (light) energy is absorbed
  - Examples - digestion of food, burning of paper, rusting of metal, tarnishing of silver etc. Burning of fuel, such as LPG or petrol, curdling of milk.

Important hormones and their functions

- Estrogen: It is responsible for reproduction, menstrual cycle and menopause
- Progesterone: It plays an important role in maintaining pregnancy
- Prolactin: After childbirth, this hormone is released by the pituitary gland in women to induce lactation
- Testosterone: In men, it plays an important role in the development of male reproductive tissues testes and prostate
- Insulin: It controls the level of blood sugar.

Insectivorous plants

- Nitrogen is absent in insectivorous plants. To fulfil their nitrogen deficiency, they attract insects with their scent and eat them. Such as:
  - Pitcher plant (Nepinthes) Drosera (Sundews)
  - Dionaea
  - Cerrosenia
  - Utricularia (Bladderwort)

Plant hormones and their functions

- Auxins - Increase in the length of cells, help in cell division, control the movements of plants, prevent leaves from falling, help in the production of seedless fruits.
- Gibberellins - Help in quick germination of seeds, increase the height of dwarf plants, help in widening the leaves of plants.
- Cytokinin - Helps in protein synthesis, increases the length of cells and stem, helps in growth of lateral buds, prevents growth of roots and leaves and produces catalyst at the time of germination
- Abscissic acid (ABC) growth inhibitor - controls the opening and closing of leaves and flowers, encourages the process of defoliation and reduces the growth rate of plants.

Important vitamins and diseases caused by their deficiency

- Vitamin A (Retinol) - Night blindness and xerophthalmia, susceptibility to infections
- Vitamin B1 (Thiamine) - Stunted growth, loss of appetite and weight, beriberi, fatigue, stomach upset
- Vitamin B2 (Riboflavin) - Blisters on tongue, premature ageing, intolerance to light, cheilosis
- Vitamin B3 (Niacin) - Smooth tongue, boils on skin, digestive problems
- Vitamin B5 (Pantothenic acid) - Muscle paralysis, burning sensation in feet etc. • Vitamin B6 (Pyridoxine) – Skin diseases, brain dysfunction, anemia

Diseases caused by protozoa

- Diseases – Protozoa
- Amoebic dysentery – Entamoeba histolytica
- Kala azar – Leishmania donovani
- Malaria – Plasmodium parasite
- Sleeping sickness – Trypanosoma brucei

Newton's 3 Laws of Motion

- Physicist and astronomer Sir Isaac Newton introduced the laws of motion in his seminal work "Philosophiae Naturalis Principia Mathematica" (Mathematical Principles of Natural Philosophy) in 1687

Made with Xodo PDF Reader and Editor

- First Law (Law of Inertia) – An object remains in its state of motion or at rest unless an external force is applied on it.
- Second Law - The rate of change in momentum is proportional to the applied force and the change takes place in the same direction in which the force is applied i.e. - F=ma
- Third Law (Law of action-reaction) - For every action there is an equal and opposite reaction. For example - getting a jerk backwards while firing a bullet from a gun, moving a rocket forward etc.

Devices that convert energy

- Dynamo - mechanical energy into electrical energy
- Microphone - sound energy into electrical energy
- Loudspeaker - electrical energy into sound energy
- Solar cell - solar energy into electrical energy
- Tubelight - electrical energy into light energy
- Electric motor - electrical energy into mechanical energy
- Electric bulb - electrical energy into light and heat energy
- Electric cell - chemical energy into electrical energy
- Sitar - mechanical energy into sound energy

Events occurring due to total internal reflection

- Shining of diamond
- Mirage in desert and in cold regions
- Appearance of mirage
- A cracked part of glass appearing shiny
- Optical fibers
- Air filled bubble in water Shining
- Soot coated ball

Water soluble vitamins

- Vitamin B1 (thiamine)
- Vitamin B2 (riboflavin)
- Vitamin B3 (niacin)
- Vitamin B5 (pantothenic acid)
- Vitamin B6 (pyridoxine)
- Vitamin B7 (biotin)
- Vitamin B9 (folate or folic acid)
- Vitamin B12 (cobalamin)
- Vitamin C (ascorbic acid)

- Branches and Sub-branches of Biology
  - Ornithology – Study of birds
  - Ecology – Study of all organisms and their interrelationships and the effect of environment
  - Paleobiology – Study of fossils
  - Phrenology – Study of the functions of various parts of the brain and its treatment
  - Anthology – Study of flowers
  - Entomology – Scientific study of insects
  - Herpetology – Study of reptiles
  - Melanology – Study of melanin and its diseases
  - Genetics – Study of hereditary traits and inheritance in organisms
  - Hematology – Study of blood, blood cells and vital organs of human beings
  - Virology – Study of viruses
  - Taxonomy – Study of classification and scientific description of organisms
  - Ethnography – Study of a particular culture
  - Ethology – Study of behavior of all organisms including humans
  - Ethics – Psychological study of moral conduct and duty
  - Biosinesis – Study of properties and characteristics of the living world and their impact on systems
  - Bionomics – Study of organisms and their relation with environment
  - Bionomy – Study of the rules of life
  - Agronomy – Study of crop cultivation
  - Gerontology – Science related to post-death, ageing and effect of time
  - Oncology – Study of cancer and related tumors
  - Distectology – Study of abnormalities in physical development
  - Pedology – Scientific study of soil and its types
- ---
- Other Branches
  - Osteology – Study of bones
  - Orology – Study of mountains

JAI HO STUDY

Made with Xodo PDF Reader and Editor

- Cytology – Study of cells
- Helminthology – Study of worms
- Ichthyology – Study of fishes
- Dermatology – Study of skin and its diseases
- Nutritionology – Study of nutrition and methods of nourishment
- Pathology – Study of symptoms of diseases
- Bacteriology – Study of bacteria
- Entomology – Study of insects
- Mycology – Study of fungi
- Pathology – Study of nature, symptoms and causes of diseases
- Therapeutics (Lithotripsy) – Medical procedure using ultrasonic waves to treat kidney stones etc.
- Neurology – Study of nervous system
- Hematology – Study of blood
- Serology – Study of serum
- Chronology – Study of events in order of time
- Mammalogy – Study of mammals
- Anthropology – Study of human body and cultures
- Physiology – Study of functions of different parts of the body

- Five Kingdoms and Organisms
  - Monera → Bacteria, Blue-green algae, Archaebacteria
  - Protista → Amoeba, Paramecium, Euglena, Diatoms, Plasmodium
  - Fungi → Yeast, Bread mold, Mushroom, Penicillium
  - Plantae → Algae, Bryophyta, Pteridophyta, Gymnosperms, Angiosperms
  - Animalia → Sponges, Insects, Fishes, Amphibians, Reptiles, Birds, Mammals
- ---
- Classification of Plant Kingdom
  - Thallophyta → Algae (Spirogyra, Euglena, Cladophora)
  - Bryophyta → Marchantia, Moss (Funaria), Riccia
  - Pteridophyta → Fern, Equisetum, Selaginella
  - Gymnosperm → Cycas, Pines, Neetu
  - Angiosperm → Wheat, Maize, Mango, Apple, Mustard, Sunflower
- Scientific Names of Important Organisms
  - Human → Homo sapiens
  - Cow → Bos taurus
  - Cat → Felis catus
  - Dog → Canis lupus familiaris
  - Housefly → Musca domestica
  - Lion → Panthera leo
  - Mango → Mangifera indica
  - Rice → Oryza sativa
  - Wheat → Triticum aestivum
  - Chickpea → Cicer arietinum
  - Pea → Pisum sativum
- Fathers of Various Branches of Botany
  - Discovery of bacteriophage → Twort d'Herelle
  - Father of Taxonomy → Carolus Linnaeus
  - Father of Genetics → G. J. Mendel
  - Father of Modern Embryology → Von Baer
  - Father of Plant Pathology → A. J. Butler
  - Father of Plant Physiology → Stephen Hales
  - Father of Eugenics → Francis Galton
  - Father of Microbiology → Louis Pasteur
  - Father of Immunology → Edward Jenner
  - Father of Bacteriology → Leeuwenhoek
  - Father of Botany → Theophrastus
- Fathers of Various Branches of Zoology
  - Zoology → Aristotle
  - Medicine → Hippocrates
  - Genetics → G. J. Mendel
  - Microbiology → Louis Pasteur
  - Immunology → Edward Jenner
  - Paleontology → Robert Hooke
  - Radiation Genetics → A. D. Muller
  - Comparative Anatomy → G. Cuvier
  - Modern Genetics → Watson
  - Gerontology → Walter C. Macquet
  - Modern Physiology → Adrian Williams
  - Blood Circulation → William Harvey
  - Anatomy → Andreas Vesalius

JAI HO STUDY

Made with Xodo PDF Reader and Editor

• Taxonomy → Carolus Linnaeus
• Bacteriology → Louis Pasteur, Dr. Vinci

- GS InShort [Science]
  • Modern Embryology → Karl E. Von Baer
  • Evolutionism → Charles Darwin
  • Eugenics → Francis Galton
  • Microbiology → Marcello Malpighi
  • Endocrinology → Schafer Addison
- Cell Organelles and Their Nicknames
  • Nucleus → Control center of all cell activities
  • Mitochondria → Powerhouse of the cell, Energy house of the cell
  • Lysosome → Suicide bag of the cell
  • Chloroplast → Photosynthesis center of the cell, Cell within a cell
  • Ribosome → Protein synthesis center of the cell
  • Chromosome → Carrier of genetic traits
- Major Vitamins, Sources and Deficiency Diseases
  • Vitamin A (Retinol) → Deficiency disease: Night blindness, Xerophthalmia, Infections, Skin cell changes
  • Vitamin B1 (Thiamine) → Deficiency disease: Beriberi, Growth retardation
  • Vitamin B2 (Riboflavin) → Deficiency disease: Cheilosis
  • Vitamin B3 (Niacin or Nicotinic acid) → Deficiency disease: Pellagra
  • Vitamin B5 (Pantothenic acid) → Deficiency disease: Skin disease, Stunted growth, Hair greying
  • Vitamin B6 (Pyridoxine) → Deficiency disease: Anemia, Skin disease, Muscular cramps
  • Vitamin B7 (Biotin) → Deficiency disease: Skin disease, Hair fall
  • Vitamin B9 (Folic acid) → Deficiency disease: Anemia, Developmental problems in fetus
  • Vitamin B12 (Cyanocobalamin) → Deficiency disease: Pernicious anemia, Nervous system disorders
  • Vitamin C (Ascorbic acid) → Deficiency disease: Scurvy
  • Vitamin D (Calciferol) → Deficiency disease: Rickets, Osteomalacia
  • Vitamin E (Tocopherol) → Deficiency disease: Infertility, Genital and muscular weakness
  • Vitamin K (Menadione/Phylloquinone) → Deficiency disease: Failure of blood clotting on injury
- Bacterial Diseases
  Disease – Bacterium – Affected Organ
  • Tetanus – Clostridium tetani – Nervous system
  • Typhoid – Salmonella typhi – Intestine
  • Cholera – Vibrio cholerae – Intestine
  • Pneumonia – Diplococcus pneumoniae, Streptococcus pneumoniae – Lungs, Respiratory system
  • Tuberculosis – Mycobacterium tuberculosis – Lungs, intestine and other organs
  • Plague – Yersinia pestis or Pasturella pestis – Lungs, blood and lymph nodes
  • Gonorrhea – Neisseria gonorrhoeae – Urinary tract
  • Diphtheria – Corynebacterium diphtheriae – Respiratory system
  • Leprosy – Mycobacterium leprae – Nervous system, Skin
  • Syphilis – Treponema pallidum – Genital organs
- Viral Diseases
  Disease – Virus – Affected Organ
  • AIDS – HIV – Immune system
- GS InShort [Science]
  Disease – Virus – Affected Organ
  • Polio – Poliovirus – Throat, Spinal cord and Nervous system
  • Influenza – Myxovirus – Respiratory tract
  • Smallpox – Variola virus – Entire body (Skin)
  • Chickenpox – Varicella virus – Entire body

JAI HO STUDY

Made with Xodo PDF Reader and Editor

(Skin)
• Measles – Paramyxovirus – Entire body (Skin)
• Rabies – Rabies virus – Nervous system
• Herpes – Herpes virus – Skin
• Hepatitis B – Hepatitis B virus – Liver

- Protozoan Diseases
  Disease – Protozoa – Affected Organ
  • Malaria – Plasmodium – RBC and Spleen
  • Paramecium – Entamoeba gingivalis – Gums
  • Sleeping sickness – Trypanosoma gambiense – Brain
  • Amoebiasis (Dysentery) – Entamoeba histolytica – Intestine
  • Kala-azar – Leishmania donovani – Bone marrow
  • Giardiasis – Giardia intestinalis – Small intestine
- Fungal Diseases
  Disease – Fungus
  • Asthma – Aspergillus fumigatus
  • Athlete's foot – Tinea pedis and Trichophyton
  • Ringworm – Tinea corporis
  • Baldness – Trichophyton and Microsporum
- Plant Hormones
  Auxins
  • In higher concentration induce stem growth while in lower concentration induce root growth.
  • Play an important role in agriculture.
  • Destroy dicot weeds in fields and prevent lodging of plants.
  • Development of fruits without pollination and fertilization in pea, wheat, barley, cotton, tomato, potato.
- Gibberellins
  • Promote growth of stems and roots in plants.
  • Help in seed germination.
  • Induce flowering and development of parthenocarpic fruits (without fertilization).
- Cytokinins
  • Control organ formation in plants.
  • Increase rate of cell division.
  • Keep leaves green and inhibit root system.
  • Prevent destruction of chlorophyll.
- Ethylene
  • Ripening of fruits.
  • Promote abscission (shedding) of leaves, flowers and fruits.
- Abscisic Acid
  • Plant growth and plant metabolism inhibitor.
  • Growth inhibiting hormone – stops cell division.
- Florigen
  • Flowering inducing hormone in plants.
- Biofertilizers
  Nitrogen-fixing
  • Rhizobium
  • Azotobacter
  • Azospirillum
  • Cyanobacteria (Blue green algae)
  • Anabaena
- Phosphorus solubilizing
  • Bacillus
  • Pseudomonas
  • Penicillium
- Plant growth promoting
  • Rhizobacterium
  • Pseudomonas
- Blue-green Algae
  • Other name: Cyanobacteria
  • Prokaryotic algae
  • Symbiont of Anabaena
  • Help in nitrogen fixation
  • Used as biofertilizer in rice crop
- Azolla
  • Aquatic fern
  • Increases milk yield when fed to dairy animals
- Stem Modifications
  • Underground stem
  o Rhizome: Turmeric, Ginger

JAI HO STUDY

Made with Xodo PDF Reader and Editor

o Tuber: Potato
o Bulb: Onion, Garlic
o Corm: Saffron corm, Arvi

- Measuring Instruments and Their Applications
  - Audiometer → Used to measure intensity of sound
  - Odometer → Used to measure the distance traveled by a vehicle
  - Altimeter → Used to measure altitude
  - Oxenometer → Used to measure plant growth
  - Luxmeter → Used to measure light intensity
  - Lactometer → Used to measure relative density/purity of milk
  - Hydrometer → Used to measure relative density of liquids
  - Hygrometer → Used to measure humidity of air
  - Manometer → Used to measure gas pressure
  - Galvanometer → Used to detect presence of electric current
  - Ammeter → Used to measure electric current
  - Anemometer → Used to measure wind speed
  - Voltmeter → Used to measure potential difference
  - Seismograph → Used to measure earthquake intensity
  - Thermometer → Used to measure temperature
  - Pyrometer → Used to measure high temperature
  - Caratmeter → Used to measure purity of gold
  - Stethoscope → Used to hear heart sounds
  - Fathometer → Used to measure depth of sea
  - Tachometer → Instrument for measuring RPM (Revolutions Per Minute)
  - Pyrheliometer → Used to measure solar radiation
  - Phonometer → Instrument for measuring sound intensity
  - Extro Heliograph → Instrument for photographing the sun
- Measuring Instruments and Their Uses
  - Cardiogram → Used for measurement of heartbeat
  - Polygraph → Instrument for detecting lies
  - Bolometer → Used for measuring thermal or electromagnetic radiation
  - Actinometer → Solar radiation measuring device
  - Evapometer → Evaporation measuring device
  - Calorimeter → Instrument for measuring heat absorbed or released by a substance
  - Cryometer → Thermometer for measuring extremely low temperature
  - Kymograph → Instrument for measuring plant growth
  - Dynamo → Converts mechanical energy into electrical energy
  - Dynamometer → Instrument for measuring force, torque, or power
  - Electroencephalograph (EEG) → Measures electrical activity of brain
  - Electrometer → Instrument for measuring electric charge or potential difference
  - Electroscope → Used to detect presence of electric charge in a body
  - Endoscope → Instrument for internal examination of body organs
  - Gravimeter → Instrument for measuring gravitational acceleration
  - Gyroscope → Instrument for measuring angular velocity
  - Hydrophone → Records underwater sound
  - Lactometer → Used for measuring quality and relative density of milk
  - Manometer → Used to measure pressure of liquid or gases
  - Microphone → Converts sound waves into electrical signals

JAI HO STUDY

Made with Xodo PDF Reader and Editor

• Nephoscope → Instrument for measuring height, velocity, and direction of cloud movement
• Photometer → Instrument for measuring light intensity

- Energy Conversion
  • Motor → Electrical energy to Mechanical energy
  • Engine → Heat to Mechanical energy
  • Speaker → Electrical energy to Sound energy
  • Transmitter → Electrical energy to Electromagnetic energy
  • Candle → Chemical energy to Light and Heat
  • Photoelectric cell → Light energy to Electrical energy
  • Sitar → Mechanical energy to Sound energy
  • Electric generator → Mechanical energy to Electrical energy
- Electromagnetic Waves and Uses
  • Gamma rays → Used in medicine for destroying cancer cells
  • X-rays → Used in diagnosis and treatment, viewing bone structure and internal organs
  • Ultraviolet rays → Used in water purifiers for destroying microbes
  • Infrared rays → Used in treatment, TV remote, AC system
  • Microwaves → Used in radar system, weather forecasting, microwave ovens, mobile phones, Wi-Fi
  • Radio waves → Used in broadcasting and telecommunication, long-distance orders, mobile phones
- Increasing Wavelength Order
  Violet → Blue → Green → Yellow → Orange → Red
- Decreasing Frequency Order
  Red → Orange → Yellow → Green → Blue → Violet
- Light Intensity Measuring Instrument
  Photometer → Light intensity measuring instrument
- Energy Conversion
  • Electric bulb → Electrical energy to Light and Heat
  • Electric cell → Chemical energy to Electrical energy
  • Dynamo → Mechanical energy to Electrical energy
  • Tube light → Electrical energy to Light energy
- GS InShort [Science]
  Different Uses of Ultrasonic Waves
  • In sonar devices
  • Cleaning clothes and watch parts of dust
  • Removing soot from factory chimneys
  • In ultrasound machines, ECG, sonography and ultrasonography
  • Destroying insects
  • Finding hidden objects
  • Controlling automatic doors
  • Heating liquids
- Speed of Sound at 25°C
  • Solid > Liquid > Gas
  • Maximum in Aluminum (6420 m/s)
  • Aluminum > Nickel > Steel > Iron > Brass
  • Glass > Water > Hydrogen > Helium > Air
- Uses of Concave and Convex Mirrors
  Concave Mirror
  • In torches, searchlights and vehicle headlights
  • As shaving mirror
  • By dentists
  • As reflector in solar furnace
- Convex Mirror
  • In vehicle side-view mirrors to see rear view
  • In street lamps, sunglasses
- Phenomena Related to Light
  Refraction of Light
  • Object or fish in water appears at less depth

JAI HO STUDY

Made with Xodo PDF Reader and Editor

- Bottom of vessel or pond appears raised
- Sun appears before actual sunrise and after actual sunset
- At sunrise and sunset, sun appears flattened or oval
- Stars twinkle – their light passes through atmospheric layers

- Reflection of Light
  - Seeing face in mirror
  - Image in still water
  - Light returning from shiny surface
- Total Internal Reflection of Light
  - Brilliance of diamond
  - Communication in optical fiber
  - Mirage
  - Endoscope
- Interference of Light
  - Soap bubbles appear colorful
  - Oil film on water surface appears colorful
  - CD appears colorful
- Scattering of Light
  - Sky appears blue
  - Sea appears blue
  - Sun appears red during sunrise and sunset
  - Danger signals are made in red color because it scatters the least
- Uses of Convex and Concave Lenses

  Convex Lens
  - Microscope
  - Camera
  - For correcting hypermetropia (far-sightedness)
  - Telescope
- Concave Lens
  - For correcting myopia (near-sightedness)
  - Vehicle headlights
  - Street lamps
- GS InShort [Science]

  Major Gases and Their Uses
- Hydrogen Peroxide
  - Disinfectant
  - Antiseptic: washing wounds, gargling, cleaning ears
  - Bleaching of hair, cotton, silk, leather, feathers etc.
  - As tooth and mouth wash
  - As preservative for milk, fish, meat, and other foods
  - As rocket fuel
- Helium
  - For filling balloons
  - In eye treatments as substitute of pure air with pure helium
- Neon
  - In television and plasma tubes
  - In neon signs
  - In high-voltage discharge tubes
- Xenon
  - In high-speed photography, as anesthesia, in smartphones, flash lamps, and high-intensity lamps
- Sulfur Hexafluoride
  - As electrical insulator
  - In windows and doors
- Sulfuric Acid
  - In fertilizer production
  - In making explosives
  - In petroleum industry for producing sulfate and superphosphate
  - In medicine production
  - In storage batteries
  - In nylon/rayon industries
- Nitrogen
  - In refining sulfur and acetylene
  - For preserving grains and juices
  - In production of ammonia gas, sodium cyanamide, sulfosyanide, and calcium cyanamide
  - As fertilizers, explosives, and preservatives
- Ammonia
  - Production of fertilizers (Ammonium sulfate, Ammonium nitrate, Urea, Ammonium phosphate, Ammonium carbonate)
  - Production of other chemicals

JAI HO STUDY

Made with Xodo PDF Reader and Editor

- Chlorine
  - In paper pulp production
  - In making bleaching powder
  - In chemical industry products
  - In water purification
  - In photography, medicine and matchstick industry
- ---
- Citric Acid
  - Found in citrus fruits like orange, lemon
- Lactic Acid
  - Found in curd
- Oxalic Acid
  - Found in spinach
- Ascorbic Acid
  - Found in Amla, citrus fruits
- Tartaric Acid
  - Found in tamarind, grapes, raw mango etc.
- Formic Acid
  - Found in sting of ants and bees
- Oxalic Acid
  - Used for removing stains from clothes
- Hydrochloric Acid
  - Helps in digestion of food consumed by animals
- ---
- Other Acids
  Acetic Acid → Found in vinegar
  Formic Acid or Methanoic Acid → Found in ant sting
- Alkaline Sources
  Alkali — Source
  Calcium Hydroxide — Lime water
  Ammonium Hydroxide — Cleaner used for window glass
  Sodium Hydroxide / Potassium Hydroxide — Soap
  Magnesium Hydroxide — Milk of Magnesia
- Miscellaneous Facts
  - Common salt → Sodium chloride → NaCl
  - Aqua regia / Acid king is formed → From nitric acid and hydrochloric acid
  - Potassium iodide → Present as iodized salt
  - Blue vitriol → Compound of copper and sulfate
  - Washing soda → Sodium carbonate → Na_2CO_3
  - Caustic soda → Sodium hydroxide → NaOH
  - Hypo → Sodium thiosulfate → $Na_2S_2O_3$
  - Bleaching powder → Calcium oxychloride → $CaOCl_2$
  - Baking soda → Sodium bicarbonate → $NaHCO_3$
  - Washing powder → Sodium carbonate → Na_2CO_3
  - Plaster of Paris → Calcium sulfate hemihydrate → $CaSO_4 \cdot ½H_2O$
    o Made from gypsum
  - Sodium thiosulfate → Hypo solution used in photography
- Various Compounds and Their Uses
  - Epsom salt → Magnesium sulfate
  - Monosodium glutamate
    o Sodium salt of acid
    o Naturally found in many foods such as tomato, cheese etc.
  - Bleaching powder / Whitening powder
    o Calcium hypochlorite
    o Calcium oxychloride
  - Lithium bicarbonate → Treatment of arthritis
  - Milk of magnesia → Antacid
  - Silver bromide → A layer of silver bromide is coated on photography plates
- Types of Glass and Their Uses
  - Soft glass / Soda glass → Used in common utensils, doors and window glasses, tube lights, laboratory equipment
  - Hard glass → Used in laboratory equipment (beakers, flasks, test tubes, etc.) and other high-temperature-resistant equipment
  - Pyrex glass → Used in chemical equipment, car headlamps etc.
  - Flint glass → Used in electric bulbs, telescope lenses, prisms, artistic objects
  - Crown glass → Used in spectacle lenses, optical instruments

JAI HO STUDY

Made with Xodo PDF Reader and Editor

• Quartz glass → Used in ultraviolet lamp bulbs, containers for chemical reagents, and other laboratory equipment
• Crookes glass → Used in making sunglasses
• Photochromic glass → Used in lenses of normal spectacles and sunglasses

- Discoveries in Chemistry
  • Periodic table – Mendeleev
  • Electron - Charge – Millikan
  • Modern periodic table – Moseley
  • Wave theory of light – Planck
  • Discovery of proton – Rutherford
  • Discovery of X-rays – Roentgen
  • Atomic model, detailed form of periodic table – Bohr
  • Catalyst – Berzelius
  • Radioactivity – Becquerel
  • Neutron – Chadwick
  • Wave nature of electron – De Broglie
  • Law of electrolysis – Faraday
  • Artificial radioactivity – Madame Curie and F. Joliot
  • Radioactive dating method – Libby
  • Cyclotron – Lawrence
  • Discovery of electron – Thomson
  • Scattering of light by solid particles – Tyndall
  • Discovery of meson – Yukawa
  • Discovery of argon – Rayleigh and Ramsay
  • Discovery of neon, krypton and xenon – Ramsay and Travers
  • pH scale – Sorensen
- Scalar and Vector Quantities
  Scalar Quantities
  • Have only magnitude, no direction.
  • Examples:
  o Distance
  o Volume
  o Mass
  o Density
  o Work
  o Energy
  o Time
  o Temperature
  o Power
  o Charge
  o Speed
  o Potential etc.
- Vector Quantities
  • Have both magnitude and direction.
  • Examples:
  o Displacement
  o Velocity
  o Acceleration
  o Force
  o Momentum
  o Impulse
  o Electric field
  o Magnetic field etc.
- Major Organic Compounds and Their Uses
  • Citric acid → In preservation of pickles and fruits
  • Naphthalene → Prevents insects when its balls are kept between clothes
  • Tear gas → Used for dispersing crowd
  • Carotene → Substance giving red color to carrot
  • Gammaxene and DDT → Used as insecticides
  • Mercaptan → Used to detect leakage of LPG
  • Potassium permanganate → Used as antibacterial agent
  • Ethylene / Calcium carbide → Used for ripening fruits
  • Polycarbonates → Used in making bulletproof glass
  • Oxalic acid → Used in photography
  • Allethrin and Pyrethrin → Used in mosquito repellents and coils
- Organic Chemistry
  Major Organic Compounds and Their Applications
  Compound — Application
  • Sodium benzoate — Used in preservation of pickles, jams, chutneys and fruit juices
  • Benzoic acid — Used in preservation of

JAI HO STUDY

Made with Xodo PDF Reader and Editor

food items
- Ethylene glycol — Used as antifreeze in car radiators
- Paraffin and Carbon tetrachloride — Refrigerant liquid, used in fire extinguishing
- Bakelite — Used in electrical equipment and in making plastics

- Major Diseases and Their Causes
Disease — Cause
- Blood cancer — Benzene
- Itai-Itai — Cadmium
- Minamata — Mercury (Hg)
- Blue baby syndrome — Nitrate ($-NO_3$)
- Blackfoot disease — Arsenic (As)
- Wilson's disease — Copper (Cu)
- Siderosis — Iron (Fe)

- Diseases in Humans Caused by Viruses
- Smallpox
- Yellow fever (Arbovirus)
- Polio (Poliovirus)
- Measles (Morbillivirus)
- Mumps (Mumps virus)
- Rabies (Hydrophobia)
- Encephalitis
- Herpes (Herpes virus)
- Influenza (Orthomyxovirus)
- Trachoma
- Dengue fever
- AIDS (HIV virus)

- Diseases in Humans Caused by Fungi
- Aspergillosis (Lung disease)
- Ringworm
- Meningitis
- Histoplasmosis
- Onychomycosis
- Asthma
- Baldness
- Scabies

- Diseases in Humans Caused by Bacteria
Bacterium — Disease
- Clostridium tetani — Tetanus
- Haemophilus pertussis — Whooping cough
- Mycobacterium tuberculosis — Tuberculosis
- Vibrio cholerae — Cholera
- Corynebacterium diphtheriae — Diphtheria
- Bacillus pestis — Plague
- Diplococcus pneumoniae — Pneumonia
- Salmonella typhi — Typhoid
- Mycobacterium leprae — Leprosy

- Major Enzymes
- Sucrase – Converts sucrose into glucose and fructose
- Ptyalin – Digests starch
- Maltase – Converts maltose into glucose sugar
- Lipase – Converts emulsified fats into glycerol and fatty acids
- Lactase – Converts lactose into glucose and galactose
- Trypsin – Converts remaining proteins and peptones into amino acids

- Medical Discoveries
Discovery — Discoverer
- Vitamin — Funk
- Vitamin A, B — McCollum
- Vitamin D — Hopkins
- Insulin — Banting and Best
- Penicillin — A. Fleming
- DDT — Paul Müller
- Polio vaccine — John Salk
- Virus — Ivanovsky
- Rh factor — Landsteiner
- BCG vaccine — Calmette and Guérin
- DNA — Watson and Crick
- Cholera pathogen — Robert Koch
- Rabies vaccine — Louis Pasteur
- Genetic code — Har Gobind Khorana
- Smallpox vaccine — Edward Jenner

- Diseases Transmitted by Insects
Disease — Insect
- Sleeping sickness — Glossina palpalis (Tsetse fly)
- Cholera — Housefly
- Typhoid — Pediculus (louse)
- Surra disease — Tabanus fly

Economy

Types of unemployment –

- Frictional unemployment –
  - The period between leaving one job and getting another.
  - Unemployment caused due to technological changes etc. Like layoffs.
  - It is considered "search" or "voluntary" unemployment.
  - It is found in developed countries.

- Structural unemployment –
  - Unemployment caused due to lack of skills.
  - It is found the most in India.

- Disguised unemployment –
  - When more people than required are engaged in a work.
  - In this, the "marginal productivity" of a person is zero.
  - It is especially found in the "agricultural/unorganized" sector.

- Seasonal unemployment –
  - Unemployment caused by weather.
  - It is especially found in the agricultural sector.

- Cyclical unemployment –
  - Unemployment caused due to inflation or recession.
  - Its statistics are negligible in India.
  - It is found especially in developed countries.

Note- In India, "National Sample Survey Organization (NSSO)" collects and publishes data related to employment and unemployment.

Quantitative tools of inflation control-

- Repo rate
- Reverse repo rate
- Bank rate
- Cash reserve ratio
- Statutory liquidity ratio
- Open market operations
- Marginal standing facility

Qualitative tools of inflation control-

- Rationing of credit
- Marginal requirement
- Moral influence

Committees for poverty measurement

- Alagh Committee (1979)
  - Poverty measurement was done on the basis of nutrients and nutritional value was fixed as 2400 kilo calories for rural areas and 2100 kilo calories for urban areas
- Lakdawala Committee (1993)
  - State-specific poverty lines should be prepared in its report and these should be updated using CPI-IW in urban areas and CPI-AL in rural areas.
- Tendulkar Committee (2009)
  - The poverty line was fixed at Rs 1,000 (per person per month) for families living in urban areas and Rs 816 for rural families. • Rangarajan Committee (2014)
  - At all India level, it was fixed at Rs 972 per month (32 ₹ per day) in rural areas and Rs 1407 per month (47 ₹ per day) in urban areas

Important revolutions related to production

- Golden Revolution - Fruit / Honey production
- Green Revolution - Food grain production
- White Revolution - Milk production
- Blue Revolution - Fish production
- Brown Revolution - Fertilizer production
- Silver Revolution - Egg production
- Black Revolution - Petroleum production
- Yellow Revolution - Oilseed production

Types of unemployment

- Cyclical unemployment
  - It arises due to lack of demand due to recession in the market and ends when the demand increases like in developed countries
- Frictional unemployment
  - The period between leaving one job and getting another
- Structural unemployment

JAI HO STUDY

Made with Xodo PDF Reader and Editor

- Lack of skill qualification employment Situation of not getting work as per requirement
- Seasonal unemployment
  - Work according to season in agriculture sector and unemployment during rest of the time
- Disguised unemployment
  - People engaged in a work more than required, whose removal will keep the production level same

Important curves of economics

- Lorenz curve - Study of inequality of wealth and income
- Gini coefficient - It shows the measurement of income inequality through Lorenz curve
- Kuznets curve - Economic inequality increases initially when GDP increases and after a point the inequality starts decreasing (inverted U)
- Environmental Kuznets curve - Environmental damage increases initially when GDP increases and after a point the damage starts decreasing. (inverted U)
- Thomson/Phillips curve - Unemployment decreases when inflation increases i.e. there is an inverse relationship between unemployment and inflation rates
- Laffer Curve - Initially tax revenue increases on increasing tax rates and after a point on increasing taxes revenue starts declining. (Inverted U)

Major areas of priority in five year plans

- First Five Year Plan (1951-56)
  - (Based on Harrod-Domar model) Priority to agriculture.
- Second Five Year Plan (1956-61)
  - (Mahalanobis model) Priority to industry sector. o Hydroelectric power projects established at Bhilai, Durgapur and Rourkela
- Third Five Year Plan (1961-66)
  - (Gadgil Model) Agriculture and Industry
  - Bokaro Iron Steel Industry established in 1964 with the cooperation of former Soviet Union
- Fourth Five Year Plan (1969-74)
  - Growth with stability, elimination of income inequalities
- Fifth Five Year Plan (1974-79)
  - Poverty alleviation and population control

Important schemes of Central Government

- Pradhan Mantri Jan Dhan Yojana -- 28 August 2014
- Swachh Bharat Mission -- 2 October 2014
- Sansad Adarsh Gram Yojana -- 11 October 2014
- Mission Indradhanush (Immunization) -- 25 December 2014
- Pradhan Mantri Suraksha Bima Yojana -- 9 May 2015
- Digital India -- 1 July 2015
- Startup India --16 January 2016

Key Banking Terminology

- Liability - That which is to be paid back by the bank in the future.
  - E.g. - Deposits
- Different types of savings / small savings schemes
  - Borrowed by the bank
- Bank Rate - The rate at which RBI provides long term loans to commercial banks.
- Repo Rate - The rate at which RBI provides short term loans to commercial banks.
- Reverse Repo Rate - It is the rate at which RBI borrows money from commercial banks.
- Cash Reserve Ratio (CRR) - Banks keeping a part of their total deposits with RBI.
- Statutory Liquidity Ratio (SLR) - Banks keeping a part of their total deposits with themselves.

Major financial institutions and their establishment

- Reserve Bank of India -- 1 April 1935
- Industrial Credit and Investment Corporation of India (ICICI) -- January 1955
- State Bank of India -- 1 July 1955
- Small Industries Development Bank of India (SIDBI) -- April 1990
- Regional Rural Banks -- 2 October 1975
- Life Insurance Corporation of India -- September 1956
- National Bank for Agriculture and Rural Development (NABARD) -- 12 July 1982

Made with Xodo PDF Reader and Editor

Global Multidimensional Poverty Index

- Launched in 2010 by the United Nations Development Programme (UNDP) and the Oxford Poverty and Human Development Initiative (OPHI)
- This index measures deprivation in 10 indicators across three dimensions (health, education, and standard of living)
- In health: nutrition, child mortality
- In education: Years of schooling, school attendance
- Standard of living – cooking fuel, sanitation, drinking water, electricity, housing, property

Important Terms Related to Economy

Fiscal Deficit

- Excess of total expenditure over total receipts less borrowings

Budgetary Deficit

- Excess of total expenditure over total receipts

Revenue Deficit

- Excess of revenue expenditure over revenue receipts

Primary Deficit

- Excess of total expenditure over total receipts less borrowings and interest payments

Important Tax Reform Committees

- Adhia Committee – 2016
  - Recommendations:
    - Implement a uniform tax system (GST) across the country.
    - Simplify indirect taxes and introduce a single tax structure.
- L.K. Jha Committee – 1977
  - Recommendation:
    - Reforms in direct taxation
    - The committee recommended stringent legislation and administrative measures to curb black money and tax evasion
- Narasimham Committee – 1991 and 1998
  - Recommendations
    - Reforms in banking sector
    - Bringing transparency in tax system
- Kailkar Committee – 2002
  - Recommendations:
    - Restructuring of direct and indirect taxes
- Raja Chelliah Committee – 1991
  - Recommendation:
    - Direct and indirect tax reforms
    - Simplifying and broadening the direct tax system
    - Rationalising tax rates.

Important schemes in discussion

- Pradhan Mantri Jan Dhan Yojana (PMJDY)
  - Launch: 28 August 2014
  - Objective: To ensure availability of banking facilities and promote financial inclusion
- Pradhan Mantri Ujjwala Yojana (PMUY)
  - Launch: 1 May 2016
  - Objective: To provide free LPG connections to poor families, thereby improving their lives
- Pradhan Mantri Fasal Bima Yojana (PMFBY)
  - Launch: 13 January 2016
  - Objective: To provide insurance facility to farmers to protect them from crop loss
- Swachh Bharat Mission (SBM)
  - Launch: 2 October 2014
  - Objective: To ensure cleanliness across the country and to get rid of open defecation
- Pradhan Mantri Awas Yojana (PMAY)
  - Launch: 25 June 2015
  - Objective: 2022 To provide affordable housing for all (both in urban and rural areas) up to Rs. 10 lakhs.
- Sukanya Samriddhi Yojana (SSY)
  - Launched: 22 January 2015
  - Objective: To provide financial security for the future of girl child and to encourage savings for their education.
- Pradhan Mantri Kisan Samman Nidhi (PM-KISAN)
  - Launched: 1 February 2019
  - Objective: To provide financial assistance of Rs. 6000 annually to small and marginal farmers.
- Ayushman Bharat Yojana (Pradhan Mantri Jan Arogya Yojana - PMJAY)
  - Launched: 23 September 2018

JAI HO STUDY

Made with Xodo PDF Reader and Editor

- Objective: To provide health insurance facility of up to Rs. 5 lakhs to poor and deprived families.
- Make in India
  - Launched: 25 September 2014
  - Objective: To make India a global manufacturing hub and increase employment opportunities
- Pradhan Mantri Mudra Yojana (PMMY)
  - Launched: 8 April 2015
  - Objective: To provide financial assistance to small businesses

Important terminology related to economics

GDP (Gross Domestic Product)

- The total value of all goods and services produced in a country in a given period

Inflation

- An increase in the prices of goods and services, which indicates a fall in the value of the currency.

Deflation

- A fall in the prices of goods and services, which usually occurs during an economic recession.

Monetary Policy

- The policy of the central bank to influence the economy through control of money supply and interest rates.

Fiscal Policy

- The policy of the government to influence the economy through taxes and government spending.

Balance of Payments

- The record of a country's international transactions, including exports, imports, and financial flows.

Important facts related to the Reserve Bank of India (RBI)

- RBI is the central bank of India, established on 1 April 1935 on the recommendation of the Hilton Young Commission.
- Nationalization of RBI - 1 January 1949
- Its main objective is to control currency, regulate the banking system, and ensure financial stability
- RBI's monetary policy plays an important role in controlling inflation and inflationary pressure in the country
- Repo rate and reverse repo rate are determined by the RBI, which controls the cash flow in the banking system.
- First Governor of RBI - Osborn Smith
- First RBI Governor of Independent India - CD Deshmukh
- Current Governor of RBI - Shaktikanta Das

Four parameters of money supply in India M1, M2, M3, M4

- M1 (Narrow Money)
  - It consists of the most liquid assets, which can be converted into cash immediately.
  - It includes:
    - Cash in circulation (such as notes and coins)
    - Demand deposits (bank current accounts and savings accounts)
    - Other withdrawable deposits (such as bank transfers or demand drafts)
    - M1 is the directly usable money, which is the most liquid.

- M2 (M1 + Post Office Savings Account)
  - It includes all the components of M1.
  - Also, post office savings accounts are also added to it.
  - It is slightly less liquid, but can still be easily converted into cash.

- M3 (M1 + long-term deposits):
  - M3 is called "broad money".
  - It consists of all the components of M1, plus long-term bank deposits (fixed deposits, which can be withdrawn only after a certain period).

- M4 (M3 + other post office deposits):
  - M4 is the broadest money supply measure.
  - It consists of all the components of M3, plus other post office deposits (such as time deposits).

JAI HO STUDY

Made with Xodo PDF Reader and Editor

- It is much less liquid as it includes deposits that cannot be immediately converted into cash

- M1: Most liquid currency (cash, demand deposits)
- M2: M1 + post office savings deposits (slightly less liquid) assets
- M3: M1 + long-term bank deposits, M3 is less liquid than M1 and M2 (fixed deposits)
- M4: M3 + other long-term post office deposits (least liquid)

Facts related to Census of India 2011

- States with highest literacy
- Kerala > Mizoram > Goa > Tripura > Himachal
- States with highest urban population (in percentage)
- Goa > Mizoram > Tamil Nadu > Kerala > Maharashtra
- Highest sex ratio (rural) in Union Territory - Puducherry
- Highest urban sex ratio in Union Territory - Puducherry
- State with lowest urban sex ratio - Jammu and Kashmir (840)
- State with lowest rural sex ratio - Haryana (880)
- State with lowest urban sex ratio in Union Territory - Daman and Diu (551)
- State with lowest rural sex ratio in Union Territory - Chandigarh (690)
- State with highest Scheduled Caste population - Uttar Pradesh
- State with highest Scheduled Tribe population - Madhya Pradesh
- Highest State with most Scheduled Castes (percentage in general population) - Punjab (31.9%)
- State with most Scheduled Tribes (percentage in general population) - Mizoram (94.41%)
- Lakshadweep (94.8%) in most Scheduled Union Territory
- Population density in 2011 - 382 (+57)
- Largest state in terms of area - Rajasthan
- Largest Union Territory in terms of area - Andaman and Nicobar
- Smallest state in terms of area - Goa
- Smallest Union Territory in terms of area - Lakshadweep
- Largest state in terms of population - Uttar Pradesh
- Largest Union Territory in terms of population - Delhi
- Smallest state in terms of population - Sikkim Smallest Union Territory in terms of population - Lakshadweep
  - Note: - Population and The smallest union territory in terms of area is Lakshadweep.
- Union Territory with highest literacy – Lakshadweep (91.80%)
- Union Territory with minimum literacy is Dadra and Nagar Haveli (76.20%)
- State with highest population density – Bihar (1106)
- Union Territory with highest population density is Delhi (11320)
- State with lowest population density – Arunachal Pradesh (17)
- Top 5 states in terms of population are Uttar Pradesh > Maharashtra > Bihar > P. Bengal > Andhra Pradesh
- Top Union Territories in terms of population are Delhi > Puducherry > Chandigarh > Andaman Nicobar > Dadra Nagar Haveli
- States with least population in terms of population - Sikkim < Mizoram < Arunachal Nagaland Manipur
- Union Territories with least population in terms of population are Lakshadweep Daman Diu Dadra Nagar Haveli Andaman Nicobar < Chandigarh
- States with top decadal growth rate in population are Meghalaya (27.95) > Arunachal Pradesh (26.03) > Bihar (25.42) > Jammu and Kashmir (23.64)
- Union Territories with highest decadal growth rate in population are Dadra Nagar Haveli (55.88) > Daman and Diu (53.76) > Puducherry (28.08) > Delhi (21.21) > Chandigarh (19.19)
- States with lowest decadal growth rate in population are Nagaland (-0.58) > Kerala (4.91) Andhra Pradesh (10.98) > Sikkim (12.89) Goa (8.23) >
- Union Territories with lowest decadal growth rate in population –

Environment

Names of National Parks of Andaman Nicobar -

- Campbell Way National Park
- Galathea Way National Park
- Mahatma Gandhi Marine National Park
- Middle Button Deep National Park
- Mount Harrier National Park
- Rani Jhansi Marine National Park
- Saddle Peak National Park

Major National Parks of India -

- Dachigam National Park: - Jammu and Kashmir
- Pin Valley National Park: - Himachal Pradesh
- Bandipur National Park: - Karnataka
- Betla National Park: - Jharkhand
- Pambadum Shola National Park: - Kerala
- Eravikulam National Park: - Kerala

United Nations Agenda 2030 (17 Development Goals)

1. Elimination of all forms of poverty from the whole world.
2. End hunger, food security and better nutrition and promotion of sustainable agriculture.
3. Promote health, safety and healthy living for all at all ages.
4. Ensure inclusive and equitable quality education and opportunities for learning for all.
5. Achieve gender equality and empower women and girls.
6. Ensure access to sanitation and sustainable water management for all.
7. Ensure access to affordable, reliable, sustainable and modern energy.
8. Promote sustained, inclusive and sustainable economic growth, full and productive employment and decent work for all.
9. Promote resilient infrastructure, inclusive and sustainable industrialization.
10. Reduce inequality within and among countries.
11. Build safe, resilient and sustainable cities and human settlements.
12. Ensure sustainable consumption and production patterns.
13. Take urgent action to tackle climate change and its impacts.
14. Conserve and use oceans, seas and marine resources for sustainable development.
15. Promote sustainable use of terrestrial ecosystems, protect forests, halt land degradation and biodiversity loss.
16. Promote peaceful and inclusive bodies for sustainable development and make them effective and accountable at all levels to ensure justice for all.
17. Revitalize the global partnership for sustainable development and strengthen the means of implementation.

Biodegradable pollutants

- Those which can be broken down into simple, harmless substances in nature

Examples -

- Household waste (garbage), urine, faeces, sewage,
- Agricultural residues, paper, wood, textiles, cattle dung,
- Animal bones, leather, wool, vegetation

17 Sustainable Development Goals 2030

- Goal 1: Poverty eradication
- Goal 2: Zero hunger
- Goal 3: Good health and wellbeing
- Goal 4: Quality education
- Goal 5: Gender equality
- Goal 6: Clean water and sanitation
- Goal 7: Affordable and clean energy
- Goal 8: Decent work and economic growth
- Goal 9: Industry, innovation and infrastructure
- Goal 10: Reduce inequality
- Goal 11: Sustainable cities and communities
- Goal 12: Responsible consumption and production
- Goal 13: Climate action
- Goal 14: Life below water
- Goal 15: Life on land
- Goal 16: Peace and justice Strong institutions
- Goal 17: Partnerships to achieve the goals

Scientists associated with environmental terminology

- Biodiversity - W. G. Rosen
- Ecosystem A. G. Tansley
- Ecology - Ernst Haeckel
- Monoclimax theory F. E. Facklements

JAI HO STUDY

Made with Xodo PDF Reader and Editor

- Hotspots - Norman Marais

Natural World Heritage Sites of India

- Kaziranga National Park - Assam
- Manas Wildlife Sanctuary - Assam
- Keoladeo National Park - Bharatpur, Rajasthan
- Sundarbans National Park - West Bengal
- Nanda Devi and Valley of Flowers - Uttarakhand
- Western Ghats - Kerala, Tamil Nadu, Karnataka, Goa, Maharashtra and Gujarat
- Great Himalayan National Park - Himachal Pradesh

Important Days

- World No Tobacco Day - 31 May
- World Toilet Day - 19 November
- World Forestry Day - 21 March
- World Ozone Day - 16 September
- International Earth Day - 22 April
- World Wetlands Day - 2 February
- International Tiger Day - 29 July

Important Institutions

- Indian Forests Institute of Management - Bhopal
- Wildlife Institute of India - Dehradun
- Himalayan Environment and Development Institute - Almora
- Centre for Ecology - Bengaluru
- Central Arid Zone Research Institute (CAZRI) - Jodhpur

Pollutants and their affected organs

- Asbestos dust - Lungs
- Lead - Central nervous system
- Carbon monoxide - Blood stream
- Mercury - Abdomen
- Fluoride – Teeth

Renewable (non-conventional) energy resources

- Solar energy
- Wind energy
- Hydropower
- Biogas
- Geothermal energy
- Energy produced from waste
- Tidal energy

Conventions/Conventions related to environment

- Kyoto Protocol - Concept of carbon credit developed Related to global warming
- Stockholm Conference, 1972: - 5 June declared as World Environment Day
- Cartagona Protocol: - Related to biodiversity (effective from 2003)
- Nagoya Protocol (2010): - Related to biodiversity, Aichi targets were announced. (Number of goals - 20)
- Rio+20 (2012):- Related to green economy and sustainable development held in Rio de Janeiro

Major environmental acts

- Forest Conservation Act, 1980
- Wildlife Protection Act, 1972
- Water (Prevention and Control of Pollution) Act, 1974
- Air Pollution (Prevention and Control) Act, 1981
- Ozone Depleting Substances (Regulation and Control) Rules, 2000
- Biological Diversity Act, 2002

Types of key species

- Keystone species - Species which are less in number but have more importance (eg. Tiger)
- Indicator species - Which gives information about change (eg. Lichen, disappears when SO2 pollution increases)
- Local species - Local species is a resident of the place (eg. Pooh of Western Ghats) Monkey)
- Alien species - Species brought from outside (like tea from China and potato from Portugal)
- Umbrella species - Which is known for the conservation of the entire ecosystem (like one horned rhinoceros, panda, tiger)
- Flagship species - Which becomes the identity of an ecosystem (like only Lamjao in Manipur, Bengal tiger in Sundarban)

Four major hotspots of India

- Himalaya / Eastern Himalaya
- Indo Burma
- Sundaland
- Western Ghats

JAI HO STUDY

Made with Xodo PDF Reader and Editor

Types of pollutants based on evolution

- Primary pollutants: -
  - Those substances which are formed directly from the source, their evolution is not done by chemical process
  - Like - CO, CO2, NO2, NO
- Secondary pollutants: -
  - Pollutants which are formed by the reaction in primary pollutants
  - Like - PAN (Peroxy acetyl nitrate), SO3, O3, HNO3, H2SO4, SO4, H2O2

Major types of biological interactions

- Mutualism: -
  - Both species get benefits, like bees collect nectar from flowers and Pollination occurs
- Parasitism:-
  - One organism benefits by harming another organism e.g. some parasitic insects
- Commensalism:-
  - When one organism benefits and the other is neither harmed nor helped (e.g. some epiphytic plants grow on trees without harming them)

Three categories of biodiversity

- Species diversity -
  - Focuses on the number of different species within a particular area
- Genetic diversity -
  - The variety of genetic information within each species
- Ecosystem diversity -
  - The variety of habitats communities and processes that exist within an area

Measuring Biodiversity

- Alpha Diversity:
  - Refers to diversity within a particular area expressed by the number of species in the ecosystem
- Beta Diversity:
  - Compares diversity between ecosystems measured as the change in the amount of species
- Gamma Diversity:
  - Measures overall diversity for different ecosystems within a region

Conservation of Biodiversity

- In situ conservation:
  - Focuses on conserving organisms within their natural habitats
  - (e.g. National Parks, Biosphere Reserves, Sanctuaries, Sacred Groves)
- Ex situ conservation:
  - Includes conservation of species and genetic diversity outside their natural habitats
  - (Seed Banks, Gene Banks, Botanical/Zoological Gardens)

Zones within Biosphere Reserves

- Core Zone:
  - It includes strictly protected areas with no human activity
- Buffer Zone: -
  - Zone which accommodates scientific research, monitoring, training and tourism facilities
- Transition Zone:-
  - Zone where community/socio cultural activities and human activities can take place

Important personalities related to environment

- Ravindra Kumar Sinha: - Dolphin Man of India
- Dr. Ramdeo Mishra: - Father of Ecology in India
- Dr. Norman Borlaug: - Father of Green Revolution in the world
- Dr. Salim Ali: - Renowned Ornithologist
- Sunder Lal Bahuguna: Associated with Chipko Movement
- Pandurang Hegde: - Leader of Appiko Movement in Karnataka
- Dr. M.S. Swaminathan: - Father of Green Revolution in India
- Dr. Verghese Kurien: - Father of White Revolution / Milk Revolution in India
- Baba Amte: - Associated with Narmada Bachao Andolan
- Medha Patekar: - Leader of Narmada Bachao Andolan

JAI HO STUDY

Made with Xodo PDF Reader and Editor

- E. P. Odum: - Father of Ecology and Environmental Science
- Richard St. Barb Baker: - He is called Tree Man
- Kailash Sankhla: - He is called Tiger Man of India

Important Environmental Terminology

- Sustainable Development
  - Use of resources keeping in mind the needs of future generations.
  - It was given by Brundtland Commission (1987) in its "Our Common Future" report. o Ecomark
  - By Bureau of Indian Standards, 1991
  - Given to environmentally friendly products
- AGMARK
  - Given on agricultural/food products
- Greenwash
  - Making false promises about environmental protection.
- Habitat
  - A particular place where organisms live

Key Environmental Terminology

Lentic habitat

- Still water habitats. Eg: ponds, wetlands, lakes

Lotic habitat

- Running water habitats. Eg: river, waterfall

Niche

- It is defined as the functional role played by an organism in its ecosystem.
- It is given by “Greenells”

Ecosystem

- Community of organisms and also the environment in which they live.
- A.G. This term was used by "Tasley".

Carrying Capacity

- The limit to the number of organisms in a given area that the environment can support.

Biomagnification

- Entry of heavy metals into the food chain and the increasing concentration of these metals at different trophic levels.

Status of Leopards 2022 Report (Released in 2024)

- Released by the Ministry of Environment, Forest and Climate Change in February 2024
- According to the report, the number of leopards in India has increased from 12,852 in the year 2018 to 13,874 in the year 2022.
- Other facts related to the report
  - Madhya Pradesh has the highest number of leopards at 3907.
  - States with the highest number of leopards - Madhya Pradesh > Maharashtra > Karnataka
  - Tiger reserve with the highest leopard population: Nagarjuna Sagar Sri Shailam (Andhra Pradesh)
  - Tiger reserve with the highest density of leopards - Sariska Tiger Reserve
  - State/UT Number of leopards -
    1. Madhya Pradesh -3907
    2. Maharashtra -1985
    3. Karnataka -1879
    4. Uttar Pradesh -371

Major agricultural research centers in India

- Central Island Agricultural Research Institute - Port Blair
- Indian Institute of Pulses Research - Kanpur
- Central Arid Zone Research Institute - Jodhpur
- Indian Institute of Millets Research - Hyderabad
- Central Avian Research Institute - Izatnagar
- Central Plantation Crops Research Institute - Kasargod
- Central Institute for Brackish Water Aquaculture - Chennai
- Central Institute for Research on Goat - Makhdoom
- Indian Institute of Horticultural Research - Bengaluru
- Central Agricultural Engineering Institute - Bhopal
- Central Cotton Research Institute - Nagpur
- Central Institute of Fisheries Technology - Cochin
- Central Marine Fisheries Research Institute - Kochi
- Central Potato Research Institute - Shimla
- Indian Institute of Soil Science - Bhopal

Food Safety and Standards Authority of India (FSSAI)

- Statutory body
- Established - September 2008, under the Food Safety and Standards Act, 2006 (FSS Act)
- Operates - Under the Ministry of Health and Family Welfare

JAI HO STUDY

Made with Xodo PDF Reader and Editor

- Headquarters - New Delhi
- Six regional offices - Delhi, Guwahati, Mumbai, Kolkata, Cochin and Chennai
- Structure - Chairperson and 22 members of which one third shall be women
- FSSAI is responsible for food certification in India
- Functions -
    - Laying down guidelines and standards
    - Granting licenses
    - Conducting audits
    - Literacy about food security
    - Maintain records and information
    - Keep the government informed

Breeds of Cow and Buffalo

- Breeds of Cow :
    - Gir, Sahiwal, Lal Sindhi, Hallikar,
    - Amritmahal, Khillari, Kangayam, Ambalacheri,
    - Pulikulam, Alambadi Tharparkar, Hariana,
    - Deoni, Ongole, Krishna Valley, Gangatiri, Goulao

- Breeds of Buffalo :
    - Banni, Bargur, Chhattisgarhi, Chilika,
    - Gojri, Kalahandi, Luit (SWAMP), Marathwadi
    - Mesra, Murrah, Surti, Jaffrabadi, Bhadawari,
    - Nili Ravi, Mehsana, Nagpuri, Toda

- Exotic Breeds of Cow :
    - Jersey, Holstein Friesian,
    - Brown Swiss, Red Dane, Ayrshire,
    - Guernsey, Ankole, Normande, Simmental

Top 10 exotic breeds of cattle

1. Sirohi
2. Jakharana
3. Surati
4. Mehsana
5. Chegu
6. Kachhi Goat
7. Attappadi Kala
8. Kanni Adu
9. Barari

Breeds of goats

- Exotic goat breeds:-
    - Boer
    - Alpine
    - Saanen
    - Toggenburg
    - Anglo-Nubian

- Native goat breeds:
    - Jamunapari
    - Barbari
    - Beetal
    - Malabari
    - Osmanabadi
    - Black Bengal

Gases emitted from volcanoes

- Water vapour (H_2O)
- Carbon dioxide (CO_2)
- Hydrogen (H)
- Hydrogen sulphide (H_2S)
- Carbon monoxide (CO)
- Hydrogen chloride (HCL)
- Helium (He)
- Sulfur dioxide (SO_2)

India's upcoming target years

- Goal of developed India - 2047
- Goal of reducing the use of Hydro Fluoro Carbon (HFC) by 80% - 2047
- Goal of making India energy independent/self-reliant - 2047
- Goal of increasing India's nuclear power capacity to 1 lakh MW - 2047
- Goal of achieving self-sufficiency in shipbuilding - 2047
- Goal of zero carbon emissions in Mumbai city - 2050
- Goal of Net Zero by India – 2070

India's upcoming targets for 2030

- Target to achieve 100 metric tonnes of coal gasification
- Target to achieve 500 gigawatts of renewable energy
- Target to achieve 280 gigawatts of solar energy
- Reduction of one billion tonnes in total carbon emissions

JAI HO STUDY

Made with Xodo PDF Reader and Editor

- Target to make 30% of total vehicles electric
- Complete elimination of malaria from India
- Target to eliminate HIV AIDS
- Target to make Indian Railways a Net Zero Carbon Emission or Green Railway

Process of Soil Erosion

- Splash Erosion - Erosion caused by raindrops.
- Sheet Erosion - When the soil starts flowing with water.
- Rill Erosion - When small and shallow channels are formed in the soil. • Gully Erosion – When the channels of rill erosion become large and wide. For example, the "Khoh Khadde" formed in the Chambal valley.
- Stream Channel Erosion - When water starts flowing in the form of a thick and large stream.

Important COP Summits and their Locations

- COP - 26 - Glasgow (Switzerland)
- COP - 27 - Egypt
- COP - 28 - UAE
- COP - 29 - Azerbaijan
- COP - 30 - Brazil
- COP - 33 - India (2028)

18 Biosphere Reserve Areas of India

- 1986-Nilgiri Biosphere Reserve-Tamil Nadu, Kerala, Karnataka
- 1988-Nanda Devi Biosphere Reserve-Uttarakhand
- 1988-Nokrek Biosphere Reserve- Meghalaya
- 1989- Gulf of Mannar Biosphere Reserve- Tamil Nadu
- 1989- Sunderbans Biosphere Reserve- West Bengal
- 1989- Manas Biosphere Reserve- Assam
- 1989- Great Nicobar Biosphere Reserve- Andaman and Nicobar Islands
- 1994 - Simlipal Biosphere Reserve- Odisha
- 1997 - Dibru- Saikhowa Biosphere Reserve Assam
- 1998- Dihang-Dibang Biosphere Reserve- Arunachal Pradesh
- 1999- Pachmarhi Biosphere Reserve- Madhya Pradesh
- 2000- Kanchenjunga Biosphere Reserve - Sikkim
- 2001-Agasthyamalai Biosphere Reserve- Kerala, Tamil Nadu
- 2005-Achanakmar Amarkantak Biosphere Reserve - Madhya Pradesh, Chhattisgarh
- 2008 - Rann of Kutch Biosphere Reserve (largest area) Gujarat
- 2009 - Cold Desert Biosphere Reserve- Himachal Pradesh
- 2010 - Seshachalam Hills Biosphere Reserve- Andhra Pradesh
- 2011 - Panna Biosphere Reserve Madhya Pradesh

Important National Parks of India

- Bandhavgarh National Park - Shahdol (Madhya Pradesh)
- Shivpuri National Park - Shivpuri (Madhya Pradesh)
- Bhagwan Mahavir Udyaan - Goa
- Indira Gandhi Sanctuary - Tamil Nadu
- Vedantgal Bird Sanctuary - Tamil Nadu
- Rohila National Park - Himachal Pradesh
- Kishtwar National Park - Jammu and Kashmir
- Corbett National Park - Uttarakhand
- Kanha National Park - Madhya Pradesh
- Manas National Park - Assam
- Kanchenjunga National Park - Sikkim
- Gir National Park - Gujarat
- Mrugavani National Park - Telangana
- Hemis National Park - Ladakh
- Nanda Devi - Uttarakhand
- Nameri National Park - Assam
- Keibul Lamjao NP - Manipur
- Simlipal National Park - Odisha
- Kuno National Park - Madhya Pradesh
- Pench National Park - Madhya Pradesh

Major Environmental Conventions

- Ramsar Convention:
  - Convention on Wetlands
  - It was adopted in 1971 in the city of 'Ramsar' in Iran. It came into force in 1975.
- Bonn Convention:
  - It is a convention on the conservation of migratory species of wild animals.
  - It was adopted in 1979. It came into force in 1983.
- Vienna Convention:

JAI HO STUDY

Made with Xodo PDF Reader and Editor

- Related to the protection of the ozone layer.
- Adopted in 1985. It came into force in 1988.

- Montreal Protocol:
  - An international environmental protocol on substances that deplete the ozone layer.
  - Adopted in 1987. It came into force in 1989.
- Basel Convention:
  - Related to the control of transboundary movements of hazardous wastes and their disposal.
  - Adopted in 1989. It came into force in 1992. • Convention on Biological Diversity (CBD):
  - Related to conservation of biodiversity.
  - Adopted in 1992. Implemented in 1993.
- Kyoto Protocol:
  - Related to reducing greenhouse gas emissions.
  - Adopted in 1997. Implemented in 2005.
- Rotterdam Convention:
  - Related to prior informed consent procedure for certain hazardous chemicals and pesticides in international trade.
  - Adopted in 1998. Implemented in 2004.
- Cartagena Protocol:
  - It is an international environmental protocol on biosafety to the Convention on Biological Diversity.
  - Adopted in 2000, Implemented in 2003.
- Stockholm Convention:
  - Related to Persistent Organic Pollutants (POPs). o Adopted in Geneva in 2001, entered into force in 2004.
- Nagoya Protocol:
  - It deals with access to genetic resources and the fair and equitable sharing of benefits arising from their use (ABS).
  - Adopted in 2010, entered into force in 2014.
- Minamata Convention:
  - To protect human health and the environment from the adverse effects of mercury.
  - Adopted in 2013, entered into force in 2017.
- Kigali Agreement:
  - Related to ozone depletion (amendment to the Montreal Protocol).
  - Adopted in 2016, entered into force in 2019.

Major Research Institutes Centres of India

- Himalayan Forest Research Institute - Himachal Pradesh
- Rain Forest Research Institute - Jorhat
- Tropical Forest Research Institute - Jabalpur
- Central Institute of Indian Languages - Mysore
- Central Drug Research Institute (CDRI) - Lucknow
- Indian Agricultural Systems Research Institute - Meerut
- National Bureau of Agriculturally Useful Microorganisms - Mau

Conferences related to climate change

- The United Nations Conference on Environment and Development, also known as the Rio Summit or Earth Summit, was held in Rio de Janeiro, Brazil in 1992
- The UNFCCC came into force from March 21, 1994 and has been ratified by 197 countries.
- Its stakeholders meet at the COP conference every year since 1995 to assess progress in tackling climate change -
  - 1995: COP1 (Berlin, Germany) – first
  - 1997: COP 3 (Kyoto Protocol)
  - 2002: COP 8 (New Delhi, India) Delhi Declaration
  - 2007: COP 13 (Bali, Indonesia)
  - 2010: COP 16 (Cancun)
  - 2011: COP17 (Durban)
  - 2015: COP 21 (Paris)
  - 2016: COP 22 (Marrakech)
  - 2017: COP 23, Bonn (Germany)
  - 2018: COP24, Katowice (Poland)
  - 2019: COP25, Madrid (Spain)

Prescribed Sustainable Development Goals

The Sustainable Development Goals were first proposed in the year 2012 at the Rio+20 Conference. They are set to be achieved by the year 2030.

JAI HO STUDY

Made with Xodo PDF Reader and Editor

- SDG 1: End poverty
- SDG 2: Zero hunger
- SDG 3: Good health and well-being for people
- SDG 4: Quality education
- SDG 5: Gender equality
- SDG 6: Clean water and sanitation
- SDG 7: Affordable and clean energy
- SDG 8: Decent work and economic growth
- SDG 9: Industry, innovation, and infrastructure development
- SDG 10: Reduced inequality
- SDG 11: Sustainable cities and communities
- SDG 12: Responsible consumption and production
- SDG 13: Climate action
- SDG 14: Life below water
- SDG 15: Life on land
- SDG 16: Peace, justice, and strong institutions
- SDG 17: Partnerships for the goals

Words and Related Persons

- Green development: W. M. Adams
- Inventor of natural farming: Masanobu Fukuoka
- Ecosystem: A. G. Tansley
- Ecological niche: Joseph Greenell
- Greenhouse gas: Joseph Fourier
- Ecology: Ernst Haeckel
- Biological diversity: Raymond Dasmann
- Biodiversity: Walter G. Rosen
- Biosphere reserve: Eduard Suess
- Eco-tone: F. E. Clements

Major Acts Related to Environment

- River Boards Act: 1956
- Wildlife Protection Act: 1972 (amended in 1991)
- Water (Prevention and Control of Pollution) Act: 1974 (amended in 1988)
- Water (Prevention and Control of Pollution) Cess Rules: 1977
- Forest (Conservation) Act: 1980
- Air (Prevention and Control of Pollution) Act: 1981 (amended in 1987)
- Environment (Protection) Act: 1986
- National Environment Tribunal Act: 1995
- National Environment Appellate Authority Act: 1997
- Biological Diversity Act: 2002
- National Environment Policy: 2004
- Forest Rights Act: 2006

Primary Pollutants
Primary pollutants are those directly emitted into the atmosphere.

1. Carbon monoxide (CO)
2. Carbon dioxide (CO2)
3. Sulfur dioxide (SO2)
4. Nitrogen oxides (NO, NO2)
5. Particulate matter (PM10, PM2.5)
6. Methane (CH4)
7. Lead (Pb)
8. Chlorofluorocarbons (CFCs)

Secondary Pollutants
Secondary pollutants are formed in the atmosphere through chemical reactions.

JAI HO STUDY

Made with Xodo PDF Reader and Editor

1. Ozone (O3) [Tropospheric]
2. Peroxyacetyl nitrate (PAN)
3. Smog (photochemical smog)
4. Sulfuric acid (H2SO4)
5. Nitric acid (HNO3)
6. Organic aerosols

Major Environmental Movements and Their Leaders

- Chipko Movement: Sunderlal Bahuguna
- Appiko Movement: Pandurang Hegde
- Narmada Bachao Andolan: Medha Patkar
- Silent Valley Movement (Kerala): M. K. Prasad
- Bishnoi Movement (Rajasthan): Amrita Devi Bishnoi
- Tehri Dam Protest Movement: Sunderlal Bahuguna
- Dongria Tribal Movement: Chandi Prasad Bhatt
- Nilgiri Movement: N. Gopalakrishnan
- Mithun Movement (Jharkhand): Nagarika Bahini and other tribal groups
- Chilika Lake Movement (Odisha): S. K. Patnaik
- Narmada Valley Project Protest: Baba Amte

Types of Biodiversity

1. Alpha Diversity: Number of species found in a particular location or community. Example: Total bird species in a forest area.
2. Beta Diversity: Difference in species diversity between two distinct locations or communities. Example: Differences in bird communities of two forests.
3. Gamma Diversity: Total diversity across all ecosystems of a large geographical area (such as a state or country). Example: Total plant species found in North India.

In-Situ Conservation

- National parks
- Wildlife sanctuaries
- Biosphere reserves
- Sacred groves
- Natural habitats
- Protected forest areas
- Marine protected areas
- Biodiversity heritage sites
- Traditional agricultural systems
- Fish sanctuaries

Ex-Situ Conservation

- Seed banks
- Gene banks
- Pollen banks
- Tissue culture
- Embryo conservation
- Artificial insemination
- Cloning
- Botanical gardens
- Zoological gardens
- Fossil parks
- DNA banks
- Field gene banks
- In-vitro conservation

Conservation Efforts for Wildlife in India

- Project Tiger: 1973 (currently 53 tiger reserves in 18 states)

JAI HO STUDY

Made with Xodo PDF Reader and Editor

- Project Elephant: 1992 (32 elephant reserves)
- Crocodile Conservation Project: 1974
- Gharial Project: 1975
- Rhino Project: 1987
- Red Panda Project: 1996 with WWF support
- Musk Deer Project: 1970 with IUCN support
- Snow Leopard Project: 2009
- Hangul Project: 1970
- Haathi Mere Saathi Campaign: 2011 (mascot Gajju)
- Vulture Conservation Project: 2006
- Marine Turtle Project: 1999 by Wildlife Institute of India, Dehradun
- Ganga Dolphin

Ramsar Sites in India (91 as of June 5, 2025)
In Uttar Pradesh:

1. Upper Ganga River (from Brij Ghat to Narora)
2. Saman Bird Sanctuary
3. Sarsai Nawar Lake
4. Sandi Bird Sanctuary
5. Nawabganj Bird Sanctuary
6. Samaspur Bird Sanctuary
7. Parvati Arga Bird Sanctuary
8. Sursarovar Lake (Keetham Lake)
9. Haiderpur
10. Bakhira Wildlife Sanctuary

Ozone Depleting Gases and Sources

- Chlorofluorocarbons (CFCs): Refrigerators, ACs, aerosols
- Halons: Fire extinguishers
- Carbon tetrachloride (CCl4): Cleaning solvent
- Hydrochlorofluorocarbons (HCFCs): Transitional coolants
- Methyl bromide: Pesticide, fumigation
- Methyl chloroform: Degreasing solvent

Energy Resources

Non-renewable resources:

- Coal
- Petroleum
- Natural gas
- Nuclear energy
- Shale gas

Renewable energy resources:

- Wind energy
- Solar energy
- Hydropower
- Biogas
- Geothermal energy
- Tidal energy
- Ocean thermal energy
- Waste-to-energy

Conventional sources of energy:

- Coal, lignite
- Petroleum, natural gas
- Wood
- Animal waste (cow dung etc.)
- Hydropower
- Mineral oil

Non-conventional sources of energy:

- Solar energy
- Wind energy
- Biogas

JAI HO STUDY

- Geothermal energy
- Tidal energy
- Ocean wave energy
- Hydrogen energy
- Green hydrogen
- Fuel cell
- Nuclear energy

Biosphere Reserves in India (total 18)

- Nilgiri (1986, first)
- Nanda Devi (1988)
- Manas (1989)
- Gulf of Mannar (1989)
- Great Nicobar (1989)
- Nokrek (1988)
- Sundarbans (1989)
- Simlipal (1994)
- Dibru-Saikhowa (1997, smallest)
- Dihang-Dibang (1998)
- Pachmarhi (1999)
- Agasthyamalai (2001)
- Achanakmar-Amarkantak (2005)
- Kanchenjunga (2000)
- Rann of Kutch (2008, largest)
- Cold Desert (2009)
- Seshachalam (2010)
- Panna (2011)

India's 12 Biosphere Reserves included in UNESCO's MAB Programme
Nilgiri, Gulf of Mannar, Sundarbans, Nanda Devi, Nokrek, Pachmarhi, Simlipal, Achanakmar-Amarkantak, Great Nicobar, Agasthyamalai, Kanchenjunga, Panna

International Environmental Conferences/Agreements

- **Stockholm Conference (Sweden): Year 1972; Known as the Magna Carta of environment. UNEP established. June 5 declared as Environment Day.**
- **Montreal Protocol (Canada): Year 1987; First international agreement for protection of ozone layer. September 16 declared as Ozone Day.**
- **Rio Conference (Brazil) (Earth Summit): Year 1992; Agenda 21 for sustainable development approved. Establishment of UNFCCC.**
- **Kyoto Protocol (Earth + 5 Conference): Year 1997; To reduce global warming by cutting greenhouse gas emissions. Decision to cut 5.2% from 1990 levels.**
- **Johannesburg (Rio + 10, Earth + 10 Conference): Year 2002; Also called the Second Earth Summit. Agreed to establish "World Solidarity Fund" for poverty eradication. Focused on sustainable development.**
- **Cancun Conference (Mexico): Year 2010; Decision to establish a Green Climate Fund of 100 billion dollars.**
- **Rio + 20 Conference (Brazil) (Earth + 20 Conference): Year 2012; Draft "The Future We Want" presented. Zero Hunger Challenge (ensuring annual food security for all).**
- **Climate Adaptation Summit (Netherlands): Year 2021; Established new umbrella fund called International Fund for Agricultural Development (IFAD).**

UP Special

Wildlife Sanctuaries of Uttar Pradesh

- Chandraprabha Wildlife Sanctuary - Chandauli (1957)
- Kishanpur Wildlife Sanctuary - Lakhimpur Kheri (1972)
- Katarniya Ghat Wildlife Sanctuary - Bahraich (1975)
- Ranipur Wildlife Sanctuary - Banda (1977)
- Mahavir Swami Wildlife Sanctuary - Lalitpur (1977), - the smallest

10 Ramsar Sites of Uttar Pradesh

- Sandi Bird Sanctuary - Hardoi
- Sarasai Navar Lake - Etawah
- Samsapur Bird Sanctuary - Raebareli
- Saman Bird Sanctuary - Mainpuri
- Sur Sarovar Bird Sanctuary or Keetham Lake - Agra
- Nawabganj Bird Sanctuary - Unnao
- Parvati Arga Bird Sanctuary - Gonda
- Bakhira Wildlife Sanctuary - Sant Kabir City
- Upper Ganga River - Bulandshahr
- Haiderpur Wetland - Muzaffarpur, Bijnor

Arts and Crafts Institutions in Uttar Pradesh

- College of Arts and Crafts, 1911 (Lucknow)
- Indian Council of Fine Arts, 1920 (Varanasi)
- Lucknow Municipal Corporation Art Gallery, 1949
- Bharat Kala Bhavan, 1920 (Varanasi)
- State Lalit Kala Academy, 1962 (Lucknow)

State Symbols of Uttar Pradesh

- State Emblem- Ganga Yamuna Sangam, a pair of fish, bow and arrow
- State Tree - Ashoka
- State Animal - Barasingha
- State Bird - Sarus Crane
- State Game - Hockey
- State Flower - Palash/Tesu (Forest Fire)

Important Facts of Uttar Pradesh

- Lalitpur District- three more Surrounded by Madhya Pradesh
- Sonbhadra District - Shares border with four states (Madhya Pradesh, Bihar, Jharkhand, Chhattisgarh)
- Saharanpur District - Shares border with Haryana, Uttarakhand, Himachal Pradesh
- Largest in area - Lakhimpur (7680 sq km)
- Smallest in area - Hapur (660 sq km)

Districts of Uttar Pradesh

- Easternmost district - Ballia
- Westernmost district - Shamli
- Northernmost district - Saharanpur
- Southernmost district - Sonbhadra

Top five most populous districts of Uttar Pradesh

1) Prayagraj
2) Moradabad
3) Ghaziabad
4) Azamgarh
5) Lucknow

First in Uttar Pradesh

- First Governor of UP - Sarojini Naidu
- First Chief Minister of UP - Govind Ballabh Pant
- First woman Chief Minister of UP - Sucheta Kriplani
- First Chief Justice of Allahabad High Court - Walter Morgan
- First Speaker of UP Assembly - Purushottam Das Tandon
- First Information Commissioner of UP - Mohammad Asghar
- First Lokayukta of UP - Justice Vishambhar Dayal
- First State Emergency in UP - February 1968 to February 1969
- Most number of times Chief Minister of UP - Mayawati (four times)
- First Ramsar site of Uttar Pradesh - Upper Ganga River (2005)
- First National Park of Uttar Pradesh - Dudhwa National Park
- First Wildlife Sanctuary in Uttar Pradesh - Chandraprabha Wildlife Sanctuary
- First Tiger Reserve of Uttar Pradesh - Dudhwa Tiger Reserve
- First Zoo of Uttar Pradesh - Nawab Wajid Ali Shah, Lucknow

JAI HO STUDY

Made with Xodo PDF Reader and Editor

- First UNESCO Site of Uttar Pradesh - Agra Fort and Taj Mahal (1983)

Important Institutions in Uttar Pradesh

- Indian Vegetable Research Institute - Varanasi
- Indian Institute of Handloom Technology - (Chaukaghat) Varanasi
- Indian Pulses Research Institute - Kanpur
- National Sugar Institute - Kanpur
- Indian Veterinary Research Institute - Izzat Nagar Bareilly
- Indian Grassland and Fodder Research Institute - Jhansi
- Indian Sugarcane Research Institute - Lucknow Indian Grain Storage Management and Research Institute - Hapur

Bird Sanctuaries of Uttar Pradesh

- Bakhira Bird Sanctuary - 1980, Sant Kabir Nagar
- Jaiprakash Narayan Bird Sanctuary - 1991, Ballia
- Lakh Bahosi Bird Sanctuary (Largest) - 1989 Kannauj
- Nawabganj Bird Sanctuary (Oldest) - 1984, Unnao
- Patna Bird Sanctuary (Smallest) - 1991, Etah
- Vijay Sagar Bird Sanctuary - 1990, Mahoba
- Samsapur Bird Sanctuary - 1987, Raebareli
- Sandi Bird Sanctuary - 1990, Hardoi
- Parvati Arga Bird Sanctuary - 1997, Gonda

Agriculture sector in Uttar Pradesh

- Uttar Pradesh contributes about 8% to the country's GDP
- Agriculture contributes 26% to the state's GDP.
- Growth rate of agriculture and related sectors in the state is 10%
- Uttar Pradesh ranks third in agricultural export
- Ranks first in milk production and sugarcane cultivation

Districts with highest and lowest population in UP (Demographic data)

- Districts with highest and lowest population
  - Prayagraj (59,54,351)
  - Mahoba (8,75,958)
- Districts with highest and lowest population density
  - Ghaziabad (3971)
  - Lalitpur (242)
- Districts with highest and lowest literacy
  - Gautam Buddha Nagar (80.12%)
  - Shravasti (46.74%)
- Districts with highest and lowest female literacy
  - Kanpur Nagar (75.05%)
  - Shravasti (34.78%)
- Districts with highest and lowest male literacy
  - Gautam Buddha Nagar (88.06%)
  - Shravasti (57.16%)
- Districts with highest and lowest decadal growth
  - Gautam Buddha Nagar (49.%)
  - Kanpur Nagar (9.9%)
- Districts with highest and lowest sex ratio
  - Jaunpur (1024)
  - Gautam Buddha Nagar (851)

Expressways in Uttar Pradesh

- Yamuna Expressway - 165 km
- Noida-Greater Noida Expressway - 25 km
- Agra-Lucknow Expressway - 302 km
- Delhi-Meerut Expressway - 96 km
- Purvanchal Expressway - 341 km
- Bundelkhand Expressway - 296 km
- Gorakhpur Link Expressway 91 km
- Ganga Expressway - 594 km
- Lucknow - Kanpur Expressway - 63 km
- Ghaziabad - Kanpur Expressway - 380 km
- Gorakhpur- Siliguri Expressway - 519 km
- Delhi-Saharanpur - Dehradun Expressway - 210 km
- Ghazipur- Ballia- Manjhighat Expressway - 117 km

Ancient names of some major cities of UP

- Kashi - Varanasi
- Kankubja Nagar, Mahadaashri - Kannauj
- Ramgram, Gorakshpur - Gorakhpur
- Harigarh, Koil or Kol - Aligarh
- Kanhpur - Kanpur
- Piparhawa - Kapilvastu (Siddharth Nagar)
- Laxmanpur, Lakhanpur - Lucknow
- Kushinagar - Kushinara
- Madhupuri - Mathura

First in Uttar Pradesh in the field of awards

- First Bharat Ratna award from Uttar Pradesh - Jawaharlal Nehru and Govind Ballabh Pant (1955)

Made with Xodo PDF Reader and Editor

- First woman Bharat Ratna from Uttar Pradesh - Indira Gandhi (1971)
- First Padma Shri award from Uttar Pradesh - Akhil Chandra Mitra (1954)
- First woman from Uttar Pradesh Padma Shri Award - Mona Chandravati Gupta (1965)
- First Padma Bhushan Award from Uttar Pradesh - Amarnath Jha, Shanti Swarup, Maithilisharan Gupt, S. Narayan Shastri (1954)
- First female Padma Bhushan award from Uttar Pradesh - Rameshwari Nehru (1955)
- First Padma Vibhushan award from Uttar Pradesh - Vijaylakshmi Pandit (1962)

First in Uttar Pradesh in the field of education

- First University of Uttar Pradesh - Allahabad University (1887)
- First Engineering College of Uttar Pradesh - Institute of Civil Engineers at Roorkee (1847); Banaras Hindu University (1916)
- First Medical College of Uttar Pradesh - Sarojini Naidu Medical College (earlier Thomson College) Agra-1854
- First Agricultural College of Uttar Pradesh - G. B. Pant Agricultural University
- First Urdu Academy in India - Lucknow
- First Handicapped University in India - Chitrakoot (Uttar Pradesh) - Jagadguru Rambhadracharya Handicapped University
- First Sanskrit College established - Banaras (Resident Deccan) in 1791

First in Uttar Pradesh in the field of History

- First Governor of United Province - Harcourt Butler (1921-50)
- First Governor of Agra - Sir CT Metcalfe
- First Lieutenant Governor of United Province of Agra and Oudh - Sir James John Digges La Touche
- First Nawab of Oudh - Saadat Ali Khan
- First session of Congress in Uttar Pradesh - Allahabad 1888
- First Hindi Newspaper of Uttar Pradesh - Banaras Akhbar
- First sermon of Buddha - Sarnath, Varanasi

First in Uttar Pradesh in the field of Infrastructure

- First Metros in Uttar Pradesh - Lucknow Metro
- First Expressway of Uttar Pradesh - Yamuna Expressway
- First National Highway of Uttar Pradesh - NH-34 near Meerut in Uttar Pradesh state which joins near Loharu in Haryana state.
- First Railway Station of Uttar Pradesh - Kanpur Railway Station - (1859)
- First Train of Uttar Pradesh - Prayagraj to Kanpur (1859)
- First Biotechnology Park of UP - Bakshi Talab, Lucknow
- Asia's First DNA Bank - Biotech Park, Lucknow
- India's First Wi-Fi Monument - Taj Mahal (since 2015)
- First Film Center of UP - Noida (Gautam Buddha Nagar)

First in Uttar Pradesh in the field of environment

- First Ramsar site of Uttar Pradesh - Upper Ganga River (2005)
- First National Park of Uttar Pradesh - Dudhwa National Park
- First Wildlife Sanctuary in Uttar Pradesh - Chandra Prabha Wildlife Sanctuary
- First Tiger Reserve of Uttar Pradesh - Dudhwa Tiger Reserve
- First Zoo of Uttar Pradesh - Nawab Wajid Ali Shah (Lucknow)

Census 2011: Literacy rate in Uttar Pradesh

- Total literacy in Uttar Pradesh - 67.72%
- Male literacy in Uttar Pradesh - 77.30%
- Female literacy in Uttar Pradesh - 57.20%
- Increase in average literacy during 2001-11 - 11.36%
- Difference between male and female literacy - 20.10% Districts with highest literacy - (1) Gautam Buddha Nagar (2) Kanpur Nagar (3) Auraiya
- Districts with lowest literacy (same order as male literacy)- (1) Shravasti (2) Bahraich (3) Balrampur

Census 2011: Population Density in Uttar Pradesh

- Population density of Uttar Pradesh - 829 persons per sq. km.

JAI HO STUDY

Made with Xodo PDF Reader and Editor

- Increase in population density during 2001-11 - 139 persons per sq. km. • Districts with highest population density (in descending order) - (1) Ghaziabad (2) Varanasi (3) Lucknow
- Districts with lowest population density (in ascending order) - (1) Lalitpur (2) Sonbhadra (3) Hamirpur

Geographical locations of Uttar Pradesh

- Area of Uttar Pradesh - 2,40,928 square kilometers (about 7.33% of the area of India)
- Latitude - 23°52' North latitude to 30°28' North latitude
- Longitude - 77°3' East longitude to 84°39' East longitude
- Length of the state from east to west - 650 km.
- Length of the state from north to south - 240 km.
- State shares borders with - 9 (8 states and 1 union territory)
- Number of states bordering Sonbhadra - 4 (Madhya Pradesh, Chhattisgarh, Jharkhand and Bihar)

Energy resources in Uttar Pradesh:

- Formation of Uttar Pradesh State Electricity Council - 1959
- Order of total electricity production in the state - Thermal power > Hydroelectricity > Nuclear power > Solar power
- Establishment of Uttar Pradesh Electricity Regulatory Commission - 1998
- NTPC's gas based thermal power projects in the state - 3 (Auraiya, Aonla, Dadri)
- State's oldest thermal project - Harduaganj Thermal Power Station (1942)
- Establishment of the only nuclear power station in the state - Narora (Bulandshahr) (1991-92)
- Uttar Pradesh New and Renewable Energy Development Agency - 1983

Census 2011: Uttar Pradesh

- Population of Uttar Pradesh Total population - 19,98,12,341 (16.51% of the total population of the country)
- Percentage of men in the total population of the state - 52.29%
